

DESCRIPTION OF LINE ROUTES

West Texas Utilities Company (WTU) is proposing to construct three segments of 69,000 volt single pole transmission line in accordance with its contract with Midwest Electric Cooperative, Inc. (MWEC) to provide wholesale power at four delivery points for MWEC. A description of each of the three segments is as follows:

Longworth Segment:

Proposed Route : This segment will tap WTU's existing Roby to Eskota 69,000 volt transmission line on the south side of County Road 118 approximately 1.5 miles north of the Longworth Community and extend west on the south side of County Road 118 for a distance of approximately 5,000 feet to the intersection with Highway 70 to WTU's new Longworth substation that will be located on the southeast corner of the intersection.

Alternate Route : This segment will tap WTU's existing Roby to Eskota 69,000 volt transmission line on the north side of County Road 120 approximately .5 miles north of the Longworth Community and extend west on the north side of County Road 120 for a distance of approximately 6,400 feet to the intersection with Highway 70 to WTU's new Longworth substation that will be located on the northeast corner of the intersection.

TUEC 37th Street substation in Snyder to MWEC' SN TX substation:

Preferred Route : This segment will exit Texas Utilities Electric Company's (TUEC) substation located on the south side of 37th Street and west of Ave E in the south part of Snyder, Texas. The proposed line will extend south from the substation on the west side of Avenue E for a distance of approximately 1,200 feet paralleling TUEC's existing 69,000 volt transmission line. The proposed line will then turn southeast and parallel the north side of the Roscoe Snyder and Pacific Railway railroad right of way for approximately 3,200 feet. The line will then extends approximately 5,000 feet in a east northeasterly direction to a point where it crosses Highway 208 approximately 2,000 feet south of the intersection of Highways 208 and 401. The line then extends in a northeasterly direction along a low water drainage area on the edge of cultivated fields for approximately 5,800 feet to a point about 150 feet south of Highway 180. In this section, the line will cross Highways 84 and 401 and the AT&SF railroad. The line will then turn north for approximately 2,900 feet crossing Highway 180 and paralleling the east boundary of the SN TX Industrial Park. The line will then turn east for approximately 500 feet on the south edge of the SN TX Industrial Park to the Midwest Electric Cooperative SN TX substation.

Alternate Route : This segment will exit Texas Utilities Electric Company's (TUEC) substation located on the south side of 37th Street and west of Ave E in the south part of Snyder, Texas. The proposed line will extend south from the substation on the west side of Avenue E for a distance of approximately 1,200 feet paralleling TUEC's existing 69,000 volt transmission line. The proposed line will then turn southeast and parallel the north side of the Roscoe Snyder and Pacific Railway railroad right of way for approximately 1,300 feet. The line will then extends approximately 6,400 feet in a east direction to a point where it crosses Highway 208 approximately 1,000 feet south of the intersection of Highways 208 and 401. The line continues in an easterly direction for another 900 feet to a point and then turns south for approximately 800 feet. The line then extends in a northeasterly direction along a low water drainage area on the edge of cultivated fields for approximately 5,000 feet to a point about 150 feet south of Highway 180. In this section, the line will cross Highways 84 and 401 and the AT&SF railroad. The line will then turn north for approximately 2,900 feet crossing Highway 180 and paralleling the east boundary of the SN TX Industrial Park. The line will then turn east for approximately 500 feet on the south edge of the SN TX Industrial Park to the Midwest Electric Cooperative SN TX substation.

WTU's Roby substation to MVEC's Plainview substation:

Proposed Route : This segment will exit the east side of WTU's Roby substation located on the northwest corner of N 3rd Street and Angelo Street in Roby. The line will then extend north for approximately 1,300 feet along the west side of Angelo Street. The line will then turn west for approximately 2,800 feet and crossing Highway 70. The line will then turn south for approximately 1,100 feet to a point on the west side of the intersection of Lawrence Street and N 4th Street. The line will then turn in a westerly direction and parallel a dirt road for approximately 7,200 feet to a point where it crosses a dirt road and then the line continues in a westerly direction for another 7,000 feet as it parallels a waterway until it intersects Highway 180. The line then continues west paralleling the north right of way for 1,000 feet. The line then crosses to the south side of Highway 180 and continues for approximately 16,000 feet in a westerly direction. The line then crosses to the north side of Highway 180 and continues in a westerly direction for approximately 8,000 feet and crossing Highway 1657. The line then crosses to the south side of Highway 180 and continues for approximately 5,400 feet in a westerly direction. The line then crosses to the north side of Highway 180 and continues in a westerly direction for approximately 5,500 feet. The line then crosses to the south side of Highway 180 and continues for approximately 10,700 feet in a westerly direction to the west side of FM 611. At this point, there is an approximately 800 foot tap line to the south to the location of WTU's new Hobbs substation. The line then crosses to the north side of Highway 180 on the west side of Highway 180 and continues in a westerly direction for approximately 28,700 feet. The line then turns in a northwesterly direction and continues for approximately 5,000 feet to a point west of FM 1614 where it turns west and continues for approximately 5,800 feet. The line then turns in a northwesterly direction and continues for approximately 10,300 feet to the north side of FM 1673

(Camp Springs Road). The line turns west and parallels the north side of FM 1673 for approximately 29,500 feet to MWEC's Plainview substation located north of the Price Daniels Prison Unit on the east side of Snyder.

Alternate Route : This segment will exit the east side of WTU's Roby substation located on the northwest corner of N 3rd Street and Angelo Street in Roby. The line will then extend north for approximately 1,300 feet along the west side of Angelo Street. The line will then turn west for approximately 2,800 feet and crossing Highway 70. The line will then turn south for approximately 1,100 feet to a point on the west side of the intersection of Lawrence Street and N 4th Street. The line will then turn in a westerly direction and parallel a dirt road for approximately 7,200 feet to a point where it crosses a dirt road and then the line continues in a westerly direction for another 7,000 feet as it parallels a waterway until it intersects Highway 180. The line then continues west paralleling the north right of way for 1,000 feet. The line then crosses to the south side of Highway 180 and continues for approximately 16,000 feet in a westerly direction. The line then crosses to the north side of Highway 180 and continues in a westerly direction for approximately 8,000 feet and crossing Highway 1657. The line then crosses to the south side of Highway 180 and continues for approximately 5,400 feet in a westerly direction. The line then crosses to the north side of Highway 180 and continues in a westerly direction for approximately 5,500 feet. The line then crosses to the south side of Highway 180 and continues for approximately 10,700 feet in a westerly direction to the west side of FM 611. At this point, there is an approximately 800 foot tap line to the south to the location of WTU's new Hobbs substation. The line then crosses to the north side of Highway 180 on the west side of Highway 180 and continues in a westerly direction for approximately 30,200 feet. The line then crosses to the south side of Highway 180 and continues for approximately 2,800 feet in a westerly direction. The line then crosses to the north side of Highway 180 and continues in a westerly direction for approximately 23,800 feet to the east side of County Road 1101. The line then turns and parallels the east side of County Road 1101 for approximately 9,500 feet where it crosses to the west side of County Road 1101 and continues north for 500 feet to the north side of FM 1673 (Camp Springs Road). The line turns west and parallels the north side of FM 1673 for approximately 18,500 feet to MWEC's Plainview substation located north of the Price Daniels Prison Unit on the east side of Snyder.

WEST TEXAS UTILITIES COMPANY

P.O. BOX 841 / ABILENE, TEXAS 79604 / (915) 674-7000

January 8, 1997

Carole Haynes
P.O. Box 82
Hermleigh, TX 79526

Dear Ms. Haynes,

West Texas Utilities Company (WTU or Company) has filed an application with the Public Utility Commission of Texas (PUCT or Commission) to construct new transmission lines in Fisher and Scurry Counties, Texas. PUCT rules require WTU to notify you of this application, and to provide you the following statement: **"Your land may be directly affected in this proceeding. If the preferred route or one of the alternative routes requested under the certificate is approved by the Public Utility Commission of Texas, the utility will have the right to build the facility which may directly affect your land. This proceeding will not determine the value of your land or the value of an easement if one is needed by the utility to build the facility. If you have questions about this project, you should contact Eric Blakey, Regulatory Consultant, at 915-674-7214. If you wish to participate in this proceeding by becoming a party or to comment upon action sought, you should contact the Public Utility Commission of Texas, P.O. Box 13326, Austin, Texas 78711-3326, or call the Public Utility Commission Public Information Office at (512) 936-7140 or (512) 936-7136 for the text telephone. If you wish to participate in this proceeding by becoming a party, the deadline for intervention in the proceeding is March 19, 1997, and you must send a letter requesting intervention to the Commission which is received by that date."**

This new transmission line is necessary for WTU to deliver power to Midwest Electric Cooperative (MVEC) at four locations in Fisher and Scurry Counties. After a thorough analysis of the optional routes available, WTU has proposed its "preferred" route for the PUCT's consideration. Under this proposal, WTU would construct approximately 31.6 miles of new transmission line to serve MVEC. WTU has also provided information about "alternative" routes for the PUCT's consideration. Your land would be directly affected by this alternative route.

Page 2 of 9

For purposes of this notice, land is directly affected if an easement would be obtained over all or any portion of it, or if it contains a habitable structure within 200 feet of the proposed facility.

A description of both the proposed and alternative line routes for each of the three segments, as well as a copy of the maps that were filed with the Company's application at the PUCT, are enclosed within. The estimated cost of the project is \$4,329,000.

If you have any questions about the proposed application or need additional information, please contact me at (915) 674-7214.

Sincerely,

A handwritten signature in cursive script that reads "Eric Blakey".

February 6, 1997

Jimidene K. Tutt
5423 Manor Dr
Sugarland, TX 77479

Dear Ms. Tutt,

West Texas Utilities Company (WTU or Company) has filed an application with the Public Utility Commission of Texas (PUCT or Commission) to construct new transmission lines in Fisher and Scurry Counties, Texas. PUCT rules require WTU to notify you of this application, and to provide you the following statement: **"Your land may be directly affected in this proceeding. If the preferred route or one of the alternative routes requested under the certificate is approved by the Public Utility Commission of Texas, the utility will have the right to build the facility which may directly affect your land. This proceeding will not determine the value of your land or the value of an easement if one is needed by the utility to build the facility. If you have questions about this project, you should contact Eric Blakey, Regulatory Consultant, at 915-674-7214. If you wish to participate in this proceeding by becoming a party or to comment upon action sought, you should contact the Public Utility Commission of Texas, P.O. Box 13326, Austin, Texas 78711-3326, or call the Public Utility Commission Public Information Office at (512) 936-7140 or (512) 936-7136 for the text telephone. If you wish to participate in this proceeding by becoming a party, the deadline for intervention in the proceeding is March 19, 1997, and you must send a letter requesting intervention to the Commission which is received by that date."**

This new transmission line is necessary for WTU to deliver power to Midwest Electric Cooperative (MVEC) at four locations in Fisher and Scurry Counties. After a thorough analysis of the optional routes available, WTU has proposed its "preferred" route for the PUCT's consideration. Under this proposal, WTU would construct approximately 31.6 miles of new transmission line to serve MVEC. WTU has also provided information about "alternative" routes for the PUCT's consideration. Your land would be directly affected by this alternative route.

Southwestern Electric Power
Shreveport, Louisiana

West Texas Utilities
Abilene, Texas

For purposes of this notice, land is directly affected if an easement would be obtained over all or any portion of it, or if it contains a habitable structure within 200 feet of the proposed facility.

A description of both the proposed and alternative line routes for each of the three segments, as well as a copy of the maps that were filed with the Company's application at the PUCT, are enclosed within. The estimated cost of the project is \$4,329,000.

If you have any questions about the proposed application or need additional information, please contact me at (915) 674-7214.

Sincerely,

A handwritten signature in cursive script that reads "Eric Blakey".

Dear Mr. Gettel:

You recently received notice that West Texas Utilities (WTU) has filed an application with the Public Utility Commission of Texas (PUCT) to amend its Certificate of Convenience and Necessity (CCN). The PUCT approval of this application is necessary to construct 69,000 volt transmission lines in Fisher and Scurry Counties, Texas. The proposed transmission lines will deliver power to Midwest Electric Cooperative (MVEC) at four locations in Fisher and Scurry Counties.

The map provided in the notification did not properly depict the location of the existing Plainview substation. Attached are two maps, the corrected map, and a map showing the impact of the correction. As described in the original notice, the line route requested will directly affect property owned by you.

If you have any questions about this project, please contact me at (915) 674-7214. Persons who wish to intervene in the proceeding or comment upon action sought, should contact the Public Utility Commission of Texas, P.O. Box 13326, Austin, Texas, 78711-3326, or call the Public Utility Commission Public Information Office at (512) 936-7140 or (512) 936-7136 for text telephone. The deadline for intervention in the proceeding is March 19, 1997, 70 days after the date the application was filed with the commission.

Sincerely,

Eric Blakey
