Request No. 1-1

Do you own property located between Central C substation and the Sam Switch substation which will be crossed or touched by any line segment in the Lone Star 345 kV transmission line project? [If your answer to this Request No. 1-1 is no, then none of the remaining questions pertain to you and you should not answer any of them.]

Answer: Yes

Request No. 1-2

If your answer is yes to RFI No. 1-1 above, please identify each line segment which crosses or touches your property.

Answer: Central C to Sam Switch segment, link RR

Request No. 1-3

For each line segment which you identified in Request No. 1- 2 above, please provide the following information:

- (1) What is the approximate length across your property of each such line segment;
- (2) Does this line segment parallel any compatible right of way across your property and, if so, what type of compatible right of way and for what distance does it so parallel;
- (3) Is this line segment adjacent or contiguous to any apparent boundary line and, if so, for what distance is it adjacent or contiguous to such apparent boundary line;
- (4) Does this line segment wholly or partially fail to parallel or follow compatible rights of way or apparent boundary lines across your property and, if such is the case, what is the length of that part of this line segment crossing or touching your property that neither parallels nor follows compatible rights of way or apparent boundary lines;
- (5) If your property is crossed or touched by more than one line segment, please explain which line segment you believe to be the most damaging line segment to your property along with the reasons for your answer.

Answer:

- 1) About 1.75 miles.
- 2) No
- 3) About .8 miles are near a boundary.
- 4) Partially. About 1 mile is more or less parallel but not adjacent to a boundary.
- 5) NA
