Dear Sir:

Our property is one of those affected by the possibility of the proposed Brazos Electric power lines. It is in the path of the route referred to as "A".

We are extremely concerned, no, frightened, about the health hazard due to exposure to the great amount of radiation emitted by these heavy duty carriers. It seems that for humanitarian reasons, the route should be in the least populated path, which ours is not.

Our property values will be affected as well. As senior citizens, that property is the biggest piece of our investment in covering future personal care, and there is nothing more we can do to redirect that piece of our plan.

We understand that this company already has easements to their destination through Oklahoma. Please do whatever is in your power to encourage them to use the easements that are already established.

Sincerely,
Marsha M. Stuart
