PUBLIC UTILITIES COMMISSION  
FILING CLERK

September 29, 2012

Dear Chairman Nelson,

During a neighborhood information session, I learned some facts about how the Smart Meters were installed and rules which may have been violated.

- Installation Without Permission. As homeowner, I did not give permission and I would not have given permission if I knew that the Oncor Contractors were performing this "act" without proper authority. In addition, I am concerned that they did not properly educate us and that we find out through our neighbors that it could be harmful to us.
- Property Rights. I learned that an Oncor employee can remotely cause the accumulated data from 50 Smart Meters to be run through my Smart Meter 4 times a day .... without telling me? I assume this because neighbor John Ryan had 7 Smart Meters run through his, an Oncor Technician advised him of the potential for up to 50 Smart Meter accumulated data transmissions and John wasn't given the opportunity to approve/disapprove this action.
- Violation of Trust. During our Neighborhood Information Session, I heard several neighbors complain about health problems they were experiencing and the only change in their lives was the installation of a Smart Meter.

Because of these facts, I respectfully request the following relief from potential Health Issues:

Permanent relief by providing Texas homeowners the ability to have Analog Meters reinstated OR

- 1/ place a barrier at the Smart Meter that can reduce or eliminate the RF exposure
- 2/ guarantee that our Smart Meter does not send more than our own data
- 3/ transmit the accumulated data during daylight hours so it doesn't interfere with myself/neighbors sleeping
- 4/ Conduct an independent unbiased study to investigate the health concerns that take into consideration the many situations that homeowners find themselves. (eg. 1 apartment dweller has 16 Smart Meters next to her daughters bedroom, Double Smart Meter exposure because of neighbors meter/mine in close proximity, etc.). It is part of the mission of the P.U.C. to protect Texans ... so I write asking you to simply perform your duty.

Yours
