RESPONSE TO

2013 MAR -4 AM 9:12

LCRA TRANSMISSION SERVICES CORPORATION'S

SECOND REQUEST FOR INFORMATION

TO INTERVENOR'S EDWARD & DESSA ANDERSON

Intervenors Edward M. Anderson Jr. and Dessa A. Anderson respectfully submit the following response to LCRA TSC's second RFI.

RFI:

2-1: Understanding that no party in this case has volunteered to have transmission line placed on his or her property, if the Public Utility Commission by Order places the transmission route on your property, please identify specifically the location where you would prefer the right-of-way to be located, particularly if that location differs from the proposed route(s) contained in LCRS TSC's CCN Application

RESPONSE:

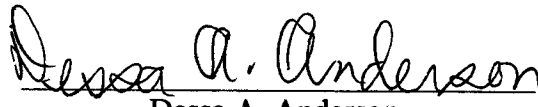

It is not proposed that a transmission route be placed on our property. Primary Alternative Routes 5, 6, 7, 8, 9, 10, 11, 12, 13 and 14 utilize Segment Q1 and Segment Q1 passes immediately behind our residential lot and homestead. We are vehemently opposed to any Primary Alternative Route that includes Segment Q1 as we are very concerned that the construction of the transmission line will have a significant, adverse effect on the value of our home and others along this segment.

The area behind our home is currently wooded and that creates a very serene environment which adds to the value of our home. There are mature trees and the area is home to an abundance of indigenous wildlife including fox, deer, birds and more. Selection of any Alternative Route that includes Segment Q1 will result in the destruction of the existing trees and other vegetation in order to clear the way for the construction of new towers and lines, creating an eyesore and detracting from the value of our home.

We strongly recommend and would support Primary Alternative Route 1 (A-S1-T1-U1-D-K-Q-T-G2-L1). This route maximizes the use of property along existing railroad tracks and creates the least impact to residential property owners.

Respectfully,

Edward M. Anderson, Jr.
