greater than the system average for two consecutive years, reporting one single feeder in violation of the rule for the first year.

4. CenterPoint Energy was provided proper notice of Commission Staff's investigation in this matter, the results of the investigation, information about its right to a hearing, and an opportunity to explain its activities.
5. PURA § 38.005(a) provides that "[t]he Commission shall implement service quality and reliability standards relating to the delivery of electricity to retail customers by electric utilities and transmission and distribution utilities." Subsection (a) goes on to require the

Commission to, by rule, "develop reliability standards, including: (1) the system-average interruption frequency index (SAIFI); (2) the system-average interruption duration index (SAIDI); (3) achievement of average response time for customer service requests or inquiries; or (4) other standards that the Commission finds reasonable and appropriate."

6. Pursuant to this legislative mandate, the Commission implemented the reliability standards found in P.U.C. SUBST. R. 25.52. P.U.C. SUBST. R. 25.52(f)(1) requires each utility to maintain and operate its electric distribution system so that its system-wide SAIDI and SAIFI averages do not exceed the standard by more than 5%. P.U.C. SUBST. R. 25.52(f)(2) requires each utility shall maintain and operate its distribution system so that no distribution feeder with 10 or more customers sustains a SAIDI or SAIFI value for a reporting year that is more than 300% greater than the system average of all feeders during any two consecutive reporting years.
7. CenterPoint Energy violated PURA § 38.005 and the requirements of P.U.C. SUBST. R. 25.52 for reporting year 2011. 9. The Agreement is a report of settlement to the Commission as required by P.U.C. PROC. R. 22.246(g).
10. The requirements for informal disposition pursuant to P.U.C. PROC. R. 22.35 have been met in this proceeding.
