## News Release

### **Feel a Cool Draft at Home? There's Help for That! Entergy Texas Energy Efficiency Programs Under Way for 2013**

Beaumont, Texas – Old Man Winter has definitely made an appearance in Southeast Texas. But if 2013 is at all typical the worst—and coldest—is yet to come.

“Our winters are generally mild, compared to many parts of the country,” said Kelley Carson, manager of Entergy Texas, Inc.’s energy efficiency programs. “If there is any month we can look to for hard freezes or even the occasional snowflake, it will be in February.”

Fortunately for the utility’s customers, the company has just kicked off its 2013 energy efficiency program year. And for those who feel a chill in the air inside their home as well as outside, one of those programs might be just the ticket.

“Our programs can be roughly divided into three categories,” Carson said. “We have programs to help residential customers as well as programs for commercial businesses and schools and governmental entities. Altogether, we spend about \$8 million a year to make Southeast Texas more energy efficient and that also means more comfortable.

Feb. 7, 2013  
Page 2 of 3

"For residential customers in particular, these programs are available at little to no cost," he added.

By calling one of Entergy's qualified vendors, customers can set an appointment for the vendor to test their home for its energy efficiency. The vendor will also determine what needs to be done and then provide the materials and labor to actually follow through.

Entergy Texas annually provides tips and ideas for homeowners in need of making their homes more energy efficient. They include measures such as sealing leaks, adding insulation and adding weather stripping among other things. These tips, along with simple how-to ideas and videos are available at [entergytexas.com/savemoney](http://entergytexas.com/savemoney). Some customers, however, may need a little more assistance or simply want to take advantage of what's available. That's where the company's programs come into play.

Since the energy efficiency programs were put in place in 2002, more than 50,000 customers have participated with some \$43 million spent in program incentives. As a result, enough CO<sub>2</sub> has been removed from the air to equal taking 20,000 cars off the road. The program has also installed nearly 600,000 CFL light bulbs and has saved 182.5 million kilowatt-hours of energy use.

"We're very proud of what our programs have accomplished and look forward to taking them to thousands more customers in 2013," Carson said.

Entergy Texas provides electricity to more than 400,000 customers in 27 counties. It is a subsidiary of Entergy Corporation. Entergy is an integrated energy company engaged primarily in electric power production and retail distribution operations. Entergy owns and operates power plants with approximately 30,000 megawatts of electric generating capacity, including more than 10,000 megawatts of nuclear power, making it one of the nation's leading nuclear

December 3, 2012

Dear Mr. \_\_\_\_\_,

Often people ask me why I contribute to ***The Power to Care***. The answer to that question rests in my trust and faith in community. In the giving spirit of the season I know that – together, through ***The Power to Care*** program – we can make a difference in the lives of those who are less fortunate and who are enduring difficult situations.

As you prepare for the holidays, please take the time to remember our vulnerable elderly neighbors. Many are facing choices between buying their next meal and needed medicine or paying their utility bill. During the winter months, as temperatures lower and electricity usage increases, rising bills can easily result in a precarious situation for these citizens. Elderly people who cannot afford to heat and power their homes this winter need our help. ***The Power to Care*** program provides emergency utility bill payment assistance to those in crisis.

Entergy partners with qualified, local nonprofit organizations to distribute these assistance funds. And, rest assured that your contribution will be spent wisely and well because 100% of every dollar received will go directly to assist those individuals in the most critical of circumstances. No funds are used for administrative or any other purposes.

I thank you for your generous past support, it is very much appreciated. With your continued support, we can help our neighbors stay warm, safe and secure this holiday season. Please send a tax-deductible contribution to ***The Power to Care*** today. Entergy shareholders will match your gift dollar-for-dollar up to \$500,000. For example, if you donate \$25, Entergy will donate \$25.

On behalf of the entire Entergy family, I would like to wish you all the best this holiday season. May it be one filled with joy and special memories.

Sincerely,

Sallie Rainer  
President and Chief Executive Officer  
Entergy Texas, Inc.

P.S. With the winter months and holiday season upon us, please help provide assistance and comfort to our vulnerable elderly neighbors who gratefully appreciate your compassion and kindness. Please remember, ***Entergy will match your support dollar-for-dollar.***

## News Release

### **Entergy Texas Announces Final Amount for Fuel Refund** *Customers to See Lower Bills in March, April, May*

Beaumont, Texas – A fuel refund announced for Entergy Texas, Inc. customers late last year has been finalized with the impact to customer bills more than originally expected.

Entergy Texas, Inc., the Public Utility Commission of Texas and other stakeholders ironed out details of the refund which will cover over-recovery of fuel costs for December 2010 through December 2011, bringing the total refund up to \$67 million.

As a result, customers can expect to see a refund of \$21.70 reflected on bills each month in March, April and May.

“Fuel costs have remained lower over the past year which means it isn’t costing us as much to purchase fuel to generate electricity,” said Joe Domino, president and chief executive officer, Entergy Texas, Inc. “Fortunately, the economy is beginning to improve; however, many of our customers are still struggling with higher prices or even joblessness. We are glad to be able to pass along our savings to customers in the form of a fuel refund.

Per PUCT rules, Entergy Texas determines twice a year what it will charge customers for the fuel it uses to generate electricity. The amount charged is based on fuel costs at that time. The recovery charge stays in place on bills for the next six months. Fuel prices, however,

Page 2 of 2

change frequently, so the company may not recover enough of what it paid for fuel or it may recover too much.

When too much is recovered, customers receive the refund through their bills. Entergy Texas does not earn a profit on fuel expenses and only passes actual fuel costs through to its customers. The PUCT must approve all fuel charges.

Entergy Texas, Inc. delivers electricity to more than 400,000 customers in 27 counties. It is a subsidiary of Entergy Corporation. Entergy is an integrated energy company engaged primarily in electric power production and retail distribution operations. Entergy owns and operates power plants with approximately 30,000 megawatts of electric generating capacity, and it is the second-largest nuclear generator in the United States. Entergy delivers electricity to 2.7 million utility customers in Arkansas, Louisiana, Mississippi and Texas.

The screenshot shows the HealthStrides website at <https://portal.entygy.com/HealthStrides/appmanager/HealthStrides/>. The top navigation bar includes links for File, Edit, View, Favorites, Tools, Help, HealthStrides Home, and HealthStrides Home. The main menu has options like My Health, ENSHAPE, MY Tools & Education, Retiree Zone, and Favorites.

The homepage features a "Spotlight" section with a "Tools" image and a "Ready for Retirement" section with a "Retirement" image.

A specific page titled "2012 Benefits Plus Open Enrollment will take place Oct. 4-31, 2011" is shown. It discusses the introduction of a consumer-driven medical plan, the High Deductible Health Plan, with no employee monthly premiums, and a Health Savings Account option. The page also highlights a competitive package of benefits, along with options for varying coverage levels, at a responsible cost to employees, with some benefits, you have a range of coverage options, from company-paid to higher levels of coverage that require a monthly employee premium.

The page continues to address the trend of rising health care costs in 2006, with the launch of HealthStrides. The company introduced a consumer-driven medical plan, the High Deductible Health Plan, with no employee monthly premiums, and a Health Savings Account option. The page notes that the High Deductible Health Plan, with the \$1,000 PPO plans, will be offered again in 2013.

A sidebar on the right titled "HEALTHSTRIDES RESOURCES" lists various links for HealthStrides, HealthStrides Health, HealthStrides Benefits, HealthStrides News, HealthStrides Events, HealthStrides Resources, and HealthStrides Links.

At the bottom right, the Aetna HealthStrides logo is displayed.

## Service Center Routine Puts Focus on Safety, Keeps Employees Engaged

05/16/2012

For front line employees who report to the Beaumont, Texas Service Center each morning at 6:30 a.m. there is more to their routine than hearing the usual safety updates and hazard warnings. In January the group incorporated a new element to their meetings. Each day a different employee stamps a red target on the "target zero calendar" to signify a day with zero accidents for the unit. It's an effort to keep their awareness level high, and employees engaged.

According to third class lineman Trevor Myers the act is a display of their approach to the company's target zero goal, "We take it one day at a time, one hour at a time... baby steps." The calendar accompanies a sign that the team made to show their commitment to safety. To declare their pledge, each team member signed their name above the slogan that reads, "One day at a time, not in Beaumont, not today!"

For now, there are more red targets on the calendar than initials which indicate the type of accident that occurred. However, Frank Shannon, line supervisor, is realistic about the dangers his crew has to face each day. "We also see some room for improvement. This year in particular we've hit some bumps in the road-- thankfully nothing serious. But it's a reminder that we constantly need to stay focused. Just because we're stamping a calendar every morning, doesn't mean we're not going to have an accident," he said.

Myers is approaching his sixth anniversary with the company and thinks the calendar is a great visual for the overall goal. "Management can help us by putting out programs and things, but ultimately it's our responsibility to take control of that and be responsible for each other and ourselves," he added.

Shannon believes understanding a group's dynamics can produce great results, "Every supervisor in other departments within Entergy knows their employees... every group has its own personalities and its own different mix and it's just trying to figure out what works for them," he said.

The unit has reported less than a handful of incidents since January. Myers attributes that success to the old adage "my brother's keeper." "I have a vested interest in each and every person [here]," Myers said, "I'm not afraid to say 'you need to stop doing that, let's do things differently.' Because I'm not afraid to say those things and no one in the Beaumont network is afraid to say those things, we will ultimately reach our goal."

### Close Call for Huntsville Senior Meter Services Installer

08/29/2012

Scorched markings reveal the signs of risks front line employees may encounter on the job.

Senior meter services installer, Ernest Mock experienced one of the many hazards of his job. Nearly three months ago, he experienced a flash while installing a meter to reconnect a customer at a local apartment complex who had been disconnected for nonpayment of services.

"I pulled up to the stop, parked my truck and put out my cone, and put on all of my PPE," Mock said of the procedures he followed at the location. "I performed the required testing, and all was good. There was no load because the customer had the breaker off inside. I proceeded to plug the meter in and it short circuited; the bottom left lug went straight to the ground and it caused a flash." he added.

In his 30 years of experience, Mock said he performed hundreds of reconnects and has never had an incident of this nature.

However, this is only one of many hazards that employees who work in the field need to be aware of. David Richard, operations manager for Entergy Texas, Inc. said, "There are dogs, holes, traffic, limited parking and so many possibilities that put employees at risk." He continued "From a safety perspective you have to make sure that you analyze the situation that you're in."

Each employee is issued personal protective equipment. Though Mock was wearing all of the required PPE that day, he believes his protective gloves prevented an injury, "I know for a fact that if I didn't have [my gloves] on, I definitely would've gotten my fingers burned."

"They were pretty scorched up. I would not have wanted to be there without them, let's just put it that way," Richard added.

Just recently the Southwest Electric Safety Exchange presented Entergy Texas with two awards for ten years without a lost time injury in meter services in the east and west.

1                   I.        INTRODUCTION AND QUALIFICATIONS

2   Q1.    PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

3   A.    My name is Kenneth F. Gallagher. I am a senior analyst with  
4       Commonwealth Consulting Group, a firm of consultants specializing in the  
5       area of public utility economics. My office address is 1491 Chain Bridge  
6       Road, McLean, Virginia 22101. I have been associated with the firm since  
7       1974. I am also president of KFG, Inc., a consulting firm specializing in  
8       the area of public utility economics. I am testifying in this case on behalf  
9       of Entergy Texas, Inc. ("ETI").

10

11   Q2.    PLEASE DESCRIBE YOUR EDUCATION AND EXPERIENCE.

12   A.    In 1971, I received a Bachelor of Science degree in Economics from the  
13       University of Maryland. I have also received a Master of Business  
14       Administration degree in Finance from American University and a Master  
15       of Arts degree in Economics from Georgetown University. During the  
16       course of my education, I have taken numerous courses in economic  
17       theory, statistics, finance and accounting. I am a member of the American  
18       Economic Association and the American Finance Association.

19                  Prior to joining Commonwealth Consulting Group, I was employed  
20       by the Montgomery County Department of Finance performing studies  
21       relevant to valuation and land and buildings for the Maryland Department  
22       of Assessments and Taxation. In 1973, I was promoted to an  
23       administrative position with the Montgomery County Office of Facilities

1 and Management specializing in problems related to the allocation of  
2 budgeted funds for leased office space and properties acquired for public  
3 use.

4 During my work as a utility rate consultant, I have been responsible  
5 for the preparation of financial and economic studies concerning various  
6 aspects of utility rate regulation. These studies have dealt primarily with  
7 the determination of the fair rate of return, cost of service, rate base and  
8 revenue requirements. I have also performed detailed studies of the cost  
9 of fuel for fuel rate proceedings on behalf of the State of Maryland Office  
10 of People's Counsel. I have testified previously before the Council of the  
11 City of New Orleans, the Louisiana Public Service Commission ("LPSC"),  
12 the Maine Public Service Commission, the Maryland Public Service  
13 Commission, the Minnesota Public Service Commission, the Washington  
14 Utilities and Transportation Commission, and the Public Utility  
15 Commission of Texas ("PUC"). Shown on Exhibit KFG-1 is a list of cases  
16 in which I have provided expert testimony.

17

18 II. PURPOSE OF TESTIMONY

19 Q3. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

20 A. The purpose of my testimony is to present the Nuclear Regulatory  
21 Commission ("NRC") nuclear decommissioning cost minimum value and  
22 recommend an appropriate nuclear decommissioning cost escalation rate  
23 for the River Bend Station ("River Bend"). River Bend is owned by

1        Entergy Gulf States Louisiana, L.L.C. ("EGSL"), but is subject to a  
2        FERC-approved MSS-4 Purchased Power Agreement ("PPA") under  
3        which ETI purchases a share of the regulated portion of River Bend from  
4        EGSL. The PPA is subject to Service Schedule MSS-4 of the Entergy  
5        System Agreement. Although the PPA is a FERC-jurisdictional contract  
6        for wholesale power and capacity, provisions of Service Schedule MSS-4  
7        effectively delegate to the PUC the setting of the decommissioning and  
8        depreciation costs related to River Bend that will be recovered from Texas  
9        retail customers. Recovery of River Bend decommissioning costs under  
10      the PPA has been requested and included in the rates of ETI's customers  
11      in ETI's last two base rate cases, Docket Nos. 37744 and 39896, as a  
12      reasonable and necessary cost of purchasing power from River Bend.  
13      Recovery of River Bend decommissioning costs by ETI's predecessors  
14      Entergy Gulf States, Inc. and Gulf States Utilities Company, was also  
15      permitted prior to the PPA arrangement.<sup>1</sup>

16           By way of background, under the NRC regulations governing  
17      financial assurance requirements, holders of nuclear operating licenses  
18      must certify through biennial filings that available decommissioning funds  
19      are not less than the amount required to fund decommissioning costs at  
20      an NRC-prescribed "minimum level." The current minimum level is  
21      compared to available fund values, such values escalated to the date of

1           decommissioning, to determine whether the licensee has the required  
2           “minimum level” of decommissioning funding for NRC purposes.

3

4           **III.       NRC FINANCIAL ASSURANCE AND MINIMUM FUNDING**  
5           **REQUIREMENTS**

6   Q4.   PLEASE DESCRIBE YOUR UNDERSTANDING OF THE NRC  
7           FINANCIAL ASSURANCE REQUIREMENTS.

8   A.   Under NRC regulations codified at 10 C.F.R. § 50.75(a)-(f), holders of  
9           nuclear operating licenses must certify to the NRC, through specific  
10          reporting requirements related to licensee-specific decommissioning  
11          funding plan data filed at a minimum of every two years, that there is a  
12          reasonable “financial assurance” that funds will be available for the  
13          funding of the decommissioning process at that time in the future when the  
14          nuclear facilities are expected to cease operation. The primary objective  
15          of the decommissioning funding plan “financial assurance” requirements of  
16          the NRC is to ensure that a licensee accumulates a level of funds  
17          sufficient to fund the safe dismantlement, decontamination, and disposal  
18          of its nuclear generating facility in a way that protects public health and  
19          safety. Compliance with NRC regulations is a required condition of the  
20          NRC operating license and, therefore, affects the ability of EGSL to  
21          continue to operate the River Bend facility and in turn ETI’s ability to  
22          maintain its PPA.<sup>2</sup>
