STATEMENT OF POSITION

COMES NOW, Ronnie and Linda Chapman oppose the preferred segment B30 link. We already have two 138KV on our property. The proposed 345 KV will run parallel to the 138KV and will run approximately through the middle of a 220 acre field that we use for cotton, wheat, and cattle grazing. With three transmission lines across our property, our property value will be substantially affected. We are in favor of an alternate route, B26 to B29, to B32 to B40 to B40A to B43 to Clear Crossing. However, should the preferred route B30 be selected, we encourage the location of the 345KV transmission line along our west property line and would like to see the 138KV that runs parallel to the proposed 345KV hung under the 345 KV, if possible. (see attached map)

Respectfully submitted,

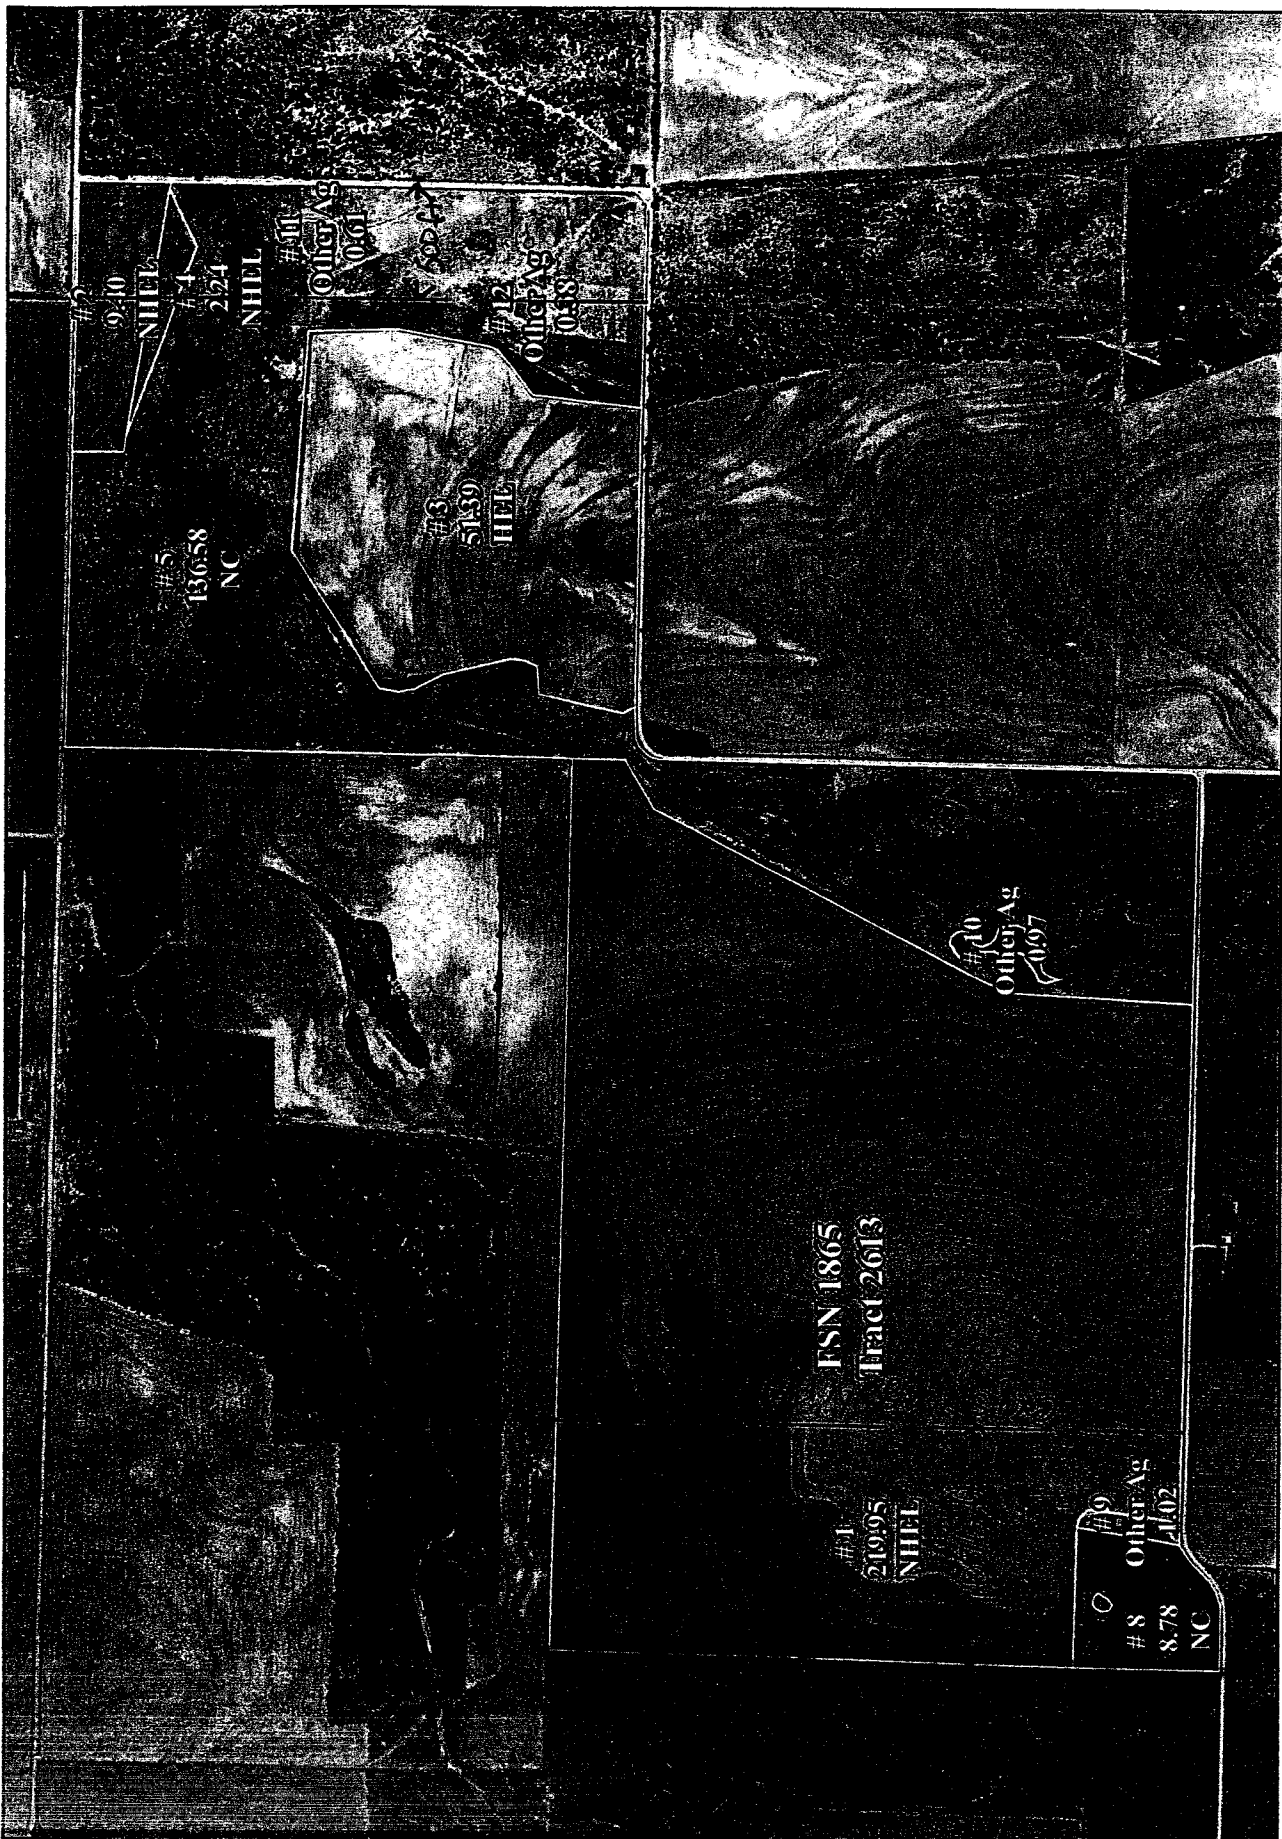

Ronnie Chapman
