Section IV-Rate Schedules Nonfirm Energy Purchase From Qualifying Facilities - NEP

Sheet No. D16 Page 2 of 3

RELIANT ENERGY HL&P

Applicable: Entire Service Area HL&P 7176

DEFINITION OF TERMS

(1) Energy Rate is as calculated below:

ENERGY RATE (DAY) = GAS PRICE X GAS HEAT RATE

ENERGY RATE (NIGHT) = COAL PRICE X COAL HEAT RATE

GAS PRICE = WACOG as defined by the Final Order in Docket No. 7044

COAL PRICE = The avoided cost of coal as defined by the Final Order in Docket No. 7044.

HEAT RATES = RELIANT ENERGY HL&P's previous calendar year average heat rate for all units of the types referred to (gas or coal). as calculated from RELIANT ENERGY HL&P's monthly Fuel Efficiency Reports filed with the PUC.

(2) Enhancement Factors to be used in Payment Determination are:

PERIOD	JUNE - SEPT		DEC-MAR		OCT-NOV APRIL-MAY	
	<u>Hours</u>	<u>Factor</u>	<u>Hours</u>	<u>Factor</u>	<u>Hours</u>	Factor
1	1A-7A	. 85	11P-5A	. 85	11P-5A	. 85
2	7A-1P	1.02	5A-11A	1.07	5A-8A	1.00
3	1P-7P	1.13	11A-5P	1.00	8A-8P	1.065
4	7P-1A	. 98	5P-11P	1.06	8P-11P	1.00

(3) Day Hours and Night Hours are as below:

	<u>June - September</u>	<u> October - May</u>	
DAY HOURS	0700 - 0100	0500 - 2300

INTERCONNECTION COSTS

If the Company determines an interconnection study is necessary, the Company shall perform such study within a reasonable period of time under reasonable terms and conditions agreed upon by the parties. The Customer shall be responsible for the costs of such study. The interconnection study shall determine the equipment and facilities, and the costs associated therewith, that must be designed, purchased, installed, modified, replaced and/or removed to economically, reliably, and safely integrate Customer's Qualifying Facility into the Company's electrical system.

The Customer shall pay any interconnection costs, which are defined as the costs of connection, switching, metering, telemetering, transmission, distribution, safety provisions, or any other costs directly related to the installation of physical facilities necessary to permit interconnected operations with the Customer, to the extent such costs are in excess of the corresponding costs that the Company would have incurred if it had not engaged in interconnection operations, but instead generated an equivalent amount of electric energy itself or purchased an equivalent amount of electric energy or capacity from other sources. Interconnection costs do not include any costs included in the calculation of avoided costs.

PAYMENT

The Company shall send a statement and make payment to the Customer on or before the 20th day after the Customer's meter is read, except in cases where the Customer is receiving and paying for electrical service in accordance with a separate agreement. In such cases, the transfer of funds for value between parties will be on the same day. The payment statement will show the kilowatt-hours delivered to the Company during the previous billing period, customer charges payable to Company, and total amount due to the Customer or the Company.

CONTRACT

Sale of Nonfirm Energy to the Company under this tariff requires a written contract, the standard form of which was approved in Docket 7044. The final form of the contract may be negotiated by the QF and Company.
