SUPPLEMENTAL RESPONSE (06-24-13)

REQUEST:

Please identify all the different types of incentive performance bonus costs incurred directly and/or allocated that are included in the EECRF by rate class for the reconciled, current and proposed riders. In addition, please separate all incentives bonuses measured by operational and financial performance.

SUPPLEMENTAL RESPONSE:

The following supplemental response was prepared by or under the direct supervision of Michael R. Stockard, the sponsoring witness, and R. Keith Pruett, the subject matter expert for this response.

The following information is provided in accordance with the agreement of the requesting party in lieu of the requested information. The information, as agreed to be provided, consists of any employee incentive payout for which the Company is seeking recovery through the EECRF.

Oncor's Performance Enhancement Plan ("PEP") is an annual incentive compensation program designed to reward all company employees for the achievement of certain pre-determined operational and safety-related goals and objectives. All annual PEP amounts paid to employees of Oncor are recovered solely in the Company's base rates, with none of these costs allocated or otherwise included in the Company's EECRF costs. Oncor, however, will occasionally recognize superior individual employee performance through the payment of a "spot bonus". Spot bonuses are "one-time" awards made to recognize an employee's efforts or contributions to a specific project or matter. Such awards may be made in recognition of significant overtime worked to meet a deadline or for other situations involving exceptional performance by the employee. The following amounts reflect the total spot bonuses paid by Oncor from 2009 through 2012 that have been made to employees involved in the administration of Energy Efficiency programs and are, therefore, included in the Company's EECRF costs:

<u>YEAR</u>	<u>SPOT BONUS AMOUNT</u>
2009	\$5,325
2010	\$17,925
2011	\$725
2012	\$5,000
TOTAL	\$28,975
