Re: PUC Docket No. 24770; Report of ERCOT Regarding Implementation of the
ERCOT Protocols

Dear Judge Burns:

On behalf of the San Antonio City Public Service Board, the attached current résumé for Dan L. Jones is being filed for use with the witness list filed on July 3, 2002, in the above proceeding by the ERCOT Market Participants. Mr. Jones was unavailable earlier to update his résumé for this filing.

If you have questions or require further information, please call.

Yours very truly,

W. Roger Wilson

E X P E R I E N C E

City Public Service of San Antonio

July 1999 to Present

Austin, Texas

DIRECTOR, MARKET POLICY & PLANNING, JULY 1999 TO PRESENT.

My primary responsibilities consist of policy development with respect to the external market rules and market structures related to the implementation and enhancement of competitive wholesale and retail electric markets in Texas. These efforts require extensive and active participation with the Electric Reliability Council of Texas, the Public Utility Commission of Texas, other market participants and stakeholders, and the Texas Legislature. In addition, I provide strategic planning and analytical support to the various business units affected by market rules and regulations, and have project management responsibility for the organizational and functional transitions necessary to support participation in the restructured wholesale and retail markets resulting from the implementation of Senate Bill 7.

Public Utility Commission of Texas

February 1994 to July 1999

Austin, Texas

ADVISOR TO COMMISSIONER BRETT A. PERLMAN, JAN. 1999 TO JULY 1999.

CHIEF POLICY ANALYST, OFFICE OF POLICY DEVELOPMENT, Oct. 1995 to Jan. 1999.

FUEL ANALYST, ENGINEERING DIVISION, FEB. 1994 TO OCT. 1995.

As advisor to Commissioner Brett A. Perlman, my duties included advising the Commissioner on electric industry policy issues before the Commission, as well as providing support during the 1999 legislative session deliberations on electric restructuring, which culminated in the passage of comprehensive electric restructuring legislation in the form of Senate Bill 7.

As a Chief Policy Analyst at the PUCT, my primary responsibilities included performing analyses on various electric industry-related issues, formulating alternatives, and developing recommendations for Commission and/or legislative action; preparing preliminary, interim, and final Commission orders; researching and developing Commission positions on issues before the Federal Energy Regulatory Commission, the Nuclear Regulatory Commission and other federal agencies; structuring and moderating Commission workshops and rulemaking proceedings; preparing reports and/or issues-briefs on electric issues; and providing legislative briefing and support.

Much of my work was focused on electric industry restructuring issues, including the preparation of the following legislative reports:

- *Report to the 75th Texas Legislature: Electric Power Industry Scope of Competition and Potentially Strandable Investment Report, Volumes I, II, and III* (Jan. 1997).
- *Report to the Texas Senate Interim Committee on Electric Utility Restructuring: Potentially Strandable Investment Report—1998 Update* (April 1998).
- *Report to the Texas Senate Interim Committee on Electric Utility Restructuring: Adequacy of the Transmission System and the Existence of Must-run Resources in a Retail Access Environment* (July 1998).
- *Report to the Texas Senate Interim Committee on Electric Utility Restructuring: Revenues Supporting Low-Income, Renewable and Energy-Efficiency Programs* (July 1998).
- *Report to the 76th Legislature: The Scope of Competition in the Electric Industry in Texas* (Jan. 1999).
- *Electric Restructuring and Air Quality: A Preliminary Analysis of Reductions and Costs of Nitrogen Oxides Controls from Electric Utility Boilers in Texas*, joint report of the PUCT and the TNRCC (Jan. 1999)

I also served as a member of the National Association of Regulatory Commissioner's (NARUC) Staff Subcommittee on Electricity, serving as Chair from June 1996 through June 1997, and as a member of the NARUC Staff Subcommittee on Strategic Issues.

Prior to joining the Office of Policy Development at its inception, I was a fuel analyst in the PUCT's Electric Division. As a fuel analyst, my emphasis was on fuel issues related to electric generation requirements, including natural gas, coal, lignite, and nuclear fuels. My primary responsibilities included preparing and defending expert witness testimony in rate case and fuel proceedings; assessing the need for electric utility generating capacity; analyzing fuel procurement practices of electric utilities; and developing fuel price and supply projections.

Jofree Corporation

Houston, Texas

September 1992 to February 1994

RESEARCH ANALYST. At Jofree, a natural gas consulting company, I provided direct technical support to the Chief Executive Officer. Responsibilities included performing financial analyses, statistical modeling, and research activities for management consulting, litigation support/expert witness

testimony, client-specific market studies, forecasting and seminars. Clients included natural gas producers, pipeline companies, electric utilities, and various end-users.

North Harris College

August 1992 to May 1993

Houston, Texas

ADJUNCT FACULTY. I served as an adjunct instructor in the Department of Computer Science. Courses were at the introductory to intermediate level, with topics including operating systems, database, spreadsheet, and word processing applications.

Ocean Drilling Program

August 1990 to June 1991

College Station, Texas

PROGRAMMER/ANALYST. My responsibilities in this position included the development and maintenance of mainframe database applications. Projects included the writing of database code for the design of datasets and user interfaces for data entry and reporting, and the development of users' guides and software documentation for end-users and system maintenance.

General Dynamics

August 1987 to May 1989

Fort Worth, Texas

CO-OP ENGINEER. I worked three alternating semesters in the cooperative education program while working toward my undergraduate degree. My assignments included each of the following engineering groups: System Safety; Electronic Warfare Test and Analysis; and Antenna Systems.
