Re: Docket No. 29926, *Petition of AEP Texas North Company for
Administrative Approval of Transmission Cost Recovery Factor*

Dear Ms. Todd:

Pursuant to Order No. 3 in the above-referenced docket, enclosed is a clean copy of amended Tariff Sheet No. 6.1.1.12 Rider EMC - Excess Mitigation Credits for filing in AEP Texas Central Company's Tariff for Electric Delivery Service.

Sincerely,

A handwritten signature in black ink that reads "Rhonda Colbert Ryan". The signature is fluid and cursive, with a large loop at the end of the last name.

Rhonda Colbert Ryan
Assistant General Counsel

AEP TEXAS CENTRAL COMPANY
TARIFF FOR ELECTRIC DELIVERY SERVICE

Applicable: Entire System

Chapter: 6

Section: 6.1.1

Section Title: Delivery System Charges

Revision: Second Effective Date: September 8, 2004

6.1.1.12 Rider EMC - Excess Mitigation Credit

AVAILABILITY

The Excess Mitigation Credit (EMC) is applicable to the EMC Classes beginning January 1, 2002 and ending when the total excess mitigation revenues are credited, but no later than December 31, 2006. This schedule is applicable to energy consumption and demands of retail customers taking transmission and/or distribution service from the Company and to facilities, premises and loads of such retail customers. This schedule also applies to Retail customers taking service at facilities, premises, or loads located within the service area who are not presently receiving transmission and/or distribution service from the Company, but whose present facilities, premises, or loads received transmission and/or distribution service from the Company at any time on or after May 1, 1999 when a request to change service to another utility was not pending.

MONTHLY EMC

EMC Class

Residential	\$0.000822	per kWh
Commercial and Small Industrial – Energy	\$0.001108	per kWh
Commercial and Small Industrial – Demand	\$0.2580	per kW or kVA
Large Industrial – Firm	\$0.2320	per kW or kVA
Large Industrial – Non-Firm	\$0.0470	per kW or kVA
Standby – Firm	\$0.0220	per kW or kVA
Standby – Non-Firm	\$0.0280	per kW or kVA
Municipal and Cotton Gin	\$0.000825	per kWh

EMC CLASSES

For the purposes of billing excess mitigation, each end-use Retail Customer shall be designated as a Retail Customer in one of the following eight Retail Customer classes. The EMC class shall match the Schedule TC class to which the customer is assigned. A new Retail Customer shall be assigned to the appropriate Retail Customer class based on anticipated usage characteristics.

Residential – This service is applicable to Retail Customers consisting of individual private dwellings and individually metered Apartments. In addition, security or flood lighting services provided on a residential Retail Customer's premises shall be included in this rate class.

Commercial and Small Industrial – Energy – This service is applicable to non-residential Retail Customers (1) with annual maximum measured Demands less than 12,500 kVA and (2) whose current rate class for the purpose of transmission and distribution usage is billed without any Demand charges. In addition, security or flood lighting services provided on applicable end-use Retail Customer's premises shall be included in this rate class.

Commercial and Small Industrial – Demand – This service is applicable to non-residential Retail Customers (1) with annual maximum measured Demands less than 12,500 kVA and (2) whose current rate class for the purpose of transmission and distribution usage requires a Demand Meter.

Large Industrial – Firm – This service is applicable to non-residential Retail Customers taking non-interruptible service with annual maximum measured Demands equal to 12,500 kVA or more whose service is provided to the entire premises at not less than 60,000 volts.

Standby – Firm – This service is applicable to non-residential Retail Customers taking non-interruptible standby service when such service may be substituted, either directly or indirectly, for Retail Customer-owned and operated power production equipment.

Standby – Non-Firm – This service is applicable to non-residential Retail Customers whose service is provided to the entire premises at not less than 60,000 volts who are taking as-available standby service when such service may be substituted, either directly or indirectly, for Retail Customer-owned and operated power production equipment not held primarily for emergency use.

Large Industrial – Non-Firm – This service is applicable to non-residential Retail Customers taking interruptible service with annual maximum measured Demands equal to 12,500 kVA or more whose service is provided to the entire premises at not less than 60,000 volts. In addition, this service is applicable to Retail Customers whose service is provided to the entire premises at not less than 60,000 volts and who have self-generation capability equal to or greater than 25,000 kW and who purchase a minimum of 25,000 kW as Standby – Firm service for that portion of the Retail Customer's load which displaces, in total or in part, the Retail Customer's self-generating capability.

Municipal and Cotton Gin – This service is applicable to municipalities, other utilities, and other public agencies for Electric Service for the operation of water supply, sewage, and/or drainage systems serving the general public supplied at one Point of Delivery and measured by one Meter. In addition, this service is applicable to political subdivisions and eleemosynary institutions for traffic lighting, flood lighting and street lighting service
