RE: Willow Creek-Hicks 345 KV Transmission Line Project
Docket # 38324, Segment EEE, Track # 159

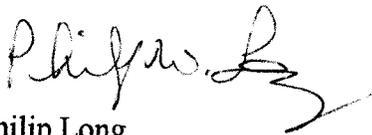

To Whom It May Concern:

The reason for this letter is to express our deep concern of this project. Our address is 14217 Edgemon Way Newark, TX 76071. We bought our acre lot and built our home about 4 years ago. We chose this lot and community because of the simplicity and the country views. We looked for 2 years before we decided on this neighborhood; Newark Ranch. When we found this lot, we loved everything about it... it was just perfect for us. It's the reason why we have worked so hard to build our business so that we could afford to live in a community like this one.

A few days ago our neighborhood was notified that there was a "settlement" at a hearing in Austin between ONCOR and the other parties involved. (land owners in our nearby area) The settlement was on our route. We were all shocked to hear of this news. . It's very hard to imagine these towers or poles so close to our homes and our property. Not only will it take away our views, decrease our home value, it also has potential health risks.

Our request today is for you to strongly consider not voting on this route for this project. We understand the importance of the renewable energy into the Texas market, but does it have to be in our backyard? **PLEASE, PLEASE, PLEASE** consider our request to you. We want to raise our family here, but we won't be able to if this route is chosen. Thank you for taking the time to read our letter to you. Please feel free to call us anytime to discuss this further.

Sincerely,

Philip Long
