Public Utility Commission of Texas (PUC) Docket No. 38230

Dear Filing Clerk:

Our agency is in receipt of a letter to Dianna Noble explaining the above Public Utility docket. There are two roadway projects under our Dallas District office's jurisdiction that intersect some of the possible routes:

- FM 709 from the Hill/Navarro county line to Richland Creek is planned to have a seal coat placement in fall of 2015. This is very minor preventive maintenance work and will not alter the current roadway width, alignment or vertical profile. Utility line alternative FFF crosses FM 709 in two locations.
- FM 55 from SH 31 southward to FM 709 will have bridge and approach guardrail updates, safety treatment on roadside objects, and addition of 3' wide shoulders on 2.5 miles south SH 31. This work should begin in fall of 2010. Again, this is very minor maintenance and improvement work which will not alter the roadway alignment or vertical profile. Utility line alternatives EEE and FFF cross FM 55.

You may contact John Debner, P.E. at the Dallas District office phone (214)320-6282 or e-mail [jdebner@dot.state.tx.us](mailto:jdebner@dot.state.tx.us) should the need arise.

Sincerely,

Stan Hall, P.E.  
District Advance Project Development Engineer
