Ms. Ana Maria Trevino
Filing Clerk
Public Utility Commission of Texas
1701 Congress Avenue
P.O. Box 13326
Austin, TX 78711-3326

Re: Project No. 35077 – Sharyland Utilities, L.L.C. Generation Interconnection Agreement
between Sharyland Utilities, L.L.C. and Ignacio Grid, LLC

Ms. Trevino,

Please find attached the Generation Interconnection Agreement (“Agreement”) between Sharyland Utilities, L.L.C. (“Sharyland”) and Ignacio Grid, LLC (“Generator”), for filing with the Public Utility Commission of Texas pursuant to 16 Tex. Admin. Code § 25.195(e). Because the Agreement contains deviations from the Standard Generation Interconnection Agreement, Sharyland has prepared this letter explaining the changes and requests that it be filed with the Agreement.

Exhibit “A”

- The introductory paragraphs have been amended to clarify that the Agreement covers a portion of the original Madero Grid project that has been bifurcated at Generator’s request, but that the same Facilities Study Agreement between the project developer and Sharyland should be used notwithstanding the project bifurcation.
- Article 1.7, the definition of “Facilities Study Agreement” has been deleted, and a definition for “Facilities Study Agreement” has been added to the introductory paragraphs.
- Article 10.17, “Assignment”, has been amended to broaden Sharyland’s assignment rights.
- Article 10.22, “Order of Precedence”, has been added for clarification.

Exhibits “B”, “C”, “D”, and “E”

- Exhibits B, C, D, and E have been modified to include project specific details.

Sincerely,

Christopher McBay
Counsel for Sharyland Utilities, L.L.C.

1169

ERCOT STANDARD GENERATION INTERCONNECTION AGREEMENT

This Standard Generation Interconnection Agreement is made and entered into this 26th day of October, 2020, between **Sharyland Utilities, L.L.C.** (“Transmission Service Provider” or “TSP”) and **Ignacio Grid, LLC** (“Generator”), hereinafter individually referred to as “Party,” and collectively referred to as “Parties.” In consideration of the mutual covenants and agreements herein contained, the Parties hereto agree as follows:

Transmission Service Provider represents that it is a public utility that owns and operates facilities for the transmission and distribution of electricity. Generator represents that it will own and operate the Plant. Pursuant to the terms and conditions of this Agreement, Transmission Service Provider shall interconnect Generator’s Plant with Transmission Service Provider’s System consistent with the Facilities Study Agreement executed between the project developer, Able Grid Energy Solutions, and TSP on January 22, 2019 (the “Facilities Study Agreement”) for the predecessor project to Ignacio Grid, Madero Grid. Madero Grid, originally contemplated as a 201.96 MW project has since been divided into two projects, Madero Grid (the “Madero Project”) and Ignacio Grid, each sized at 100.64 MW.

This Agreement applies only to the Plant and the Parties’ interconnection facilities as identified in Exhibit “C”.

This Agreement shall become effective on October 26, 2020, subject to Governmental Authority approval, if required, and shall continue in full force and effect until terminated in accordance with Exhibit “A”.

This Agreement will be subject to the following, all of which are incorporated herein:

- A. The “Terms and Conditions of the ERCOT Standard Generation Interconnection Agreement” attached hereto as Exhibit “A”;
- B. The ERCOT Requirements (unless expressly stated herein, where the ERCOT Requirements are in conflict with this Agreement, the ERCOT Requirements shall prevail);
- C. The PUCT Rules (where the PUCT Rules are in conflict with this Agreement, the PUCT Rules shall prevail);
- D. The Time Schedule attached hereto as Exhibit “B”;
- E. The Interconnection Details attached hereto as Exhibit “C”;
- F. The notice requirements attached hereto as Exhibit “D”;
- G. The Security Arrangement Details attached hereto as Exhibit “E”;

[Signature page to follow]

IN WITNESS WHEREOF, the Parties have executed this Agreement in duplicate originals, each of which shall constitute and be an original effective Agreement between the Parties.

Sharyland Utilities, L.L.C.

Exhibit “A”
Terms and Conditions of the ERCOT Standard Generation Interconnection Agreement

ARTICLE 1. DEFINITIONS

Capitalized terms shall have the meanings as set forth below, except as otherwise specified in the Agreement:

- 1.1 “CCN” shall mean a Certificate of Convenience and Necessity issued by the PUCT.
- 1.2 “Commercial Operation” shall mean the date on which Generator declares that the construction of the Plant has been substantially completed, Trial Operation of the Plant has been completed, and the Plant is ready for dispatch.
- 1.3 “Control Area” shall have the meaning ascribed thereto in PUCT Rule 25.5(8) or its successor.
- 1.4 “ERCOT” shall mean the Electric Reliability Council of Texas, Inc.
- 1.5 “ERCOT Requirements” means the ERCOT Operating Guides, ISO Generation Interconnection Procedures as well as any other documents adopted by the ISO or ERCOT relating to the interconnection and operation of generators and transmission systems in ERCOT as amended from time to time, and any successors thereto. Any requirement in the foregoing documents imposed upon generation entities or generation facilities shall become the responsibility of the Generator, and any requirements imposed on transmission providers or transmission facilities shall become the responsibility of the TSP.
- 1.6 “Facilities Study” shall have the meaning as described in PUCT Rule 25.198(g) or its successor.
- 1.7 [RESERVED]

- 1.8 “GIF” shall mean Generator’s interconnection facilities as described in Exhibit “C.”
- 1.9 “Good Utility Practice” shall have the meaning described in PUCT Rule 25.5(23) or its successor.
- 1.10 “Governmental Authority(ies)” shall mean any federal, state, local or municipal body having jurisdiction over a Party.
- 1.11 “In-Service Date” shall be the date, as reflected in Exhibit “B,” that the TIF will be ready to connect to the GIF.
- 1.12 “ISO” shall mean the ERCOT Independent System Operator.
- 1.13 “Plant” shall mean the electric generation facility owned and operated by the Generator, as specified in Exhibit “C.”
- 1.14 “Point of Interconnection” shall mean the location(s) where the GIF connects to the TIF as negotiated and defined by the Parties and as shown on Exhibit “C” of this Agreement.
- 1.15 “PUCT” shall mean the Public Utility Commission of Texas.
- 1.16 “PUCT Rules” shall mean the Substantive Rules of the PUCT.
- 1.17 “Reasonable Efforts” shall mean the use of Good Utility Practice and the exercise of due diligence (pursuant to PUCT Rule 25.196(e)).
- 1.18 “System Protection Equipment” shall mean those facilities located within the TIF and the GIF as described in Section 5.6 and Exhibit “C.”
- 1.19 “System Security Study” shall have the meaning as described in PUCT Rule 25.198(f) or its successor.

1.20 “TCOS” shall mean the TSP’s transmission cost of service as allowed by the applicable Governmental Authority.

1.21 “TIF” shall mean the TSP’s interconnection facilities as described in Exhibit “C” to this Agreement.

1.22 “Trial Operation” shall mean the process by which the Generator is engaged in on-site test operations and commissioning of the Plant prior to Commercial Operation.

1.23 “TSP” shall mean the Transmission Service Provider.

1.24 “TSP System” shall mean the electric transmission facilities, including the TIF, and all associated equipment and facilities owned and/or operated by the TSP.

ARTICLE 2. TERMINATION

2.1 Termination Procedures. This Agreement may be terminated as follows:

A. the Generator may terminate this Agreement after giving the TSP thirty (30) days advance written notice; or

B. the TSP may terminate this Agreement (subject to Governmental Authority approval, if required) on written notice to the Generator if the Generator’s Plant has not achieved Commercial Operation within one year after the scheduled Commercial Operation date reflected in Exhibit “B”; or

C. either Party may terminate this Agreement in accordance with Section 10.6.

2.2 Termination Costs. If a Party elects to terminate the Agreement pursuant to Section 2.1 above, the Generator shall pay all costs incurred (or committed to be incurred) by TSP, as of the date of the other Party’s receipt of such notice of termination, that are the responsibility of the Generator under this Agreement. In the event of termination by either Party, both Parties shall use commercially reasonable efforts to mitigate the damages and

charges that they may incur as a consequence of termination. The provisions of the Sections 2.2 and 2.3 shall survive termination of the Agreement.

2.3 Disconnection. Upon termination of this Agreement, the Parties will disconnect the GIF from the TIF.

ARTICLE 3. REGULATORY FILINGS

3.1 Filing. The TSP shall file this executed Agreement with the appropriate Governmental Authority, if required. Any portions of this Agreement asserted by Generator to contain competitively sensitive commercial or financial information shall be filed by the TSP identified as “confidential” under seal stating, for the TSP’s showing of good cause, that Generator asserts such information is confidential information and has requested such filing under seal. If requested by the TSP, Generator shall provide the TSP, in writing, with the Generator’s basis for asserting that the information referred to in this Section 3.1 is competitively sensitive information, and the TSP may disclose such writing to the appropriate Governmental Authority.

3.2 Regulatory Approvals. Unless exempt, the TSP shall timely request ISO and all regulatory approvals necessary for it to carry out its responsibilities under this Agreement. Such approvals shall include any CCN required for the construction of the TIF.

ARTICLE 4. INTERCONNECTION FACILITIES ENGINEERING, PROCUREMENT, AND CONSTRUCTION

4.1 Options. The Generator shall select one of the following options (subsection A or subsection B) and include the selected option in Exhibit “B” for completion of the TIF:

A. The TSP shall design, procure, and construct the TIF, using Reasonable Efforts to complete the TIF by the In-Service Date reflected in Exhibit “B.” The TSP will utilize its own resources and will contract for additional resources, as reasonably necessary, to meet the In-Service Date. Such resources shall include, as the TSP believes is reasonable, use of other contractors, other equipment suppliers, other material suppliers, additional contract personnel, additional payments to contractors for expedited work, and premiums paid to equipment and material suppliers for expedited delivery. The TSP shall not be required to undertake any initiative which is inconsistent with its standard safety practices, its material and equipment specifications, its design criteria and construction procedures, its labor agreements, applicable laws and regulations, and ERCOT Requirements. In the event the TSP reasonably expects that it will not be able to complete the TIF by the In-Service Date, the TSP will promptly provide written notice to the Generator and will undertake Reasonable Efforts to meet the earliest date thereafter.

B. (i) The TSP shall design, procure, and construct the TIF by the In-Service Date reflected in Exhibit “B.” The Parties acknowledge that the In-Service Date was either agreed upon through good faith negotiations or designated by the Generator upon failure of the Parties to agree. In the process of negotiating the In-Service Date, Generator will request a date upon which it reasonably expects it will be ready to begin use of the TIF and upon which it reasonably expects to begin doing so. Any date designated by the Generator shall in no event be less than fifteen months from the date that all conditions of Sections 4.2 and 4.3 have been satisfied. The designated In-Service Date will be extended day for day for each day that the ISO refuses to grant clearances to install equipment. If the TSP fails to

complete the TIF by the In-Service Date reflected in Exhibit "B," the TSP shall pay the Generator liquidated damages in accordance with this Section 4.1.B.

(ii) The Parties agree that actual damages to the Generator, in the event the TIF are not completed by the In-Service Date, may include Generator's fixed operation and maintenance costs and lost opportunity costs. Such actual damages are uncertain and impossible to determine at this time. The Parties agree that, because of such uncertainty, any liquidated damages paid by the TSP to the Generator shall be an amount equal to $\frac{1}{2}$ of 1% of the actual cost of the TIF, per day. However, in no event shall the total liquidated damages exceed 20% of the actual cost of the TIF. The Parties agree that such liquidated damages are less than the Generator's actual damages. The Parties agree that the foregoing payments will be made by the TSP to the Generator as just compensation for the damages caused to the Generator, which actual damages are uncertain and impossible to determine at this time, and as reasonable liquidated damages, but not as a penalty or a method to secure performance of this Agreement.

(iii) The TSP shall apply to have the full costs of the TIF included in TCOS. If the PUCT issues a final, appealable order excluding from TCOS any portion of the TIF costs, including higher contractor and vendor costs due to liquidated damage provisions in those contracts and insurance costs to cover liquidated damages, which costs may have been reasonably incurred but which the PUCT finds should not be recovered through TCOS, the Generator shall reimburse the TSP for such costs in an amount not to exceed the difference between the TSP's estimate of the cost of the TIF under section 4.1.A and the TSP's estimate of the cost of the TIF under Section 4.1.B as reflected in Exhibit "C." Such costs shall be estimated using Good Utility Practice.

(iv) No liquidated damages shall be paid to Generator if the Generator is not ready to commence use of the TIF for the delivery of power to the Plant for Trial Operation or export of power from the Plant on the In-Service Date, unless the Generator would have been able to commence use of the TIF for the delivery of power to the Plant for Trial Operation or export of power from the Plant but for TSP's delay.

(v) If the In-Service Date has been designated by the Generator upon a failure of the Parties to agree on the In-Service Date, the TSP may, at its option, require the Generator to subcontract with the TSP for all or part of the design, procurement and construction of the TIF in accordance with the TSP's standard subcontractor agreements. In such event, the TSP shall be subject to the payment of liquidated damages to the Generator only if the In-Service Date is not met solely due to the TSP's failure to complete the portion of the TIF for which the TSP has retained responsibility. It is the intent of this subsection to give the TSP full control of the contents and quality of the TIF. To the extent the Generator acts as a subcontractor to the TSP, the following will apply: 1) The Generator shall engineer, procure equipment, and construct the TIF (or portions thereof) using Good Utility Practice and using standards and specifications provided in advance by the TSP; 2) In its engineering, procurement and construction of the TIF, the Generator shall comply with all requirements of law to which the TSP would be subject in the engineering, procurement or construction of the TIF; 3) The TSP shall review and approve the engineering design, acceptance tests of equipment, and the construction of the TIF; 4) The TSP shall have the right to approve and accept for operation the TIF in accordance with the standards and specifications provided in advance by the TSP, such approval and acceptance shall not be unreasonably withheld, conditioned, or delayed; 5) Should any

phase of the engineering, equipment procurement, or construction of the TIF, including selection of subcontractors, not meet the standards and specifications provided by the TSP, and therefore be deemed unacceptable, then the Generator shall be obligated to remedy that portion of the TIF or selection of subcontractors that is deemed unacceptable, the TSP's approval of the Generator's selection of subcontractors will not be unreasonably withheld, conditioned or delayed; and 6) Once the TIF is accepted for operation by the TSP, then the TSP shall reimburse the Generator for the reasonable and necessary costs incurred by the Generator to complete the TIF, not to exceed the amount specified in the subcontract. Such reimbursement shall be made within thirty days after receipt of the invoice, unless otherwise agreed to by the Parties.

4.2 Equipment Procurement. If responsibility for construction of the TIF is borne by the TSP, then the TSP shall commence design of the TIF and procure necessary equipment within a reasonable time after all of the following conditions are satisfied:

- A. The TSP has completed the Facilities Study pursuant to the Facilities Study Agreement;
- B. The TSP has received written authorization to proceed with design and procurement from the Generator by the date specified in Exhibit "B"; and
- C. The Generator has provided security to the TSP in accordance with Section 8.3 by the dates specified in Exhibit "B."

4.3 Construction Commencement. The TSP shall commence construction of the TIF as soon as practicable after the following additional conditions are satisfied:

- A. Approval of the appropriate Governmental Authority has been obtained for any facilities requiring regulatory approval;

B. Necessary real property rights, if any, have been obtained;

C. The TSP has received written authorization to proceed with construction from the Generator by the date specified in Exhibit "B"; and

D. The Generator has provided security to the TSP in accordance with Section 8.3 by the dates specified in Exhibit "B."

4.4 Work Progress. The Parties will keep each other advised periodically as to the progress of their respective design, procurement and construction efforts. If, at any time, the Generator becomes aware that the completion of the TIF will not be required until after the specified In-Service Date, the Generator will promptly provide written notice to the TSP of a new, later In-Service Date.

4.5 Conditions Precedent Delay. To the extent this Agreement incorporates a specified In-Service Date and the Generator fails to satisfy conditions precedent under Sections 4.2 and 4.3 so that the TSP may meet the In-Service Date, the Parties will negotiate in good faith to establish a new schedule for completion of the TIF.

ARTICLE 5. FACILITIES AND EQUIPMENT

5.1 Information Exchange. The Parties shall exchange information and mutually agree upon the design and compatibility of the Parties' interconnection facilities. The Parties shall work diligently and in good faith to make any necessary design changes to ensure compatibility of the GIF to the TSP System.

5.2 GIF Construction. Generator agrees to cause the GIF to be designed and constructed in accordance with Good Utility Practice, ERCOT Requirements and the National Electrical Safety Code in effect at the time of construction. Within one-hundred and twenty (120) days after Commercial Operation, unless the Parties agree on another mutually

acceptable deadline, the Generator shall deliver to the TSP the following “as-built” drawings, information and documents for the GIF: a one-line diagram, a site plan showing the Plant and the GIF, plan and elevation drawings showing the layout of the GIF, a relay functional diagram, relaying AC and DC schematic wiring diagrams and relay settings for all facilities associated with the Generator’s main-power transformers, the facilities connecting the Generator to the main power transformers and the GIF, and the impedances (determined by factory tests) for the associated main power transformers and the generators.

5.3 TIF Construction. The TSP agrees to cause the TIF to be designed and constructed in accordance with Good Utility Practice, ERCOT Requirements and the National Electrical Safety Code in effect at the time of construction.

5.4 Equipment Changes. For facilities not described in Exhibit “C,” if either Party makes equipment changes to the Plant, the GIF, the TIF or the TSP System which it knows will affect the operation or performance of the other Party’s interconnection facilities, the Parties agree to notify the other Party, in writing, of such changes. Such changes shall be made in accordance with ERCOT Requirements and coordinated between the Parties.

5.5 Metering, Telemetry and Communications Requirements.

A. Metering and telemetry of data will be accomplished in accordance with ERCOT Requirements. The specific metering, telemetry and communications equipment to be installed and data to be telemetered are described in Exhibit “C.”

B. At the Point of Interconnection, the metering and telemetry equipment shall be owned by the TSP. However, the TSP shall provide the Generator with metering and telemetry values in accordance with ERCOT Requirements.

C. A minimum set of inputs to the telemetry equipment are specified in Exhibit "C." Additional sets of inputs may be subsequently mutually agreed upon.

D. The TSP will notify the Generator at least five (5) working days in advance of any planned maintenance, inspection, testing, or calibration of the metering equipment, unless otherwise agreed to in writing. The Generator, or its designated representative, shall have the right to be present for these activities and to receive copies of any documents related to the procedures and results.

E. Prior to the connection of the GIF to the TIF, acceptance tests will be performed by the owning Party to ensure the proper functioning of all metering, telemetry and communications equipment associated with the Point of Interconnection and both Parties' interconnection facilities, and to verify the accuracy of data being received by the TSP, the Control Area(s) in which the Plant and the TSP are located and the Generator. All acceptance tests will be performed consistent with ERCOT Requirements.

F. The TSP shall, in accordance with Good Utility Practice and ERCOT Requirements, specify communications facilities, including those necessary to transmit data from the metering equipment to the TSP, that are necessary for the effective operation of the Plant and the GIF with the TSP System. Such communication facilities shall be included in Exhibit "C." The Generator shall make arrangements to procure and bear the cost of such facilities.

G. Any changes to the meters, telemetry equipment, voltage transformers, current transformers, and associated panels, hardware, conduit and cable, which will affect the data being received by the other Party must be mutually agreed to by the Parties.

H. Each Party will promptly advise the other Party if it detects or otherwise learns of any metering, telemetry or communications equipment errors or malfunctions that require the attention and/or correction by the other Party. The Party owning such equipment shall correct such error or malfunction as soon as reasonably feasible in accordance with ERCOT Requirements.

5.6 System Protection and Other Controls Requirements.

A. Each Party's facilities shall be designed to isolate any fault, or to correct or isolate any abnormality, that would negatively affect the other Party's system or other entities connected to the TSP System.

B. The Generator shall be responsible for protection of its facilities consistent with ERCOT Requirements.

C. Each Party's protective relay design shall incorporate the necessary test switches to perform the tests required in Section 5.6.F. The required test switches will be placed such that they allow operation of lockout relays while preventing breaker failure schemes from operating and causing unnecessary breaker operations and tripping the Generator's units.

D. Recording equipment shall be installed to analyze all system disturbances in accordance with ERCOT Requirements.

E. Each Party will test, operate and maintain System Protection Equipment in accordance with ERCOT Requirements. Each Party will provide reasonable notice to the

other Party of any testing of its System Protection Equipment allowing such other Party the opportunity to have representatives present during testing of its System Protection Equipment.

F. Prior to the In-Service Date, and again prior to Commercial Operation, each Party or its agent shall perform a complete calibration test and functional trip test of the System Protection Equipment. At intervals suggested by Good Utility Practice or at intervals described in the ERCOT Requirements if so defined therein, and following any apparent malfunction of the System Protection Equipment, each Party shall perform both calibration and functional trip tests of its System Protection Equipment. These tests do not require the tripping of any in-service generation unit. These tests do, however, require that all protective relays and lockout contacts be activated.

5.7 No Annexation. Any and all equipment placed on the premises of a Party shall be and remain the property of the Party providing such equipment regardless of the mode and manner of annexation or attachment to real property, unless otherwise mutually agreed by the Parties.

ARTICLE 6. OPERATION AND MAINTENANCE

6.1 Operation and Maintenance of Interconnection Facilities. The Parties agree to operate and maintain their systems in accordance with Good Utility Practice, National Electrical Safety Code, the ERCOT Requirements, PUCT Rules and all applicable laws and regulations. Subject to any necessary ISO approval, each Party shall provide necessary equipment outages to allow the other Party to perform periodic maintenance, repair or replacement of its facilities. Such outages shall be scheduled at mutually agreeable times,

unless conditions exist which a Party believes, in accordance with Good Utility Practice, may endanger persons or property. No changes will be made in the normal operation of the Point of Interconnection without the mutual agreement of the Parties except as otherwise provided herein. All testing of the Plant that affects the operation of the Point of Interconnection shall be coordinated between the TSP, the Control Area(s) in which the Plant and the TSP are located, and the Generator and will be conducted in accordance with ERCOT Requirements.

6.2 Control Area Notification. At least six months before Trial Operation, the Generator shall notify the TSP in writing of the Control Area in which it will be located. If the Generator elects to be located in a Control Area other than the Control Area in which the TSP is located, all necessary agreements, including but not limited to remote control area generator interchange agreements, if applicable, and appropriate measures under such agreements, shall be executed and implemented prior to the placement of the Plant in the other Control Area. The Parties will diligently cooperate with one another to enable such agreements to be executed and implemented on a schedule necessary to meet the Trial Operation date specified in Exhibit "B."

6.3 Land Rights and Easements. Terms and conditions addressing the rights of the TSP and the Generator regarding any facilities located on the other Party's property shall be addressed in a separate, duly executed and recorded easement agreement between the Parties. Prior to Commercial Operation, the Parties will mutually agree upon procedures to govern access to each other's property as necessary for the Parties to fulfill their obligations hereunder.

6.4 Service Interruption. The Parties recognize that the interruption of service

provisions of the PUCT Rules give TSP the right to disconnect the TSP System from the Plant under the conditions specified therein. The Generator will promptly disconnect the Plant from the TSP System when required by and in accordance with the PUCT Rules and ERCOT Requirements.

6.5 Switching and Clearance.

A. Any switching or clearances needed on the TIF or the GIF will be done in accordance with ERCOT Requirements.

B. Any switching and clearance procedure necessary to comply with Good Utility Practice or ERCOT Requirements that may have specific application to the Plant shall be addressed in Exhibit "C."

6.6 Start-Up and Synchronization. Consistent with ERCOT Requirements and the Parties' mutually acceptable procedure, the Generator is responsible for the proper synchronization of the Plant to the TSP System.

6.7 Routine Operational Communications. On a timely basis, the Parties shall exchange all information necessary to comply with ERCOT Requirements.

6.8 Blackstart Operations. If the Plant is capable of blackstart operations, Generator will coordinate individual Plant start-up procedures consistent with ERCOT Requirements. Any blackstart operations shall be conducted in accordance with the blackstart criteria included in the ERCOT Requirements and the TSP Blackstart Plan on file with the ISO. Notwithstanding this section, the Generator is not required to have blackstart capability by virtue of this Agreement. If the Generator will have blackstart capability, then Generator shall provide and maintain an emergency communication system that will interface with the TSP during a blackstart condition.

6.9 Power System Stabilizers. The Generator shall procure, install, maintain and operate power system stabilizers if required to meet ERCOT Requirements and as described in Exhibit "C."

ARTICLE 7. DATA REQUIREMENTS

7.1 Data Acquisition. The acquisition of data to realistically simulate the electrical behavior of system components is a fundamental requirement for the development of a reliable interconnected transmission system. Therefore, the TSP and the Generator shall be required to submit specific information regarding the electrical characteristics of their respective facilities to each other as described below in accordance with ERCOT Requirements.

7.2 Initial Data Submission by TSP. The initial data submission by the TSP shall occur no later than 120 days prior to Trial Operation and shall include transmission system data necessary to allow the Generator to select equipment and meet any system protection and stability requirements.

7.3 Initial Data Submission by Generator. The initial data submission by the Generator, including manufacturer data, shall occur no later than 90 days prior to the Trial Operation and shall include a completed copy of the following forms contained in the ISO's Generation Interconnection Procedure: (1) Plant Description/Data and (2) Generation Stability Data. It shall also include any additional data provided to the ISO for the System Security Study. Data in the initial submissions shall be the most current Plant design or expected performance data. Data submitted for stability models shall be compatible with the ISO standard models. If there is no compatible model, the Generator will work with an ISO designated consultant to develop and supply a standard model and associated data.

7.4 Data Supplementation. Prior to Commercial Operation, the Parties shall supplement their initial data submissions with any and all “as-built” Plant data or “as-tested” performance data which differs from the initial submissions or, alternatively, written confirmation that no such differences exist. Subsequent to Commercial Operation, the Generator shall provide the TSP any data changes due to equipment replacement, repair, or adjustment. The TSP shall provide the Generator any data changes due to equipment replacement, repair, or adjustment in the directly connected substation or any adjacent TSP-owned substation that may affect the GIF equipment ratings, protection or operating requirements. The Parties shall provide such data no later than 30 days after the date of the actual change in equipment characteristics. Also, the Parties shall provide to each other a copy of any additional data later required by the ISO concerning these facilities.

7.5 Data Exchange. Each Party shall furnish to the other Party real-time and forecasted data as required by ERCOT Requirements. The Parties will cooperate with one another in the analysis of disturbances to either the Plant or the TSP’s System by gathering and providing access to any information relating to any disturbance, including information from oscillography, protective relay targets, breaker operations and sequence of events records.

ARTICLE 8. PERFORMANCE OBLIGATION

8.1 Generator’s Cost Responsibility. The Generator will acquire, construct, operate, test, maintain and own the Plant and the GIF at its sole expense. In addition, the Generator may be required to make a contribution in aid of construction in the amount set out in and for the facilities described in Exhibit “C,” if any, in accordance with PUCT Rules.

8.2 TSP's Cost Responsibility. The TSP will acquire, own, operate, test, and maintain the TIF at its sole expense, subject to the provisions of Section 4.1.B, if applicable, and the contribution in aid of construction provisions of Section 8.1 of this Agreement.

8.3 Financial Security Arrangements. The TSP may require the Generator to pay a reasonable deposit or provide another means of security, to cover the costs of planning, licensing, procuring equipment and materials, and constructing the TIF. The required security arrangements shall be specified in Exhibit "E." Within five business days after the Plant achieves Commercial Operation with respect to the applicable Phase, the TSP shall return the deposit or security to the Generator relating to such Phase. However, the TSP may retain an amount to cover the incremental difference between the TSP's actual out of pocket costs associated with the choice of Section 4.1.B over Section 4.1.A, pending a final PUCT Order as contemplated in Section 4.1.B(iii). If the Plant has not achieved Commercial Operation within one year after the scheduled Commercial Operation date identified in Exhibit "B" or if the Generator terminates this Agreement in accordance with Section 2.1 and the TIF are not required, the TSP may, subject to the provisions of Section 2.2, retain as much of the deposit or security as is required to cover the costs it incurred in planning, licensing, procuring equipment and materials, and constructing the TIF. If a cash deposit is made pursuant to Exhibit "E," any repayment of such cash deposit shall include interest at a rate applicable to customer deposits as established from time to time by the PUCT or other Governmental Authority.

ARTICLE 9. INSURANCE

9.1 Each Party shall, at its own expense, maintain in force throughout the period of this Agreement and until released by the other Party the following minimum insurance coverages, with insurers authorized to do business in Texas:

A. Employers Liability and Worker's Compensation Insurance providing statutory benefits in accordance with the laws and regulations of the State of Texas. The minimum limits for the Employer's Liability insurance shall be One Million Dollars (\$1,000,000) each accident bodily injury by accident, One Million Dollars (\$1,000,000) each employee bodily injury by disease, and One Million Dollars (\$1,000,000) policy limit bodily injury by disease.

B. Commercial General Liability Insurance including premises and operations, personal injury, broad form property damage, broad form blanket contractual liability coverage (including coverage for the contractual indemnification) products and completed operations coverage, coverage for explosion, collapse and underground hazards, independent contractors coverage, coverage for pollution to the extent normally available and punitive damages to the extent normally available and a cross liability endorsement, with minimum limits of One Million Dollars (\$1,000,000) per occurrence/One Million Dollars (\$1,000,000) aggregate combined single limit for personal injury, bodily injury, including death and property damage.

C. Comprehensive Automobile Liability Insurance for coverage of owned, non-owned and hired vehicles, trailers or semi-trailers designed for travel on public roads, with a minimum combined single limit of One Million Dollars (\$1,000,000) per occurrence for bodily injury, including death, and property damage.

D. Excess Public Liability Insurance over and above the Employer's Liability, Commercial General Liability and Comprehensive Automobile Liability Insurance coverage, with a minimum combined single limit of Twenty Million Dollars (\$20,000,000) per occurrence/Twenty Million Dollars (\$20,000,000) aggregate.

E. The Commercial General Liability Insurance, Comprehensive Automobile Liability Insurance, and Excess Public Liability Insurance policies shall name the other Party, its parent, associated and affiliated companies and their respective directors, officers, agents, servants and employees ("Other Party Group") as additional insured. All policies shall contain provisions whereby the insurers waive all rights of subrogation in accordance with the provisions of this Agreement against the Other Party Group and provide thirty (30) days advance written notice to Other Party Group prior to anniversary date of cancellation or any material change in coverage or condition.

F. The Commercial General Liability Insurance, Comprehensive Automobile Liability Insurance and Excess Public Liability Insurance policies shall contain provisions that specify that the policies are primary and shall apply to such extent without consideration for other policies separately carried and shall state that each insured is provided coverage as though a separate policy had been issued to each, except the insurer's liability shall not be increased beyond the amount for which the insurer would have been liable had only one insured been covered. Each Party shall be responsible for its respective deductibles or retentions.

G. The Commercial General Liability Insurance, Comprehensive Automobile Liability Insurance and Excess Public Liability Insurance policies, if written on a Claims First Made basis, shall be maintained in full force and effect for two (2) years after

termination of this Agreement, which coverage may be in the form of tail coverage or extended reporting period coverage if agreed by the Parties.

H. The requirements contained herein as to the types and limits of all insurance to be maintained by the Parties are not intended to and shall not in any manner, limit or qualify the liabilities and obligations assumed by the Parties under this Agreement.

I. Within ten (10) days following execution of this Agreement, and as soon as practicable after the end of each fiscal year or at the renewal of the insurance policy and in any event within ninety (90) days thereafter, each Party shall provide certification of all insurance required in this Agreement, executed by each insurer or by an authorized representative of each insurer.

J. Notwithstanding the foregoing, each Party may self-insure to the extent it maintains a self-insurance program; provided that, such Party's senior secured debt is rated at investment grade, or better, by Standard & Poor's. For any period of time that a Party's senior secured debt is unrated by Standard & Poor's or is rated at less than investment grade by Standard & Poor's, such Party shall comply with the insurance requirements applicable to it under Sections 9.1.A through 9.1.I. In the event that a Party is permitted to self-insure pursuant to this Section 9.1.J, it shall not be required to comply with the insurance requirements applicable to it under Sections 9.1.A through 9.1.I.

K. The Parties agree to report to each other in writing as soon as practical all accidents or occurrences resulting in injuries to any person, including death, and any property damage arising out of this Agreement.

ARTICLE 10. MISCELLANEOUS

10.1 Governing Law and Applicable Tariffs.

A. This Agreement for all purposes shall be construed in accordance with and governed by the laws of the State of Texas, excluding conflicts of law principles that would refer to the laws of another jurisdiction. The Parties submit to the jurisdiction of the federal and state courts in the State of Texas.

B. This Agreement is subject to all valid, applicable rules, regulations and orders of, and tariffs approved by, duly constituted Governmental Authorities.

C. Each Party expressly reserves the right to seek changes in, appeal, or otherwise contest any laws, orders, rules, or regulations of a Governmental Authority.

10.2 No Other Services. This Agreement is applicable only to the interconnection of the Plant to the TSP System at the Point of Interconnection and does not obligate either Party to provide, or entitle either Party to receive, any service not expressly provided for herein. Each Party is responsible for making the arrangements necessary for it to receive any other service that it may desire from the other Party or any third party. This Agreement does not address the sale or purchase of any electric energy, transmission service or ancillary services by either Party, either before or after Commercial Operation.

10.3 Entire Agreement. This Agreement, including all Exhibits, Attachments and Schedules attached hereto, constitutes the entire agreement between the Parties with reference to the subject matter hereof, and supersedes all prior and contemporaneous understandings or agreements, oral or written, between the Parties with respect to the subject matter of this Agreement. There are no other agreements, representations, warranties, or covenants which constitute any part of the consideration for, or any condition to, either Party's compliance with its obligations under this Agreement. Notwithstanding

the other provisions of this Section, the Facilities Study Agreement, if any, is unaffected by this Agreement.

10.4 Notices. Except as otherwise provided in Exhibit “D,” any formal notice, demand or request provided for in this Agreement shall be in writing and shall be deemed properly served, given or made if delivered in person, or sent by either registered or certified mail, postage prepaid, overnight mail or fax to the address or number identified on Exhibit “D” attached to this Agreement. Either Party may change the notice information on Exhibit “D” by giving five business days written notice prior to the effective date of the change.

10.5 Force Majeure.

A. The term “Force Majeure” as used herein shall mean any cause beyond the reasonable control of the Party claiming Force Majeure, and without the fault or negligence of such Party, which materially prevents or impairs the performance of such Party’s obligations hereunder, including but not limited to, storm, flood, lightning, earthquake, fire, explosion, failure or imminent threat of failure of facilities, civil disturbance, strike or other labor disturbance, sabotage, war, national emergency, or restraint by any Governmental Authority.

B. Neither Party shall be considered to be in Default (as hereinafter defined) with respect to any obligation hereunder (including obligations under Article 4), other than the obligation to pay money when due, if prevented from fulfilling such obligation by Force Majeure. A Party unable to fulfill any obligation hereunder (other than an obligation to pay money when due) by reason of Force Majeure shall give notice and the full particulars of such Force Majeure to the other Party in writing or by telephone as soon as reasonably possible after the occurrence of the cause relied upon. Telephone notices given pursuant

to this Section shall be confirmed in writing as soon as reasonably possible and shall specifically state full particulars of the Force Majeure, the time and date when the Force Majeure occurred and when the Force Majeure is reasonably expected to cease. The Party affected shall exercise due diligence to remove such disability with reasonable dispatch, but shall not be required to accede or agree to any provision not satisfactory to it in order to settle and terminate a strike or other labor disturbance.

10.6 Default

A. The term "Default" shall mean the failure of either Party to perform any obligation in the time or manner provided in this Agreement. No Default shall exist where such failure to discharge an obligation (other than the payment of money) is the result of Force Majeure as defined in this Agreement or the result of an act or omission of the other Party. Upon a Default, the non-defaulting Party shall give written notice of such Default to the defaulting Party. Except as provided in Section 10.6.B, the defaulting Party shall have thirty (30) days from receipt of the Default notice within which to cure such Default; provided however, if such Default is not capable of cure within 30 days, the defaulting Party shall commence such cure within 30 days after notice and continuously and diligently complete such cure within 90 days from receipt of the Default notice; and, if cured within such time, the Default specified in such notice shall cease to exist.

B. If a Default is not cured as provided in this Section, or if a Default is not capable of being cured within the period provided for herein, the non-defaulting Party shall have the right to terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder and, whether or not that Party terminates this Agreement, to recover from the defaulting Party all amounts due hereunder,

plus all other damages and remedies to which it is entitled at law or in equity. The provisions of this Section will survive termination of this Agreement.

10.7 Intrastate Operation. The operation of the Plant by Generator shall not cause there to be a synchronous or an asynchronous interconnection between ERCOT and any other transmission facilities operated outside of ERCOT unless ordered by the Federal Energy Regulatory Commission under Section 210 of the Federal Power Act. The Parties recognize and agree that any such interconnection will constitute an adverse condition giving the TSP the right to immediately disconnect the TIF from the GIF, until such interconnection has been disconnected. The Generator will not be prohibited by this Section from interconnecting the Plant with facilities operated by the Comision Federal de Electricidad of Mexico, unless such interconnection would cause ERCOT utilities that are not “public utilities” under the Federal Power Act to become subject to the plenary jurisdiction of the Federal Energy Regulatory Commission.

10.8 No Third Party Beneficiaries. This Agreement is not intended to and does not create rights, remedies, or benefits of any character whatsoever in favor of any persons, corporations, associations, or entities other than the Parties, and the obligations herein assumed are solely for the use and benefit of the Parties, their successors in interest and, where permitted, their assigns.

10.9 No Waiver. The failure of a Party to this Agreement to insist, on any occasion, upon strict performance of any provision of this Agreement will not be considered a waiver of obligations, rights, or duties imposed upon the Parties. Termination or Default of this Agreement for any reason by the Generator shall not constitute a waiver of the Generator’s

legal rights to obtain an interconnection from the TSP under a new interconnection agreement.

10.10 Headings. The descriptive headings of the various articles and sections of this Agreement have been inserted for convenience of reference only and are of no significance in the interpretation or construction of this Agreement.

10.11 Multiple Counterparts. This Agreement may be executed in two or more counterparts, each of which is deemed an original but all constitute one and the same instrument.

10.12 Amendment. This Agreement may be amended only upon mutual agreement of the Parties, which amendment will not be effective until reduced to writing and executed by the Parties.

10.13 No Partnership. This Agreement shall not be interpreted or construed to create an association, joint venture, agency relationship, or partnership between the Parties or to impose any partnership obligation or liability upon either Party. Neither Party shall have any right, power or authority to enter into any agreement or undertaking for, or act on behalf of, or to act as or be an agent or representative of, or to otherwise bind, the other Party.

10.14 Further Assurances. The Parties agree to (i) furnish upon request to each other such further information, (ii) execute and deliver to each other such other documents, and (iii) do such other acts and things, all as the other Party may reasonably request for the purpose of carrying out the intent of this Agreement and the documents referred to in this Agreement. Without limiting the generality of the foregoing, the TSP shall, at the Generator's expense, when reasonably requested to do so by the Generator at any time after

the execution of this Agreement, prepare and provide such information in connection with this Agreement (including, if available, resolutions, certificates, opinions of counsel or other documents relating to the TSP's corporate authorization to enter into this Agreement and to undertake the obligations set out herein) as may be reasonably required by any potential lender to the Generator under a proposed loan agreement. The TSP will use commercially reasonable efforts to obtain any opinion of counsel reasonably requested by Generator, but the TSP shall not be in Default of any obligation under this Agreement if the TSP is unable to provide an opinion of counsel that will satisfy any potential lender to the Generator. Specifically, upon the written request of one Party, the other Party shall provide the requesting Party with a letter stating whether or not, up to the date of the letter, that Party is satisfied with the performance of the requesting Party under this Agreement.

10.15 Indemnification and Liability. The indemnification and liability provisions of the PUCT Rule 25.202(b)(2) or its successor shall govern this Agreement.

10.16 Consequential Damages. OTHER THAN THE LIQUIDATED DAMAGES HERETOFORE DESCRIBED, IN NO EVENT SHALL EITHER PARTY BE LIABLE UNDER ANY PROVISION OF THIS AGREEMENT FOR ANY LOSSES, DAMAGES, COSTS OR EXPENSES FOR ANY SPECIAL, INDIRECT, INCIDENTAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES, INCLUDING BUT NOT LIMITED TO LOSS OF PROFIT OR REVENUE, LOSS OF THE USE OF EQUIPMENT, COST OF CAPITAL, COST OF TEMPORARY EQUIPMENT OR SERVICES, WHETHER BASED IN WHOLE OR IN PART IN CONTRACT, IN TORT, INCLUDING NEGLIGENCE, STRICT LIABILITY, OR ANY OTHER THEORY OF LIABILITY; PROVIDED, HOWEVER, THAT DAMAGES FOR WHICH A PARTY MAY BE

LIABLE TO THE OTHER PARTY UNDER ANOTHER AGREEMENT WILL NOT BE CONSIDERED TO BE SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES HEREUNDER.

10.17 Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other; provided that either Party may assign this Agreement, in whole or in part, without the consent of the other Party to an affiliate of the assigning Party with an equal or greater credit rating and with the legal authority and operational ability to satisfy the obligations of the assigning Party under this Agreement; and provided further that each of Generator and TSP shall have the right to assign this Agreement, in whole or in part, without the consent of the other Party, for collateral security purposes to aid in providing financing for the Plant, or the TIF, respectively, provided that each such assigning Party will require any secured party, trustee or mortgagee to notify the other Party of any such assignment. Any financing arrangement entered into by the Generator pursuant to this Section shall be subject to the requirement that prior to or upon the exercise of the secured party's, trustee's or mortgagee's assignment rights pursuant to said arrangement, the secured creditor, the trustee or mortgagee will notify the TSP of the date and particulars of any such exercise of assignment right(s). Any attempted assignment that violates this Section is void and ineffective. Any assignment under this Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. Where required, consent to assignment will not be unreasonably withheld, conditioned or delayed.

10.18 Severability. If any provision in this Agreement is finally determined to be invalid, void or unenforceable by any court having jurisdiction, such determination shall not

invalidate, void or make unenforceable any other provision, agreement or covenant of this Agreement; provided that if the Generator (or any third-party, but only if such third-party is not acting at the direction of the TSP) seeks and obtains such a final determination with respect to any provision of Section 4.1.B, then none of the provisions of Section 4.1.B. shall thereafter have any force or effect and the Parties' rights and obligations shall be governed solely by Section 4.1.A.

10.19 Comparability. The Parties will comply with all applicable comparability and code of conduct laws, rules and regulations, as amended from time to time.

10.20 Invoicing and Payment. Unless the Parties otherwise agree (in a manner permitted by applicable PUCT Rules and as specified in writing in an Exhibit "E" attached hereto), invoicing and payment rights and obligations under this Agreement shall be governed by PUCT Rules or applicable Governmental Authority. Invoices shall be rendered to the paying Party at the address specified on, and payments shall be made in accordance with the requirements of, Exhibit "D."

10.21 Confidentiality.

A. Subject to the exception in Section 10.21.B, any information that a Party claims is competitively sensitive, commercial or financial information under this Agreement ("Confidential Information") shall not be disclosed by the other Party to any person not employed or retained by the other Party, except to the extent disclosure is (i) required by law; (ii) reasonably deemed by the disclosing Party to be required to be disclosed in connection with a dispute between or among the Parties, or the defense of litigation or dispute; (iii) otherwise permitted by consent of the other Party, such consent not to be unreasonably withheld; or (iv) necessary to fulfill its obligations under this

Agreement or as a transmission service provider or a Control Area operator including disclosing the Confidential Information to the ISO. The Party asserting confidentiality shall notify the other Party in writing of the information it claims is confidential. Prior to any disclosures of the other Party's Confidential Information under this subsection, or if any third party or Governmental Authority makes any request or demand for any of the information described in this subsection, to the extent legal, the disclosing Party agrees to promptly notify the other Party in writing and agrees to assert confidentiality and cooperate with the other Party in seeking to protect the Confidential Information from public disclosure by confidentiality agreement, protective order or other reasonable measures.

B. This provision shall not apply to any information that was or is hereafter in the public domain (except as a result of a breach of this provision).

10.22 Order of Precedence. In the event any provision of this Agreement conflicts with a provision in the Exhibits hereto, the provision in such Exhibits shall control, so long as such provision does not violate any law, rule, ordinance, order, or regulation of any Governmental Authority or Good Utility Practice.

**Exhibit “B”
Time Schedule**

Interconnection Option chosen by Generator (check one):

Section 4.1.A. or Section 4.1.B

Notwithstanding anything to the contrary in the Interconnection Agreement, as may be amended from time to time, the Parties agree as follows:

1. Interconnection Option. The interconnection option chosen by Generator is Section 4.1.A of the Interconnection Agreement. None of the provisions of Section 4.1.B of the Interconnection Agreement shall have any force or effect and the Parties’ respective rights and obligations shall be governed solely by Section 4.1.A thereof.
2. Acceptable Credit Support. Security provided by Generator shall be in the form of one of the following (each “Acceptable Credit Support”).
 - a. “Cash” means cash denominated in United States dollars delivered by wire transfer to an account designated by Transmission Service Provider.
 - b. “Acceptable Guaranty” means a guaranty issued by an Acceptable Guarantor in a form reasonably acceptable to Transmission Service Provider. “Acceptable Guarantor” means a Person (other than an individual or a financial institution) with a corporate family rating at all times of at least A1 by Moody’s Investors Service, Inc., or any successor to its ratings business (“Moody’s”) with a stable outlook and with a corporate credit rating of at least A+ by Standard & Poor’s Ratings Group, a division of McGraw-Hill, Inc., or any successor to its ratings business (“S&P”) with a stable outlook.
 - c. “Letter of Credit” means a letter of credit as set forth in Exhibit E (together with any replacement letter of credit) issued or confirmed by an Acceptable Bank. Acceptable Bank means a commercial bank that (x) has a long-term credit rating of at least A2 by Moody’s and A by S&P, (y) has a combined capital and surplus of at least \$1,000,000,000, and (z) is able to honor demands for payment at its offices in New York, NY or such other location as may be acceptable to TSP in its sole discretion.
 - i. The Letter of Credit shall initially be issued in an amount of USD \$62,500, which amount may be increased in accordance with the provisions of Section 3 below.
 - ii. The full amount of the Letter of Credit shall be drawable (1) upon any failure to renew (so long as the issuing bank continues to qualify as an Acceptable Bank) such Letter of Credit or replace such Letter of Credit with another letter of credit in the amount required hereby and issued by Acceptable Bank at least twenty (20) days prior to its renewal or expiration date, as the case may be, or (2) if the issuing bank no longer constitutes an Acceptable Bank and Generator has failed to replace such Letter of Credit with a letter of credit in the amount required hereby and issued by an Acceptable Bank within twenty (20) days after Generator becomes aware of such issuer ceasing to be an Acceptable Bank. Any funds drawn pursuant to the preceding sentence shall be held by TSP as security and applied in accordance with this Exhibit B and the Interconnection Agreement.

- d. At any time when Generator has provided security in one form of Acceptable Credit Support, Generator may replace that form of security with another form of Acceptable Credit Support. If, at any time, there is no Acceptable Credit Support, such failure shall constitute a Default under the Interconnection Agreement, and without limitation, TSP shall be relieved of its obligations hereunder and may exercise any and all remedies available hereunder and under applicable law.
3. Adjustments to Letter of Credit Amount. Generator acknowledges that the amount required for the Letter of Credit is a good faith estimate based upon TSP's prior experience and general industry knowledge, and Generator further acknowledges such amount may need to increase as TSP performs the services below. Upon notice from TSP that the security provided will not be sufficient for the completion of the TIF, TSP shall be entitled to cease all work on the TIF until Generator has provided additional security that, in TSP's reasonable opinion, is sufficient to allow for the completion of the TIF.
 4. Scheduled Date(s):
 - a. In - Service Date(s): May 7, 2021
 - b. Scheduled Trial Operation Date: May 28, 2021
 - c. Scheduled Commercial Operation Date: June 30, 2021
 5. Covered Costs
 - a. Generator agrees to reimburse TSP for all Covered Costs (defined below) upon any of the following events: (i) the Generator elects to terminate the Interconnection Agreement pursuant to Section 2.1, or (ii) the Interconnection Agreement is otherwise terminated. "Covered Costs" include all costs and expenses incurred, or committed to be incurred by or on behalf of TSP in connection with its efforts to complete the TIF by the In-Service Date (defined below), including (but not limited to) costs associated related to planning, engineering, designing, acquiring rights-of-way, licensing, procuring equipment and materials (including any cancellation or termination fees), legal fees, financing fees, and other ancillary fees, whether such costs and expenses are internal costs of allocated personnel and resources, or external costs (contractors, third-party consultants, outside counsel, etc.), or both.
 - b. TSP has the right to demand payment under the Letter of Credit, or other security provided hereunder, for any amount payable under the Interconnection Agreement (including this Exhibit B). TSP shall have no obligation to seek payment from Generator for the Covered Costs prior to demanding payment under the Letter of Credit, or any other security provided to TSP by or on behalf of Generator.
 - c. For the avoidance of doubt, (i) Section 10.5 (Force Majeure) of the Interconnection Agreement shall not apply to Generator's payment obligations with respect to the Covered Costs, or other payment obligations under the Interconnection Agreement; and (ii) Section 10.16 (Consequential Damages) of the Interconnection Agreement, shall not apply to TSP's right to collect, or Generator's obligation to reimburse Covered Costs.

Due to the nature of the subject of this Agreement, the Parties may mutually agree to change the date and time of this Exhibit B, including when actions and/or security is required.

**Exhibit “C”
Interconnection Details**

- 1) Name: Ignacio Grid, LLC
- 2) Point of Interconnection Location: The Point of Interconnection (“POI”) shall be located on the TSP’s new dead-end structure 6/10, immediately outside of its 138kV Railroad (Bus #8824) substation in Hidalgo County. Both the Madero Grid Storage (21INR0244) and Ignacio Grid Storage (21INR0522) projects, each rated at 100.64 MW (i.e. combined capacity of 201.28 MW) will share the same POI.

Conductor POI: Generator shall connect its conductor insulator assemblies to the connection points provided on Generator side of Structure 6/10. Generator shall further provide and install all 138kV jumpers to connect to TSP’s 138kV conductor on the TSP side of Structure 6/10. The Conductor POI shall be where Generator’s jumpers physically attach to TSP’s conductor.

Fiber/OPGW POI: TSP shall provide a weather-tight splice can at the base of Structure 6/10. Generator shall provide and install its OPGW/fiber to the splice box and shall terminate its fiber in the open position provided.

- 3) Delivery Voltage: 138kV
- 4) Number and Size of Generating Units: the 100.64 MW Madero Grid Project is composed of 32 PE HEM FP3510M3 inverters rated at 3.145 MW. The project has 4 collection system feeders and is represented by one (1) aggregated inverter/generator and an aggregated collection system. The Parties will amend this Exhibit “C” as necessary to reflect any changes Generator makes to the number and size of generating units.
- 5) Type of Generating Unit(s): A battery energy storage system consisting of bi-directional PE HEM FP3510M3 inverters. The Parties will amend this Exhibit “C” as necessary to reflect any changes Generator makes to the manufacturer, model, or type of generating units.
- 6) Metering and Telemetry Equipment:
 - A) TSP shall, in accordance with ERCOT Requirements and Good Utility Practice, install, own, & operate, inspect, test, calibrate, and maintain 138kV metering accuracy potential and current transformers and associated metering and telemetry equipment (including remote terminal units “RTU”) located in the TIF.
 - B) Generator’s interconnection with TSP facilities shall not interfere with TSP’s metering and telemetry operations.
 - C) Metering to include 138kV rated meters, with dual secondary windings for relaying and revenue metering.

- D) Facilities shall meet all applicable TSP requirements in addition to ERCOT Requirements. If there is a conflict between TSP requirements below and ERCOT Requirements, the ERCOT Requirements shall prevail.
 - E) Generator has elected to utilize local distribution utility for auxiliary power. Generator shall only connect loads complying with ERCOT WSL (Wholesale Storage Load) requirements to the TIF.
 - F) In addition to the primary settlement EPS meters located on the TSP's side of the POI, Sharyland will also own and maintain one (1) WSL meter point on the low side (34.5kV) of each BESS transformer on the Generator's side of the POI. TSP shall provide, and Generator shall install, CT/PT sets for use with the WSL meter points. Generator will provide a minimum of four (4) fiber strands in its OPGW running to TSP's Railroad Station for communications and will provide necessary easements for TSP to access the meters and metering cabinets. TSP shall furnish and install a lockable, weather-tight enclosure to be mounted on Generator's first transmission line structure outside of Generator's substation fence line. Generator shall furnish and install redundant AC and DC power supplies to a Generator installed junction box located at this same structure.
- 7) Generator Interconnection Facilities: GIF include the Substations and all facilities within them, except for those facilities identified as being owned by TSP in Section 6 above and Section 8 below.

Generator Transmission Line

Generator will be responsible for the construction and ownership of the Generator's transmission line, a 138 kV, single circuit, transmission line from the Point of Interconnection to the Generator's substation. TSP will specify point loads for all Generator conductor and static attachments to TSP's deadend structure located within Sharyland's existing 138kV Railroad Substation. TSP will also supply phase and static spacing and the actual line angle.

Generator will be responsible for the installation of multi-fiber fiber optic cable, with 1300/1550nm single-mode fibers, 48 fibers minimum (24 fibers per tube). TSP will install and own a fiber optic splice box to be located at the base of TSP's deadend structure. Generator will route its fiber optic cable to TSP's splice box and will be responsible for splicing of Generator's fibers to TSP's fibers. Generator will also provide OPGW fiber on the Generators transmission line to provide communication between the TSP's facilities and the WSL meters to be located on the Generator's side of the POI.

Generator Switchyard Facilities

(1 ea.) Circuit breaker, 138 kV

(1 lot) Switches, air break, 138 kV, gang operated, 3 phase, with provisions for TSP pad lock

(1 lot) CCVT or PT, 138 kV, dual secondary windings as required for Generator's metering and relaying

(1 lot) Surge Arrester, 138 kV

- (1 ea.) Supervisory equipment, SCADA RTU
- (1 lot) Control / Relaying Panel
- (1 lot) Fault Recording Equipment
- (1 lot) Metering, Telemetry, and Communications Equipment
- (1 ea.) Phasor Measurement Unit (PMU)
- (1 ea.) Multi-fiber fiber optic cable, with 1300/1550nm single-mode fibers, 48 fibers minimum (24 fibers per tube), to interface with the TSP's transmission line multi-fiber fiber optic cable to be used for primary and redundant line relaying.
- (1 lot) Associated structures, buswork, conductor, connectors, grounding, conduit, control cable, foundation work, perimeter fencing, grading/dirt work and any appurtenances necessary for construction and operation of the GIF Page 31 of 43
- (1 lot) Capacitors/Reactors, as required

The above list is not intended to be a complete list of all facilities that are part of the GIF.

8) Transmission Service Provider Interconnection Facilities: The TSP Interconnection Facilities shall, at a minimum, include the following facilities:

A) Interconnecting Bay

- i) 138kV, 3000A, 40kA Circuit Breaker
- ii) 138kV, 3000A, Gang Operated, 3 ϕ Air Break Switches
- iii) 138kV, 3000A, Gang Operated, 3 ϕ Motorized Air Break Switches
- iv) 138kV Metering CT
- v) 138kV Metering PT
- vi) 138kV, 84kV MCOV Surge Arrester
- vii) Dual EPS Meters, 138kV
- viii) Station Post Insulators
- ix) Galvanized Steel Structures, Equipment Foundations and Associated Bus Work, Conductor, Connectors, Grounding, etc.
- x) Dead-End structure within Sharyland's existing Railroad Substation proper for terminating GIF

B) Relaying

- i) Circuit Breaker Control Panel
- ii) Motor Operated Disconnect Switch Control Panel
- iii) Circuit Breaker Failure Protection Panel
- iv) Line Current Differential & Distance Protection Panel
- v) Equipment housing facility with controlled and secure environment

C) WSL Metering Points

- i) One (1) weather-tight, lockable cabinet (the "TSP Meter Cabinet") installed on Generator's first transmission structure outside of its Generator Switchyard Facility. The TSP Meter Cabinet shall house (at minimum) (a) dual EPS Meters (primary and

backup) for each WSL metering point and (b) all TSP-owned communications equipment.

- ii) CCVT or CT/PT sets shall be furnished to Generator and installed on the 34.5kV buss behind each Generator owned 138kV/34.5kV transformer. Generator to install.
- iii) Generator shall furnish and install all conductor, conduit, junction boxes and other material and equipment to provide redundant AC & DC power supplies to the TSP Meter Cabinet. TSP shall connect the equipment in the TSP Meter Cabinet to the Generator installed junction box.

D) All other TSP Interconnecting Facility requirements shall be finalized at a later date, upon completing design requirements and coordination efforts with Generator.

The above lists are not intended to be complete lists of all facilities that are part of the TIF.

9) Communications Facilities:

- A) TSP will own and install the necessary communication facilities for (1) provision of SCADA communications to TSP and Generator, (2) transmission level (138kV) EPS meter access by ERCOT and (3) two (2) medium voltage level (34.5kV) EPS meters for Wholesale Storage Load metering access by ERCOT .
- B) Generator will own and install the necessary communication facilities for provision of SCADA communications and telemetry to Generator energy management system consistent with ERCOT Requirements.
- C) All communication facilities shall meet the TSP's requirements in addition to ERCOT Requirements. If there is a conflict between the TSP requirements and ERCOT Requirements, the ERCOT Requirements shall prevail.

10) System Protection Equipment:

- A) All other TSP System Protection Equipment requirements shall be finalized at a later date, upon completing design requirements and coordination efforts with Generator.
- B) Protection of each Party's system shall meet the TSP's requirements in addition to ERCOT Requirements. If there is a conflict between the TSP requirements and ERCOT Requirements, the ERCOT Requirements shall prevail.

11) Inputs to Telemetry Equipment:

- A) A generation-specific RTU is required at the Plant or GIF for TSP's generation specific SCADA. A specific RTU points list will be developed by TSP as a part of each generation project based upon the project's electrical configuration. For such purpose, Generator shall be responsible for providing TSP with metering and relaying one-line diagrams of the generation and Substation facilities. Generator shall provide TSP with a station communications drawing which is to include RTU point sources (IEDs and contacts supplying required data), interface devices, and connections to the RTU.

B) All other Inputs to Telemetry Equipment requirements shall be finalized at a later date, upon completing design requirements and coordination efforts with Generator.

12) Supplemental Terms and Conditions, if any, attached:

All other Supplemental Terms and Conditions shall be finalized at a later date, upon completing design requirements and coordination efforts with Generator

13) Special Operating Conditions, if any, attached:

To be defined and coordinated with the Generator at a later date.

DATE: December 9, 2019

Exhibit "D"

Exhibit “E”
Security Arrangement Details

As of the Effective Date, Generator shall provide total surety to TSP in the amount of USD \$62,500.00 (sixty two thousand five hundred dollars). Generator has elected to provide total surety as Cash. In the event such Cash is replaced with a Letter of Credit, the form of the Letter of Credit shall be used below.

For the avoidance of doubt, in the event that the Standard Generation Interconnection Agreement for the Madero Project is terminated or the Madero Project is otherwise not completed for any reason and, as a result, the security amount (if any) previously provided by Generator will not be sufficient for the completion of the TIF, TSP shall be entitled to cease all work on the TIF until Generator has provided additional security that, in TSP’s reasonable opinion, is sufficient to allow for the completion of the TIF.

FORM OF IRREVOCABLE STANDBY LETTER OF CREDIT

DATE OF ISSUANCE: _____

Re: Credit No. _____

Expiration Date: [____], 2021

Amount: \$62,500 USD

WE HEREBY ISSUE OUR IRREVOCABLE STANDBY LETTER OF CREDIT NO. XXXXXXXX IN FAVOR OF SHARYLAND UTILITIES, L.L.C. (“SHARYLAND”) BY ORDER OF XXXX (THE “ACCOUNT PARTY”) FOR AN AGGREGATE SUM NOT TO EXCEED USDXXXXXXXXX EFFECTIVE IMMEDIATELY AND EXPIRING AT OUR COUNTERS LOCATED AT [ADDRESS] ATTN: SDC UNIT WITH OUR CLOSE OF BUSINESS ON [____], 2021.

THIS LETTER OF CREDIT IS AVAILABLE BY YOUR DRAFT(S) AT SIGHT DRAWN ON US MENTIONING OUR LETTER OF CREDIT NUMBER INDICATED ABOVE ACCOMPANIED BY:

(1) an original or photocopy of this Letter of Credit and any effective amendments to this Letter of Credit, and (2) Sharyland’s demand draft for payment, marked “Drawn under [Issuing Bank] Irrevocable Standby Letter of Credit No. _____,” indicating the amount of such demand (which amount, together with the amounts of all previous draws presented hereunder, however, shall not exceed the face amount of this Letter of Credit) and accompanied by a statement signed by an officer or other authorized representative of Sharyland with the following statement:

“Pursuant to the ERCOT Standard Interconnection Agreement between Sharyland and Ignacio Grid, LLC, the undersigned beneficiary is entitled to demand payment under this Letter of Credit. The undersigned does hereby demand payment under this Letter of Credit No. ____ of \$_____ USD.”

Documents drawn under and in compliance with the terms of this Letter of Credit shall be duly honored upon presentation as specified. Partial and multiple drawings are permitted hereunder. The amounts that may be drawn under this Letter of Credit shall be automatically reduced by the amount of any payments made through the Issuing Bank referencing this Letter of Credit No. ____.

This Letter of Credit shall be governed by the International Standby Practices (ISP98), International Chamber of Commerce Publication No. 590, or revision currently in effect (the “ISP”), except to the extent that the terms hereof are inconsistent with the provisions of the ISP. As to matters not governed by the ISP, this Letter of Credit shall be governed by the laws of the State of New York, including the Uniform Commercial Code.

Any legal action or proceeding with respect to this Letter of Credit shall be brought in the courts of the State of New York in the County of New York or the United States of America in the Southern District of New York. Sharyland (by its acceptance hereof) and the Issuing Bank irrevocably submit to the nonexclusive jurisdiction of such courts solely for the purposes of this Letter of Credit. Sharyland (by its acceptance hereof) and the Issuing Bank hereby waive to the fullest extent permitted by law any objection either such party may now or hereafter have to the laying of venue in any such action or proceeding in any such court.

The Issuing Bank hereby waives, to the fullest extent permitted by applicable law, any and all rights or remedies of subrogation that it might otherwise have with respect to the beneficiary arising out of this Letter of Credit, whether to claims held by the beneficiary or against the beneficiary, including any such rights or remedies resulting from the application, if any, of Section 5-117 of the New York Uniform Commercial Code, it being the Issuing Bank's express agreement that in the event of a draw under this Letter of Credit its only recourse shall be to seek reimbursement from the Account Party.

This Letter of Credit sets forth in full the terms of the Issuing Bank's undertaking, and this undertaking shall not in any way be amplified or extended by reference to any other document, instrument or agreement.

All commissions, expenses and charges incurred in connection with this Letter of Credit are for the account of the Account Party.

IT IS A CONDITION OF THIS STANDBY LETTER OF CREDIT THAT IT SHALL BE DEEMED AUTOMATICALLY EXTENDED, WITHOUT AMENDMENT, FOR ONE YEAR FROM THE PRESENT OR ANY FUTURE EXPIRATION DATE HEREOF, UNLESS WE NOTIFY YOU IN WRITING VIA COURIER SERVICE NO LATER THAN 90 DAYS PRIOR TO THE THEN EXPIRATION DATE THAT WE ELECT NOT TO CONSIDER THIS LETTER OF CREDIT EXTENDED FOR ANY SUCH ADDITIONAL PERIOD; PROVIDED THAT IN NO EVENT MAY THIS LETTER OF CREDIT BE EXTENDED BEYOND [DATE].

THE ISSUING BANK WILL NOT MAKE ANY PAYMENT UNDER THIS STANDBY LETTER OF CREDIT TO, AND THIS LETTER OF CREDIT MAY NOT BE TRANSFERRED TO, ANY PERSON WHO IS LISTED ON A UNITED NATIONS, EUROPEAN UNION OR UNITED STATES OF AMERICA SANCTIONS LIST, NOR TO ANY PERSON WITH WHOM THE ISSUING BANK IS PROHIBITED FROM ENGAGING IN TRANSACTIONS UNDER APPLICABLE UNITED STATES FEDERAL OR STATE ANTI-BOYCOTT, ANTI-TERRORISM OR ANTI-MONEY LAUNDERING LAWS.
