Subject: Installation of Power Lines known as Line 820.

As a resident of River Plantation I understand there are some serious concerns in relation to installation of the line. This concern is from a safety factor of high voltage lines being installed in a crowded corridor.

Considering all the above factors it would seem more logical to locate the power line on the West side of I 45 which would be 300 feet from Railroad & various pipe lines mentioned above.

Another factor on locating on the West side of I 45, due to an irrevocable trust which prohibits any further commercial or residential development.

I would appreciate you giving this some serious consideration before proceeding with the project.

Peggy Fitzgerald

Sincerely

Robert Fitzgerald
