I am NOT requesting to intervene in this proceeding. As a PROTESTOR, I understand the following:

- ☐ I am NOT a party to this case;
- ☐ My comments are not considered evidence in this case; and
- ☐ I have no further obligation to participate in the proceeding.

Please check one of the following:

- ☒ I own property with a habitable structure located near one or more of the utility's proposed routes for a transmission line.
- ☐ One or more of the utility's proposed routes would cross my property.

☒ Other. Please describe and provide comments. You may attach a separate page, if necessary. _____
In preferred route GN11, there is a section or portion between Link C 13 and C16, which crosses over and near habitable structures and property frequently occupied by families with small children. I specifically refer to the portion that crosses over the railroad tracks and Llano River including Lot 46 of Indian Bend #2. Lots 40 through 47 on the Llano county tax roll was purchased by a family of brothers and sisters as a recreational property. Portions of all of 3 generations of this family routinely gather at this property for recreation and family functions. The children, grandchildren, and great grandchildren recreate up and down the length of these lots. The power line easement states that "habitable structure is not to be located 300 to 500 feet of this line depending on size of line". Lot 46, with habitable structure, lies directly below the preferred GN11 line. Also this will directly effect the area west of Lot 46 as well. Therefore this **would not be** the best route or a good choice.

COMMENTS

I am all for the expansion of the electric grid. However the LCRA already has an existing easement to use for this expansion. The suggested route is the longest and most expensive of all the routes. In this recession, why would the LCRA waste customer's money on the most expensive route? The existing and less expensive route should be used. This would also save the condemnation of Texas Hill Country Land which nobody wants.

From Tully Currie

Re: West Wind Kendall to Gillespie County-Newton Project transmission line A-4 route

Dear Sirs:

I could not find an existing file number for my comments on the A-4 proposed LCRA transmission line. Could you register my complaints and send me a file number?

These are my concerns for the proposed LCRA transmission line *Kendall to Gillespie County A-4 alternate route* Westwind from. **The route does not utilize or parallel existing compatible right-of-way property lines. There are other existing right-of-ways that could be used that already have transmission lines. This A-4 route is longer and would cost more money to construct. The A-4 route also crosses my subdivision and would effect 32 property owners. Other routes would be more remote and effect fewer people.**

I appreciate your work and time.
