PUC DOCKET NO. 28813

**CAP ROCK ENERGY CORPORATION'S RESPONSE TO
TEXAS COTTON GINNERS' ASSOCIATION'S SEVENTH
REQUEST FOR INFORMATION, QUESTION NO. 3**

TCGA 7-3: Refer to the proposed Tariff Manual, Section 204.13. Please provide a definition of "special equipment" and provide examples of when such "special equipment" would be installed and Cap Rock would not require a Contribution in Aid of Construction.

RESPONSE:

Special equipment includes but is not limited to switch gear, capacitors and controls, regulators, autotransformers and reclosures. If a customer were installing a load that requires installation of special equipment they may not be required to pay aid for the installation of that equipment. The type of load the customer is installing and the capacity of Cap Rock's system determines what equipment is necessary. Pipeline stations, compressor stations, and possibly a customer generating electricity at a qualifying facility are examples of customers that may require special equipment.
