PUBLIC UTILITY COMMISSION

OF TEXAS

AFFIDAVIT OF NOTICE

BEFORE ME, the undersigned authority personally appeared Stephen Geiger, known to me to be the person whose name is subscribed below, who after being by me duly sworn deposed and stated as follows:

1. My name is Stephen Geiger. My business address is 2000 E I-30, Greenville TX 75403. I am over 18 years of age and competent to make this affidavit. I have personal knowledge of the facts contained herein and they are true and correct.
2. I am currently employed as Engineering Manager, Farmers Electric Cooperative, Inc. ("Farmers"), and I am authorized to make this Affidavit on behalf of Farmers.
3. Pursuant to PUC Substantive Rule §25.83(c)(3), at least 45 days prior to the start of construction of facilities, Farmers is required to provide direct notice by first-class mail to all utilities whose certificated service area is crossed by the facilities unless the facilities are being constructed to serve a utility that is singly certificated to the area where the facilities are to be constructed. Notice is required to all landowners whose property is crossed by projects that do not require a CCN under §25.101(c)(5), except that notice is not required to landowners that have provided written consent. For projects that require new or additional rights of way, notice is required to all landowners with a habitable structure within 300 feet of the centerline of a transmission project of 230 kV or less, or within 500 feet of the centerline of a transmission project greater than 230 kV on the current county tax rolls. In addition, direct mail notice is required to owners of parks and recreation areas within 1,000 feet, and airports within 10,000 feet, of the centerline of the proposed project.
4. On March 30, 2009, I mailed or caused to be mailed via Certified First Class Mail, written notice of a CCN exempt transmission line project, including a description of the proposed project and vicinity map to each landowner whose property is crossed by the project, which includes the landowners indicated on the list attached hereto as **Exhibit A**. A true and correct copy of the notice mailed is attached hereto as **Exhibit B**.
5. There are no utilities whose certificated service area is crossed by the proposed project.
6. There are no owners of parks and recreation areas within 1,000 feet of the centerline of the proposed project.

RECEIVED
2009 MAY 15 PM 6:53
PUBLIC UTILITY COMMISSION
FILING CLERK

7. There are no airports within 10,000 feet of the centerline of the proposed project.

Further the deponent sayeth not.

Stephen Geiger, Engineering Manager

STATE OF TEXAS

COUNTY OF Hunt

This Affidavit of Notice was sworn to and subscribed before me on this the 14th day of May, 2009, by Stephen Geiger.

Notary Public, State of Texas

My commission expires: 4-16-2012

RE: Tawakoni-Sunny Point 69 kV to 138 kV Transmission Line Project
Counties of Hunt, Hopkins & Rains

FARMERS ELECTRIC COOPERATIVE, INC. is a full service authorized electric utility providing reliable electric service to the areas of Dallas, Collin, Rockwall, Hunt, Kaufman, Rains, Hopkins, Delta, Franklin, Fannin, Van Zandt and Wood counties in Texas.

Present electric facilities include a 69,000 volt (69kV) transmission line, approximately 17.6 miles in length, providing power to the Cooperative's Sunny Point and Kiowa Substations and a Texas New Mexico Power Company substation. Sections of this transmission line were constructed in the early 60's and 70's and require maintenance and replacement. Farmers Electric Cooperative, Inc. has rebuilt 5.1 miles of this line designated as KIOWA-TNMPC 69F138kV TRANSMISSION LINE and has elected to rebuild the remaining 12.5 miles.

The current project is designated as **TAWAKONI – SUNNY POINT 69F138kV TRANSMISSION LINE** and consists of approximately 12.5 miles of 69kV transmission line construction (future 138kV) and removal.

The existing 69kV line is a radial line which will remain energized during the installation of new poles due to no alternate sources of power. **Scheduled service interruptions of the Cooperative's Sunny Point and Kiowa Substations and Texas New Mexico Power Company substation will be required for a limited duration of time.** This will de-energize the transmission line for construction of a temporary line and new line taps at Tawakoni Switching Station, construction of new line taps into Sunny Point Substation and completion of connections to energize the new line.

The new construction will utilize a typical single 85' direct embedded galvanized steel tangent pole designated as TP-138C. The TP-138C structure will consist of a shield wire arm supporting a 3/8" H.S.S. shield wire and three line post insulators braced by polymer insulators each supporting a 795 kCM ACSR 26/7 (Drake) phase conductor, in a vertical configuration.

The new pole spans will change from the existing pole locations and the new poles will be located approximately 12.8 feet off the existing transmission line centerline. The new pole construction is the same as used on the KIOWA-TNMPC 69F138kV TRANSMISSION LINE. The existing 69kV typical tangent structure is a single 55' wood pole with a shield wire and wood cross arms supporting the 4/0 ACSR phase conductors with suspension insulators which will be removed after completion of the new construction.

Page 2 of 2

Crews will need to move along the right-of-way during the construction process. Any fence that crosses the right-of-way will be required to have a gate. Typical gates will be 16' with steel H-brace supports. Gate installation will start in April.

A vicinity map is included for your reference and indicates the **Project** in red. The **Project** begins at the existing Tawakoni Switching Station site, just south of Cumby, Texas near FM 275. It continues 2.2 miles southwest to the Sunny Point Switching Station near the Hopkins and Hunt County line. The **Project** continues 10.3 miles southwest and south to the Hunt and Rains County line near CR 3227 and connects to the existing KIOWA-TNMPC 69F138kV TRANSMISSION LINE project approximately 2 miles southeast of Lone Oak, Texas.

Questions concerning the project may be directed to Mr. Stephen Geiger, Manager of Engineering for Farmers Electric Cooperative, telephone 903- 455-1715.

Your patience and consideration will be greatly appreciated during the construction. We thank you.

Farmers Electric Cooperative, Inc.
