RE: Emergency Operations Plan Revisions

Dear Filing Clerk:

Please find enclosed the original and three (3) copies of the pages with minor revisions to the Emergency Operations Plan (EOP) for North Texas Telephone Co., relating to the reliability of operation of telecommunications providers, certifying compliance with the Public Utility Commission of Texas as required by Substantive Rule §26.51. These revisions are a result of the Annual Drill requirement. The revisions include: Outside Plant and Construction Equipment changes and Supplier List changes. The main item realized by most employees was the reality of an emergency event happening within our service area. Items of concern were flooding of Central Offices, mass power outages, vast amounts of destruction damage due to a tornado, wild fires destroying everything within its path, and our headquarters building being destroyed. The relocation of the business office and all affected employees was discussed. A brief inventory of emergency items necessary to maintain operations during an emergency event was performed, and items like generators, fuel supplies, medical and first aid supplies, portable lighting, PC's, laptops, and other electronic devices, extension cords, office supplies, toiletry items, bottled water, and other service priorities were reviewed. Another important issue is our Pandemic Plan and the importance of understanding procedures if such a catastrophic event should ever happen. Overall, the drill was considered a success and served as a reminder of the things we should not take for granted. Please accept these documents to be filed with the Commission as a result of our annual drill requirement for year 2019.

If you have any questions or need additional information, please contact me at the number listed.

Sincerely,

Brandi Iley
Regulatory Compliance & Billing Supervisor

Encl.
