Subject: **Opposition of Brazos' Stonebrook proposal**

Commissioner Kenneth W. Anderson, Jr.,

My wife and I just built our dream house in Frisco for our 5 year old son to grow up in. We recently heard the news that Brazos Electric is proposing to construct high-voltage transmission lines and a substation directly down Stonebrook Pkwy, which is less than 200ft from our new house.
(<http://www.brazoselectric.com/projects/stonebrook/>)

Hundreds of homeowners will be affected. Home values will drop, and the potential health ramifications are huge. There are multiple schools slated to be built alongside Stonebrook in the next 2 years as well.

One of the proposed options was to run the lines across land owned by the Army Corp of Engineers (area south of Lebanon Rd, east of 423/Main). This land is completely vacant, no homes anywhere near it. It's truly a perfect option. However they immediately rejected it.

We are still in the early stages of this process, but I urge you to please help put pressure on the AOE to reconsider and allow Brazos to run their transmission lines through the area. They already have lines running through an area almost due-east, so it's not like this option doesn't have precedent.
(<http://www.brazoselectric.com/projects/stonebrook/left.aspx#>)

Please help convince the AOE to allow Brazos to construct these transmission lines on their land. I speak not only for myself, but for hundreds, if not thousands of other families that need your help to make this happen.

Thank you in advance for your help.
