RE: STOP BUILDING OF 12-STORY POWER LINES IN RESIDENTIAL FRISCO, TX
PROJECT 41808

I am writing this to ask you to prevent the construction of 12-story utility towers that would cut through the heart of the residential area of my home city, Frisco, TX. Last Tuesday night our Frisco City Council voted unanimously to stop the construction of these power lines. Please uphold their (and the citizens') wishes to not build these 12-story utility towers in our well-populated areas. Please either BURY THESE LINES or use the Army Corps of Engineers land at the point when more power is needed—we have been led to believe that currently we are only at 73% usage of the existing lines.

The proposed route of Brazos energy is not acceptable—it cuts right through the heart of a heavily populated residential area. As a real estate broker I know how the huge towers will negatively affect property values. PLEASE DO NOT LET BRAZOS PROCEED WITH THESE 12-STORY TOWERS IN OUR RESIDENTIAL AREA OF FRISCO!!!! STOP PROJECT 41808

Thank you for listening to me and the concerned citizens of our community!
