Filing Clerk of the Public Utility Commission of Texas  
**Docket No. 40199 and the Project No. 40190**  
1701 N Congress Avenue P.O. Box 13326  
Austin, Texas 78711-3326

Dear Clerk,

I am filing this request pursuant to the requirements of the PUC to petition for a public hearing regarding the issue of the implementation of the so called "smart" meter technology on the customers of the electric utility grid providers within the State of Texas. The utility company is burdening the utility easement it has on my property by installing a Smart Meter that:

- (a) emits dangerous electromagnetic waves that cause personal injury.
- (b) invades my privacy by data mining and data basing information about my private and personal behavior.
- (c) utilizes technology that is not yet proven to be reliable in relation to utility usage and the lawful charges that can be assessed for such usage.
- (d) subjects me and my family to an unconstitutional degree of control of our life activities by computer algorithms and bureaucrats who have no knowledge of our personal daily requirements and desires, without our knowledge and informed consent.

I am respectfully asking the clerk to forward this request to the PUC for scheduling a hearing on my behalf. Please know that this issue is not going to simply go away just because it seems irrelevant or inconvenient to address, if indeed the PUC views it in that manner. You are my public officials, even if governor appointed, and I would appreciate it very much if you would please give worthy consideration of your next action in this regard.

Sincerely,

Fern Crecelius  
14 Moonseed Pl.  
The Woodlands, TX 77381  
832-813-8418
