**I am NOT requesting to intervene in this proceeding. As a PROTESTOR, I understand the following:**

- I am NOT a party to this case;
- My comments are not considered evidence in this case; and
- I have no further obligation to participate in the proceeding.

**Please check one of the following:**

- ☒ I own property with a habitable structure located near one or more of the utility's proposed routes for a transmission line.
- ☐ One or more of the utility's proposed routes would cross my property.
- ☐ Other. Please describe and provide comments. You may attach a separate page, if necessary. \_\_\_\_\_

**We "PROTEST" the construction of Link 62b of the 345 KV transmission line through**  
**the center of the City of Palmview, Texas. Please see the attached letter with a partial**  
**plan of the City showing the route of Link 62b parallel to and over Bentsen Palm Dr.**

**Signature of person submitting comments:**

SUBJECT: REQUEST TO PROTEST, PUC Docket No. 41606:  
"CITIZENS AGAINST Link 62b OF THE TWO CIRCUIT  
345,000 VOLT TRANSMISSION LINE THROUGH THE  
CENTER OF THE CITY OF PALMVIEW, TEXAS"

Dear Sirs,

We, citizens and owners of properties in the City of Palmview, Texas, are adamantly opposed to the construction of Link 62b of the two circuit 345,000 volt transmission line that would run parallel to and over Bentsen Palm Dr. Bentsen Palm Dr is the main street that runs north to south right through the heart of the City.

There are already two existing 138,000 volt transmission lines that run north to south about 1,425 feet to the west and east sides of Bentsen Palm Dr. Link 62b of the proposed 345,000 volt transmission line would run parallel to the existing west transmission line, then run east to Bentsen Palm Dr, then turn south behind existing houses on the east side of the road. There are residential subdivisions, houses, and commercial buildings located all along the route of proposed Link 62b of the 345 KV transmission line. Construction of Link 62b would mean that there would be three high voltage transmission lines running parallel to each other a mere 1/4 mile apart.

From Veteran's Blvd (Mile 1 Rd) to the HCID#1 Canal, about 4,000 ft (0.75 mile), there are eight 75-80 ft poles on the west 138 KV line and nine 75-80 ft poles on the east 138 KV line. The new section of 345 KV line would need to zig-zag around existing residential subdivisions, individual houses and commercial buildings, and jump over the two existing 138 KV lines: this would require about 21-23 poles 145-150 feet tall. This would result in a virtual forest of 75' to 150' tall steel poles right in the center of town. Not only would this present an unsightly and unhealthy environment, it would seriously depress residential and commercial property values in this important part of the City.

Link 62b would also effectively stop new residential and commercial development on about 80 acres of prime land on both sides of Bentsen Palm Dr from Expressway 83 to the HCID #1 Canal. All this would critically erode the residential and commercial tax base of Palmview, Texas. See the attached partial plan of the City showing the location of existing 138 KV transmission lines and the proposed Link 62b 345 KV transmission line from Veteran's Blvd (Mile 1 Rd) south to HCID #1 Canal.

At a glance you can see that there are already 17 transmission line poles: and 23 new huge 150 ft poles would mean that in an area 1/2 x 3/4 miles, with Bentsen Palm Dr in the middle, there would be 40 transmission line poles in the center of town. That would just devastate the part of town where there is already a bank, federal credit union, several residential and commercial subdivisions, homes & restaurants all along Bentsen Palm Dr.

Bentsen Palm Dr is not only the main street north to south through Palmview, it is also the main access from Expressway 83 to Bentsen State Park, the World Birding Center, and the National Butterfly Center south of Palmview. These three entities are the principal areas for camping, nature hiking, and bird & butterfly watching in the Rio Grande Valley area of South Texas. It is just inconceivable that you would even contemplate constructing a section of a two circuit 345 KV transmission line along such a critical and vital piece of road.

Construction of Link 62b through the center of town is unthinkable. Why should the City of Palmview and its citizens suffer the ruin of the City skyline and loss of property values, especially when the new transmission line is intended to only benefit other cities and the customers of Sharyland Utilities? How can you even contemplate doing that? We simply cannot allow that to happen. You must choose a route that does not run through such an important and growing urban area of Palmview.

My wife and I live south of Ruiz Subdivision, which is just south of where Link 62b is projected to run through Lot 60 and Lot 62, Bentsen Groves Subdivision, Addition "D" and turn south on the east side of Bentsen Palm Dr. Our house is on Bentsen Palm Dr and would thus be about 300 ft south and 250 ft west from the transmission line. That would severely devalue our house and we would just hate that.

Sincerely,

Rodolfo Perez

Sylvia Perez
