I hope this is what you need. Please keep in mind as folks call in to complain that the rate is simply based on the expenses divided by the number of customers....period. We have 92 customers. If we had double the customers then they each would only pay half as much as we are asking for. The expenses are the same if there were 100 or 1000 customers. Therefore if we had 184 instead of 92 the monthly rate would be half of the \$133.

Thanks,

Jesse & Debbie Wood
