2.11.2 Regulations

- (A) The Type A, B and C loop signaling arrangements for station ports of a premises PBX (or similar) switching system and the E&M signaling arrangement for tie lines are furnished for grandfathered and registered PBXs per Part 68 of the FCC regulations.
- (B) For connections to registered PBX (or similar) equipment, the customer must specify the equipment capability of their registered equipment.
- (C) Customers with grandfathered customer-provided PBX (or similar) equipment may, at their option:
 - (1) Continue to provide their own off-premises station signaling capability and use only the type 428 channel.
 - (2) Request that off-premises station signaling capability be provided by the Company. Where this option is selected, the customer must specify his or her equipment signaling capability.
- (D) Based on information provided by the customer, the Company will furnish the appropriate signaling arrangement. Where the requested signaling arrangement is furnished and determined to be of lesser signaling range than required, and the customer requests the Company to furnish another signaling arrangement, such request will be treated as a new request for service and appropriate service charges will apply.

- {1} A move charge on the same premises is one-half of the full service charge.
- {2} Signaling options for Types 420 and 422 are obsolete - Existing installations at existing locations for existing customers.
- {3} Automatic signaling is not available for multipoint services.
