**Subject:** PUC docket #38140 Link N2

Dear Commissioner:

I am writing to protest the Riley-Krum West 345 kV transmission line you will be voting on October 29<sup>th</sup>, 2010. The "Settlement Route" including Link N2 runs across my property in Silver Lakes Ranch, a 2300 acre residential development with 528 property owners. We feel our subdivision was not given consideration by the PUC hearings docket number 38140. All of our Property Owners have a common interest in land that N2 crosses and only a handful of owners were notified in accordance with SOAH and PUC. We estimate close to 450 Property Owners are just finding out about this transmission line. We feel our rights have been ignored and we demand consideration in this process.

We purchases properties in Silver Lakes Ranch because this place is beautiful. Lakes, hills, and lots of trees are very enjoyable. Standing on the hill top, looking over at the lake, you will forget any bothersome issues in the daily life. Please don't take away this important feature from us. A transmission line in your proposal will certainly destroy the beauty in our community.

Sincerely,

Jack Chen
