*Motion filing, Requesting to reschedule due date for "Objections to TXU's direct testimony."*

*Re: PUC Docket No. 32455; SOAH Docket No. 473-06-2232*

*Requesting here at least a three week deferral for due date to allow for a prehearing near affected area.*

*Most interveners are still not able to grasp what all this honking is all about yet. A prehearing held near these neighborhoods could sure resemble some justice being dished around.*

*My example of an objection will be stated as, " to the direct testimony entered as- Item 135 on 6/23/2006 3:24 PM from TXU's James R. Deen, I too was at all (both) those open house tea parties in 2003, yet even with your large teams efforts most of us didn't get it. ( I was counting and the odds were always at least ten to one. I'd bet none of the guest had ever had so many wannabe cabana-boys paying attention to them in there whole life.) We all kind of meandered in randomly, most by ourselves. At any given time there were no more than maybe five guests. I'd bet unless some of the guest were electrical engineers they left those little fireside chats with a little punch and cookies crumbs on their shirts thinking, "What can a 345kV be? My sweetie has a 220 dryer."*

*This testimony of item 135 offers a chance to hear more about the force that picked the preferred route, also. Yet, last night we receive great news here in Dallas, Laura goes live with news she is throwing in the towel. And my bet now is if the current chair and co-chairs of this idiots plan for our river, keep pushing it on an exasperated people, they are going to find they have won some old fashion attention as the people strap 'em to a pole on a raft all freshly decorated with tar and feathers.....*

*page one of three*

*And the band will strike up with a blast, as they are sent down river and into the open waters where they can harm no more,*

*Utilizing information from Item 2 a 600+ page filing on 3/10/2006 by TXU, I'll point out TXU states 1400 invitations were given for either of two nights. Yet total both nights together and you know,... less than 40 people made it to the ball. Would not these figures scream foul? Some may have just not got their invitation; some may have had other plans both nights. And for most that read an invitation they must of had no idea of its meaning.*

*"I Mark Spence claim I'll do my best to comply with the latest intelligence from the 'Policy Development Division,' at phone number 512.936.7200 Track down and deliver to all.*

*In case this motion doesn't hold any water either, I'm checking how soon I can have my hands on a transcript from the prehearing in Austin. I just found out they are available hot off the press for a cool hundred bucks a pop, FOB Austin. My two oldest grandchildren are in this written recording, so for me, "This would be a good deal for twice the price." Hey maybe we could have a little block party and each read a piece out 'load', because at the first prehearing I'd couldn't hear half of what was said.*

*This I Believe,*

*Mark*

*Mark Spence*

*ps neighbors: It's being suggested we become groupie by our on choice. Our choice, or they may decide to start choosing for us. With just now feeling I'm getting some info about our rights as Texas Citizens on this hoop-jump we have been invited into this year,.....*

*page two of three*

*at this time the only group I'd feel comfortable in would be if we don't think we can get them with a TKO soon, and it appears to be headed for all fifteen rounds, I'd think maybe we should group some money together and buy logging trucks. Since we are doing most everything through fax or US Mail, we'll look back about a year from now and say, "Wow that was a lot of flying paper," Yea, this much intervention could make a desert out of our beautiful East Texas Forests. Yet ending on a bright note, we ought to have plenty of confetti for our victory parade.*
