Deemed Summer Demand Savings Tables⁴⁷²

Table 417 through Table 436 present the summer demand savings (kW) for all five Texas climate zones. In each table, the capacity of the efficient unit is represented in the columns and the capacity of the existing unit is represented in the rows. The savings are in the intersection of the appropriate efficient and existing capacities. Replacements where there has been to change in capacity are highlighted in light blue.

The rightsizing savings specified in the tables below are only applicable to replace-on-burnout and early retirement projects. New construction projects are not eligible to receive deemed savings for system rightsizing.⁴⁷³

Systems rated at 17 SEER or greater are assumed to be two-stage systems, while those under 17 SEER are assumed to be single-stage systems. This results in slightly lower summer demand savings for 17.0-17.9 SEER systems as compared to 16.0-16.9 SEER systems.

⁴⁷² Rated capacity ranges are specified based on normal rounding convention between capacity categories (values at and above the midpoint round up, while values below the midpoint round down).

Deemed Winter Demand Savings Tables⁴⁷⁴

Table 437 through Table 456 present the winter demand savings (kW) for all five Texas climate zones. In each table, the capacity of the efficient unit is represented in the columns and the capacity of the existing unit is represented in the rows. The savings are in the intersection of the appropriate efficient and existing capacities. Replacements where there has been to change in capacity are highlighted in light blue.

The rightsizing savings specified in the tables below are only applicable to replace-on-burnout and early retirement projects. New construction projects are not eligible to receive deemed savings for system rightsizing.⁴⁷⁵
