RE: Project No. 32182 – *Investigation of Methods to Improve Electric and Telecom Infrastructure That Will Minimize Long Term Outages and Restoration Costs*

Dear Mr. Galloway:

On behalf of Lake Livingston Telephone Company ("Lake Livingston" or "the Company"), I am filing an original and ten (10) copies of this updated response to the PUC Staff's October 14, 2008, Information Request in the above referenced Project.

As Lake Livingston has previously reported, most of the Company's outside plant infrastructure consists of direct buried and underground facilities. Its small amount of aerial outside plant utilizes power poles owned by Sam Houston Electric Cooperative ("SHECO"). The vegetation control and structural integrity program is performed and managed by the electric cooperative as required in the Pole Attachment Agreement between Lake Livingston and SHECO. However, the Company's outside plant personnel are also responsible for reporting any overgrown vegetation, obstructions or hazardous conditions to insure those conditions are investigated and resolved.

If you need any additional information, please contact Terry Gentle at 936-566-4000 or tgentle@livingston.net.

Respectfully submitted,

James A. Miller
Authorized Representative for
Lake Livingston Telephone Company
