This land has been used for hunting since the late 1800's. It would not be feasible to install this links in this land. The deer will be fatally disastereous affected as well fatally for the cattle and the distinctive exoctic species.

This land has also grown and expanded to a petting zoo with distinctive exotic animals, and twenty-nine different distinctive species. Where families enjoy the outdoors resort for entertainment.

This expansion has been a very expensive and time consuming project to bring this entertainment to the Laredo, Webb County area where and when nothing of this nature had ever been built in Laredo Webb County. This will really be a disappointment to the families of Webb County the surrounding areas.

IN CONCLUSION: 1) the substances, and elements, radioactive, hazardous substances are potentially dangerous to the public health, safety welfare, and the environment.
