PUBLIC NOTICE
FEDERAL DEPT. OF JUSTICE

March 29, 2004

Dear sir,

We recently have received your address from some friends and have been wanting to know how to contest our high electric bills. My wife and I are retired and live on a fixed income and with our other bills such as medications and food as well as being on butane for heat our bill is just too high for folks like us. Our house is barely 900sq feet and our electric bill runs around 78.00 dollars a month when we do not have a heater on electricity. The thing I notice most is this other fee we pay. The electric bill itself would not be so bad if it was not for that. I have lived here for a long time and been a customer of Cap Rock Electric but the last few years have been the worse in all of the years I have paid my bills. There are a lot of older customers like me here who have farmed and retired here but the burden of such high bills are very hard for us to endure and live modestly. Please help us with these problems. Cap Rock has put lots of things in the paper blaming the irrigated farmers these are false people here want only what is fair for all of its customers. We do not need just a board of people who seems to be lining their pockets for so called bonus money for something that they did not do or deserve. Sir if the problem with Cap Rock cannot be fixed at least please fix it where we can buy from some other company that does not attach all of the high fee charges.
