Re: GVEC: Hickory Forest to New Berlin Project: Docket # 26185

Gentlemen and Gentlemen:

Please record my opposition to the above project, specifically my opposition to GVEC's proposed Routes 1, 4, and/or 6. These routes do not offer any less distance from objective point to point and are the closest of the proposed routes to the City of Seguin, Texas proper. Logic would indicate that GVEC would receive less opposition by selecting the furthestmost route from the City of Seguin. Proper reasoning suggests proposed routes 7 or 8 because they are the most southern and west routes furthestmost from Seguin. However, even if these two routes are least opposed by the affected parties, Seguin proper, if given the choice, would oppose the choice of the closest routes to Seguin for many reasons, one of which would be the reduced property values due to such proceeding.

Thank your for taking an interest in this project and your concern for the property owners of the State of Texas. Your attention to my objection is appreciated.

Kindest regards,

Sarah H. Watson
