PUBLIC UTILITY COMMISSION
FILING CLERK

I vehemently oppose this rate increase proposal. We pay the highest rate in the state now. I live alone now that my children are grown and I travel about 5 days a week. My electric bill is up to 268. from 153. last year. I do all I can to conserve energy and it is still very high. Everyone around here is complaining. I don't know how people on fixed incomes can pay their bill. Please consider the consumers dilemma. We cannot change companies, because no other company serves this area. If there was another company - I would switch in a moment.

Sincerely,
Debra Foster
