CenterPoint Energy Houston Electric Comments Related to Preliminary Summary of Cost of Service Issues As of Septemer 6 2010

	*	CALIFICATION AND A STATE OF THE ABOVE AND ADDRESS OF THE ABOVE	
(1)	Accumulated Depreciation	CNP has recalced its accumulated depreciation using the rates in its new depreciation study. Although it is proper to adjust depreciation expense on a going	
	•	forward basis, it is not proper to restate accumulated depreciation since it was	
		established using previously authorized depreciation rates.	(1,623)
(2)	Accumulated Depreciation	CNP has left the balance in its Retirement Work in Process account in its	
•	·	accumulated depreciation. Like Contruction Work in Process, this should be	(470)
		removed.	(178)
(3)	Cash Working Capital	In determining the lead days for annual incentives, Mr. Joyce did not use all the	
		dollars paid-out in March. He omitted \$9.4 million. The dollars associated with LTI	(775)
		are removed from the case as all goals are shareholder-related goals.	(775)
		Other O&M expenses were squeezed by taking total O&M and subtracting payroll	
		and benefits. Other O&M was decreased when the omitted incentives were pulled out.	
		CWC needs to be calculated a lower-level than done by Mr. Joyce.	
		Expenses and Return were adjusted to reflect our proposed adjustments.	
(4)	ADFIT	FIN 48 items were removed. The company took the related deductions and has	
()		the benefit of the cost free capital. The amount of any disallowance is not known	
		and measurable but estimated in a statistical manner. The recording of FIN 48	/4.4.799\
		items is purely a GAAP requirement and not appropriate for rate making.	(14,788)
(5)	Regulatory Assets	CNP has included in its Pension Deferral, estimated amounts for 2010 that will not	
		be finalized until after 2010 when the final pension report is prepared by the actuaries. Market fluctuations are common and likely and could have a material	
		impact on the results. The 2010 estimated amount was removed.	(2,341)
		*	
(6)	Benefits	Removed all proposed Long-Term Incentive expense as shareholder-only-oriented goals. See Woods, pages 28 - 29.	(1,341)
		3	
(7)	Other Benefits	Remove undisclosed benefits due to burden of proof standard	(2,324)
(8)	Depreciation & Amortization	Remove amortization expense of estimated 2010 deferred pension.	(8,670)
(9)	Federal Income Taxes	Remove Medicare Part D subsidy adjustments as too far reaching into the future.	
***		The dollar amount is not known and measurable as estimated amounts must be	/e ent)
		used.	(6,605)
(10)	TX Gross Margin Tax	Flow-Through Impact of Rate Base items	(1,790)
(11)	Federal Income Tax	Flow-Through Impact of Rate Base Items	(36,407)
	Rate of Return	Carol Szerszen	(38,944)
		_	(115,785)

Page 1

Effective: [See Text Amendments]

Vernon's Texas Statutes and Codes Annotated Currentness
Utilities Code (Refs & Annos)
Title 2. Public Utility Regulatory Act
Subtitle B. Electric Utilities (Refs & Annos)
Chapter 36. Rates (Refs & Annos)
Subchapter B. Computation of Rates
\$ 36.051. Establishing Overall Revenues

In establishing an electric utility's rates, the regulatory authority shall establish the utility's overall revenues at an amount that will permit the utility a reasonable opportunity to earn a reasonable return on the utility's invested capital used and useful in providing service to the public in excess of the utility's reasonable and necessary operating expenses.

CREDIT(S)

Acts 1997, 75th Leg., ch. 166, § 1, eff. Sept. 1, 1997.

Title 2. Public Utility Regulatory Act
Subtitle B. Electric Utilities (Refs & Annos)

Capter 36. Rates (Refs & Annos)

Subchapter B. Computation of Rates

In establishing a reasonable return on invested capital, the regulatory authority shall consider applicable factors, including:

(1) the efforts and achievements of the utility in conserving resources;

→ § 36.052. Establishing Reasonable Return

- (2) the quality of the utility's services;
- (3) the efficiency of the utility's operations; and
- (4) the quality of the utility's management.

Title 2. Public Utility Regulatory Act

Subtitle B. Electric Utilities (Refs & Annos)

Chapter 36. Rates (Refs & Annos)

Subchapter B. Computation of Rates

→ § 36.053. Components of Invested Capital

- (a) Electric utility rates shall be based on the original cost, less depreciation, of property used by and useful to the utility in providing service.
- (b) The original cost of property shall be determined at the time the property is dedicated to public use, whether by the utility that is the present owner or by a predecessor.
- (c) In this section, the term "original cost" means the actual money cost or the actual money value of consideration paid other than money.
- (d) If the commission issues a certificate of convenience and necessity or, acting under Section 39.203(e), orders an electric utility or a transmission and distribution utility to construct or enlarge transmission or transmission-related facilities to facilitate meeting the goal for generating capacity from renewable energy technologies under Section 39.904(a), the commission shall find that the facilities are used and useful to the utility in providing service for purposes of this section and are prudent and includable in the rate base, regardless of the extent of the utility's actual use of the facilities.

Subtitle B. Electric Utilities (Refs & Annos)

Chapter 36. Rates (Refs & Annos)

Subchapter B. Computation of Rates

→ § 36.054. Construction Work in Progress

- (a) Construction work in progress, at cost as recorded on the electric utility's books, may be included in the utility's rate base. The inclusion of construction work in progress is an exceptional form of rate relief that the regulatory authority may grant only if the utility demonstrates that inclusion is necessary to the utility's financial integrity.
- (b) Construction work in progress may not be included in the rate base for a major project under construction to the extent that the project has been inefficiently or imprudently planned or managed.

Subchapter B. Computation of Rates

→ § 36.058. Consideration of Payment to Affiliate

- (a) Except as provided by Subsection (b), the regulatory authority may not allow as capital cost or as expense a payment to an affiliate for:
 - (1) the cost of a service, property, right, or other item; or
 - (2) interest expense.
- (b) The regulatory authority may allow a payment described by Subsection (a) only to the extent that the regulatory authority finds the payment is reasonable and necessary for each item or class of items as determined by the commission.
- (c) A finding under Subsection (b) must include:
 - (1) a specific finding of the reasonableness and necessity of each item or class of items allowed; and
 - (2) a finding that the price to the electric utility is not higher than the prices charged by the supplying affiliate for the same item or class of items to:
 - (A) its other affiliates or divisions; or
 - (B) a nonaffiliated person within the same market area or having the same market conditions.
- (d) In making a finding regarding an affiliate transaction, the regulatory authority shall:
 - (1) determine the extent to which the conditions and circumstances of that transaction are reasonably compar-

able relative to quantity, terms, date of contract, and place of delivery; and

- (2) allow for appropriate differences based on that determination.
- (e) This section does not require a finding to be made before payments made by an electric utility to an affiliate are included in the utility's charges to consumers if there is a mechanism for making the charges subject to refund pending the making of the finding.
- (f) If the regulatory authority finds that an affiliate expense for the test period is unreasonable, the regulatory authority shall:
 - (1) determine the reasonable level of the expense; and
 - (2) include that expense in determining the electric utility's cost of service.

- (a) Unless it is shown to the satisfaction of the regulatory authority that it was reasonable to choose not to consolidate returns, an electric utility's income taxes shall be computed as though a consolidated return had been filed and the utility had realized its fair share of the savings resulting from that return, if:
 - (1) the utility is a member of an affiliated group eligible to file a consolidated income tax return; and
 - (2) it is advantageous to the utility to do so.
- (b) The amount of income tax that a consolidated group of which an electric utility is a member saves, because the consolidated return eliminates the intercompany profit on purchases by the utility from an affiliate, shall be applied to reduce the cost of the property or service purchased from the affiliate.
- (c) The investment tax credit allowed against federal income taxes, to the extent retained by the electric utility, shall be applied as a reduction in the rate-based contribution of the assets to which the credit applies, to the extent and at the rate allowed by the Internal Revenue Code.

→ §:36.064. Self-Insurance

- (a) An electric utility may self-insure all or part of the utility's potential liability or catastrophic property loss, including windstorm, fire, and explosion losses, that could not have been reasonably anticipated and included under operating and maintenance expenses.
- (b) The commission shall approve a self-insurance plan under this section if the commission finds that:
 - (1) the coverage is in the public interest;
 - (2) the plan, considering all costs, is a lower cost alternative to purchasing commercial insurance; and
 - (3) ratepayers will receive the benefits of the savings.
- (c) In computing an electric utility's reasonable and necessary expenses under this subchapter, the regulatory authority, to the extent the regulatory authority finds is in the public interest, shall allow as a necessary expense the money credited to a reserve account for self-insurance. The regulatory authority shall determine reasonableness under this subsection:
 - (1) from information provided at the time the self-insurance plan and reserve account are established; and
 - (2) on the filing of a rate case by an electric utility that has a reserve account.
- (d) After a reserve account for self-insurance is established, the regulatory authority shall:
 - (1) determine whether the reserve account has a surplus or shortage under Subsection (e); and

- (2) subtract any surplus from or add any shortage to the utility's rate base.
- (e) A surplus in the reserve account exists if the charges against the account are less than the money credited to the account. A shortage in the reserve account exists if the charges against the account are greater than the money credited to the account.
- (f) The allowance for self-insurance under this title for ratemaking purposes is not applicable to nuclear plant investment.
- (g) The commission shall adopt rules governing self-insurance under this section.

Mac Chapter 36. Rates (Refs & Annos)

Mac Subchapter B. Computation of Rates

Subchapter B. Computation and Other Postemployment Benefits

- (a) The regulatory authority shall include in the rates of an electric utility expenses for pension and other postemployment benefits, as determined by actuarial or other similar studies in accordance with generally accepted accounting principles, in an amount the regulatory authority finds reasonable. Expenses for pension and other postemployment benefits include, in an amount found reasonable by the regulatory authority, the benefits attributable to the service of employees who were employed by the predecessor integrated electric utility of an electric utility before the utility's unbundling under Chapter 39 irrespective of the business activity performed by the employee or the affiliate to which the employee was transferred on or after the unbundling.
- (b) Effective January 1, 2005, an electric utility may establish one or more reserve accounts for expenses for pension and other postemployment benefits. An electric utility shall periodically record in the reserve account any difference between:
 - (1) the annual amount of pension and other postemployment benefits approved as an operating expense in the electric utility's last general rate proceeding or, if that amount cannot be determined from the regulatory authority's order, the amount recorded for pension and other postemployment benefits under generally accepted accounting principles during the first year that rates from the electric utility's last general rate proceeding are in effect; and
 - (2) the annual amount of pension and other postemployment benefits as determined by actuarial or other similar studies that are chargeable to the electric utility's operating expense.
- (c) A surplus in the reserve account exists if the amount of pension and other postemployment benefits under Subsection (b)(1) is greater than the amount determined under Subsection (b)(2). A shortage in the reserve account exists if the amount of pension and other postemployment benefits under Subsection (b)(1) is less than the amount determined under Subsection (b)(2).
- (d) If a reserve account for pension and other postemployment benefits is established, the regulatory authority at a subsequent general rate proceeding shall:

- (1) review the amounts recorded to the reserve account to determine whether the amounts are reasonable expenses;
- (2) determine whether the reserve account has a surplus or shortage under Subsection (c); and
- (3) subtract any surplus from or add any shortage to the electric utility's rate base with the surplus or shortage amortized over a reasonable time.

CHAPTER 25. SUBSTANTIVE RULES APPLICABLE TO ELECTRIC SERVICE PROVIDERS

Subchapter J. COSTS, RATES AND TARIFFS.

DIVISION 1. RETAIL RATES.

§25.231. Cost of Service.

- (a) Components of cost of service. Except as provided for in subsection (c)(2) of this section, relating to invested capital; rate base, and §23.23(b) of this title, (relating to Rate Design), rates are to be based upon an electric utility's cost of rendering service to the public during a historical test year, adjusted for known and measurable changes. The two components of cost of service are allowable expenses and return on invested capital.
- (b) Allowable expenses. Only those expenses which are reasonable and necessary to provide service to the public shall be included in allowable expenses. In computing an electric utility's allowable expenses, only the electric utility's historical test year expenses as adjusted for known and measurable changes will be considered, except as provided for in any section of these rules dealing with fuel expenses.

(1) Components of allowable expenses. Allowable expenses, to the extent they are reasonable and necessary, and subject to this section, may include, but are not limited to the following general categories:

- (A) Operations and maintenance expense incurred in furnishing normal electric utility service and in maintaining electric utility plant used by and useful to the electric utility in providing such service to the public. Payments to affiliated interests for costs of service, or any property, right or thing, or for interest expense shall not be allowed as an expense for cost of service except as provided in the Public Utility Regulatory Act §36.058.
- (B) Depreciation expense based on original cost and computed on a straight line basis as approved by the commission. Other methods of depreciation may be used when it is determined that such depreciation methodology is a more equitable means of recovering the cost of the plant.
- (C) Assessments and taxes other than income taxes.
- (D) Federal income taxes on a normalized basis. Federal income taxes shall be computed according to the provisions of the Public Utility Regulatory Act §36.060.
- (E) Advertising, contributions and donations. The actual expenditures for ordinary advertising, contributions, and donations may be allowed as a cost of service provided that the total sum of all such items allowed in the cost of service shall not exceed three-tenths of 1.0% (0.3%) of the gross receipts of the electric utility for services rendered to the public. The following expenses shall be included in the calculation of the three-tenths of 1.0% (0.3%) maximum:
 - (i) funds expended advertising methods of conserving energy;
 - (ii) funds expended advertising methods by which the consumer can effect a savings in total electric utility bills;
 - (iii) funds expended advertising methods to shift usage off of system peak; and
 - (iv) funds expended promoting renewable energy.
- (F) Nuclear decommissioning expense. The following restrictions shall apply to the inclusion of nuclear decommissioning costs that are placed in an electric utility's cost of service.
 - (i) An electric utility owning or leasing an interest in a nuclear-fueled generating unit shall include its cost of nuclear decommissioning in its cost of service. Funds collected from ratepayers for decommissioning shall be deposited monthly in irrevocable trusts external to the electric utility, in accordance with §25.301 of this title (relating to Nuclear Decommissioning Trusts). All funds held in short-term investments must bear interest. The level of the annual cost of decommissioning for ratemaking purposes will

- CHAPTER 25. SUBSTANTIVE RULES APPLICABLE TO ELECTRIC SERVICE PROVIDERS
- Subchapter J. COSTS, RATES AND TARIFFS.
- DIVISION 1. RETAIL RATES.

§25.231(b)(1)(F)(i) continued

be determined in each rate case based on an allowance for contingencies of 10% of the cost of decommissioning, the most current information reasonably available regarding the cost of decommissioning, the balance of funds in the decommissioning trust, anticipated escalation rates, the anticipated return on the funds in the decommissioning trust, and other relevant factors. The annual amount for the cost of decommissioning determined pursuant to the preceding sentence shall be expressly included in the cost of service established by the commission's order.

- (ii) In the event that an electric utility implements an interim rate increase, including an increase filed under bond, an incremental change in decommissioning funding shall be included in the increase.
 - (iii) An electric utility's decommissioning fund and trust balances will be reviewed in general rate cases. In the event that an electric utility does not have a rate case within a five-year period, the commission, on its own motion or on the motion of the commission's Office of Regulatory Affairs, the Office of Public Utility Counsel, or any affected person, may initiate a proceeding to review the electric utility's decommissioning cost study and plan, and the balance of the trust.
 - (iv) An electric utility shall perform, or cause to be performed, a study of the decommissioning costs of each nuclear generating unit that it owns or in which it leases an interest. A study or a redetermination of the previous study shall be performed at least every five years. The study or redetermination should consider the most current information reasonably available on the cost of decommissioning. A copy of the study or redetermination shall be filed with the commission and copies provided to the commission's Office of Regulatory Affairs and the Office of Public Utility Counsel. An electric utility's most recent decommissioning study or redeterminations shall be filed with the commission within 30 days of the effective date of this subsection. The five year requirement for a new study or redetermination shall begin from the date of the last study or redetermination.
- (G) Accruals credited to reserve accounts for self-insurance under a plan requested by an electric utility and approved by the commission. The commission shall consider approval of a self insurance plan in a rate case in which expenses or rate base treatment are requested for a such a plan. For the purposes of this section, a self insurance plan is a plan providing for accruals to be credited to reserve accounts. The reserve accounts are to be charged with property and liability losses which occur, and which could not have been reasonably anticipated and included in operating and maintenance expenses, and are not paid or reimbursed by commercial insurance. The commission will approve a self-insurance plan to the extent it finds it to be in the public interest. In order to establish that the plan is in the public interest, the electric utility must present a cost benefit analysis performed by a qualified independent insurance consultant who demonstrates that, with consideration of all costs, self-insurance is a lower-cost alternative than commercial insurance and the ratepayers will receive the benefits of the self insurance plan. The cost benefit analysis shall present a detailed analysis of the appropriate limits of self insurance, an analysis of the appropriate annual accruals to build a reserve account

CHAPTER 25. SUBSTANTIVE RULES APPLICABLE TO ELECTRIC SERVICE PROVIDERS

DIVISION 1. RETAIL RATES.

185...

§25.231(b)(1)(G) continued

for self insurance, and the level at which further accruals should be decreased or terminated.

- (H) Postretirement benefits other than pensions (known in the electric utility industry as "OPEB"). For ratemaking purposes, expense associated postretirement benefits other than pensions (OPEB) shall be treated as follows:
 - (i) OPEB expense shall be included in an electric utility's cost of service for ratemaking purposes based on actual payments made.
 - (ii) An electric utility may request a one-time conversion to inclusion of current OPEB expense in cost of service for ratemaking purposes on an accrual basis in accordance with generally accepted accounting principles (GAAP). Rate recognition of OPEB expense on an accrual basis shall be made only in the context of a full rate case.
 - (iii) An electric utility shall not be allowed to recover current OPEB expense on an accrual basis until GAAP requires that electric utility to report OPEB expense on an accrual basis.
 - (iv) For ratemaking purposes, the transition obligation shall be amortized over 20 years.
 - (v) OPEB amounts included in rates shall be placed in an irrevocable external trust fund dedicated to the payment of OPEB expenses. The trust shall be established no later than six months after the order establishing the OPEB expense amount included in rates. The electric utility shall make deposits to the fund at least once per year. Deposits on the fund shall include, in addition to the amount included in rates, an amount equal to fund earnings that would have accrued if deposits had been made monthly. The funding requirement can be met with deposits made in advance of the recognition of the expense for ratemaking purposes. The electric utility shall, to the extent permitted by the Internal Revenue Code, establish a postretirement benefit plan that allows for current federal income tax deductions for contributions and allows earnings on the trust funds to accumulate tax free.
 - (vi) When an electric utility terminates an OPEB trust fund established pursuant to clause (v) of this subparagraph, it shall notify the commission in writing. If excess assets remain after the OPEB trust fund is terminated and all trust related liabilities are satisfied, the electric utility shall file, for commission approval, a proposed plan for the distribution of the excess assets. The electric utility shall not distribute any excess assets until the commission approves the disbursement plan.
- (2) Expenses not allowed. The following expenses shall never be allowed as a component of cost of service:
 - (A) legislative advocacy expenses, whether made directly or indirectly, including, but not limited to, legislative advocacy expenses included in professional or trade association dues;
 - (B) funds expended in support of political candidates;
 - (C) funds expended in support of any political movement;
 - (D) funds expended promoting political or religious causes;
 - (E) funds expended in support of or membership in social, recreational, fraternal, or religious clubs or organizations;
 - (F) funds promoting increased consumption of electricity;
 - (G) additional funds expended to mail any parcel or letter containing any of the items mentioned in subparagraphs (A)-(F) of this paragraph;
