Subject: Request to Intervene in PUC Docket No. 41606

To Who it May Concern;

I Mario Cantu am requesting to intervene because there is currently an existing transmission line already running through the back of my property and I already have to respect an easement as it is. A second transmission line (62b) would only decrease my property in value and not only that, it would mean that I would have to respect a higher amount of easement that I cannot build a permanent structure in my own property. Please feel free to contact me with any questions as I am very interested in knowing the meetings and decisions you all will make. I can be reach at 956-207-2586. Thank You for your time
