i. Information Regarding the Effect of Rate Change

a. No comparison has been made between the sales and revenues under KCP&L's existing transmission contracts or interchange agreements and the projected sales and revenues under the TST and GSS-1 Tariff. KCP&L is unable to determine the exact extent to which existing customers will transfer service to the tariffs filed herewith.

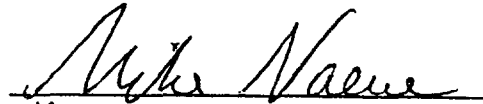

b. The firm rate provided for in the TST is \$1,030 MW/month for service at 161 kV and above, while the firm transmission rate accepted in Docket No. ER86-701-000 was \$1,100 MW/month for service at the same voltages.

c. No additional facilities are presently planned to be constructed pursuant to the TST and thus no map or single line diagram is attached.
