Re PUC Docket 38354: Please say "no" to I-10. Although my locally-elected officials were there to represent me, my voice was not heard. I am one of the 47,000+ people of Kerr County who believes that property values throughout the Hill Country will be affected when these huge lattice towers are installed down I-10 right beside the roadway. It will destroy our "front yard". I-10 is the only way to see a broad view of the Hill Country. This is important to those of us who have invested here and for travelers. We are the largest population with the most to lose along this route. We have only our climate and our beauty to attract businesses and new residents to boost our economy. We need more time to defend against this route which was selected at the last minute. Say "no" to this environmental destruction. Say "no" to making us look like our neighbors in Comfort, who have already been blighted, as evidenced by the photos on the back of this card.
