DIRECT TESTIMONY OF MIKEL JACK AND BRANDY LEIGH NAIL

Q. PLEASE STATE YOUR NAME AND ADDRESS

A. Mikel Jack Nail and Brandy Leigh Nail. We are home owner/land owners in Scurry County, Texas, with our address being 1097 Denson Road, Hermleigh, TX 79526.

Q. STATE THE PURPOSE AND SCOPE OF YOUR TESTIMONY

A. We purchased our property along Dry Run Creek in October of 2006. At that time, we did not anticipate the almost daily dealings we would have with multiple energy companies regarding substations and transmission lines that would be installed in close proximity to our home and property over the next few years. We received notification that Wind Energy Transmission Texas, LLC would be installing a transmission line coming from Oncor's Scurry County South Switching Station. The original proposal showed that WETT's transmission line would run North out of the switching station, turn West along Denson Road, running just North of our home and turn back South, paralleling an existing 138kV line, to join up with a second line that comes out of the West side of the switching station, South of our property. If WETT chooses this route, it would completely box in our property with the buffering stopping literally at our roofline. (Please see attached map.) This is unacceptable to us!

We have two children. They are both curious and fascinated with everything outdoors; constantly roaming our place looking for bugs, animals, rocks, building forts, etc. The added dangers that now exist due to the ongoing construction of the switching station and transmission lines, partnered with traffic in and around our property have decreased their ability to do this freely. It would seem to us, that

128

our property and activities, being in close proximity to existing 138kV lines, approved Oncor switching station and lines and WETT's proposed transmission lines, would present a great amount of danger to both ourselves and our children, should the PUC grant permissions to WETT for their original proposed route.

That being said, we have since received additional information from WETT, including updated maps, depicting their "Preferred" route which will run E/W, South of our property. Though we do not agree with the installation of this transmission line as a whole, we would prefer that WETT go with their "Preferred" route. Should the PUC grant an alternate route that directly affects our property, negotiations with WETT for relocation of our family would be absolutely necessary.

CONCLUSION

In closing, we would like the PUC to consider the following: Should our family and our home be 'boxed' in between multiple high voltage transmission lines? Why should we have to fight multiple Energy companies to protect our investment in our family and our home? Should a family have to sift through mounds of mail regarding the switching station and proposed transmission lines daily? How much more of our valuable time will be wasted? **When does our nightmare end and our dreams begin?**
