

## Customer Growth and Billing Units - Water

### *Customer Growth*

Population projections for the Agency can vary depending on the assumptions used in developing the projections. In estimating future growth patterns, projections are typically based on historical information and recent growth trends. Population projections are necessary because the projected water and wastewater volumes are directly tied to the existing number of customers and the projected growth in new customer accounts. It is important to recognize in forward-looking rate making that the system is anticipated to grow. As such, it is appropriate to assume some system growth in the coming year.

In reviewing historical growth for the Agency, the project team made assumptions as to future growth on the system, as outlined on Table 4.

Table 4: Projected Customer Count

| FY 2013                             |       |
|-------------------------------------|-------|
| Total Residential                   | 5,048 |
| Total Commercial                    | 260   |
| Total Irrigation                    | 113   |
| Total Multi-Family                  | 34    |
| Total Construction                  | 12    |
| Total Wholesale, without raw water  | 8     |
| Total Wholesale, raw water purchase | 2     |
|                                     | 5,477 |

### *Billing Unit Projection*

Billing units, otherwise known as water consumption, are projected by analyzing historical usage for each customer classification. Billing units are projected by establishing a "normalized" average usage per connection per month and applying that usage to the projected customer count to establish a projection of consumption for each customer class.

The project team reviewed historical water consumption data for each customer class for the prior three years and compared the average usage per connection for each year. In developing projections of future demands, WRM attempts to "normalize" the data. Ideally, projections should be made for "normal" operating conditions. The projected water consumption for FYE 2013 is presented below:

**Table 5: Projected Water Consumption (Thousand Gallons)**

| 2013                                |               |
|-------------------------------------|---------------|
| Total Residential                   | 794,887,329   |
| Total Commercial                    | 99,683,570    |
| Total Irrigation                    | 75,147,560    |
| Total Multi-Family                  | 29,795,870    |
| Total Construction                  | 30,172,950    |
| Total Wholesale, without raw water  | 586,130,000   |
| Total Wholesale, raw water purchase | 141,476,000   |
|                                     | 1,757,293,279 |

## Water Rate Design

By comparing the Agency's projected revenue recovery at currently effective rates to the revenue requirements for wholesale customers, WRM determined that the Agency is projected to under-recover from wholesale customers by 31%, as outlined on Table 6.

**Table 6: Summary of Wholesale Revenue Recovery at Current Rates**

|                 | Cost of Service | Projected Revenues at Current Rates | Projected Over/(Under) Recovery | Percent Over/under Recovery |
|-----------------|-----------------|-------------------------------------|---------------------------------|-----------------------------|
| Total Wholesale | \$ 3,340,366    | \$ 2,549,898                        | \$ (790,468)                    | 31%                         |

### ***Minimum Bill***

In order to achieve full cost recovery from wholesale water customers, a 31% increase to both the minimum charge and the volumetric charge for the Agency's wholesale customers is necessary. Table 7 outlines the recommended minimum bill for each wholesale customer.

**Table 7: Recommended Minimum Bill**

| Minimum Bill                    | Current      | FYE 2013     |
|---------------------------------|--------------|--------------|
| CRYSTAL MOUNTAIN HOA, INC.      | \$ 655.00    | \$ 858.05    |
| DEER CREEK RANCH WATER CO., LLC | \$ 2,500.00  | \$ 3,275.00  |
| DRIPTING SPRINGS WSC            | \$ 4,548.00  | \$ 5,957.88  |
| EANES ISD                       | \$ 175.00    | \$ 229.25    |
| HAYS COUNTY WCID #1             | \$ 7,450.00  | \$ 9,759.50  |
| REUNION RANCH WCID              | \$ 3,190.00  | \$ 4,178.90  |
| SENNAS HILLS MUD #1             | \$ 3,730.00  | \$ 4,886.30  |
| BARTON CREEK WEST WSC           | \$ 2,167.00  | \$ 2,838.77  |
| HAYS COUNTY WCID #2             | \$ 6,515.00  | \$ 8,534.65  |
| CITY OF DRIPTING SPRINGS        | \$ 7,000.00  | \$ 9,170.00  |
| LAZY NINE MUD #1A               | \$ 10,200.00 | \$ 13,362.00 |
| TRAVIS COUNTY MUD #12           | \$ 9,430.00  | \$ 12,353.30 |

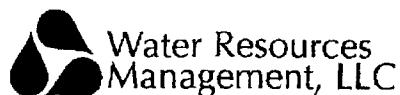

***Volumetric Rate***

Table 8 below outlines the required volumetric rates for the Agency's wholesale water customers to meet full cost recovery.

**Table 8: Recommended Volumetric Rate**

| Volumetric Rate               | Current | FYE 2013 |
|-------------------------------|---------|----------|
| Customers With own Raw Water  | \$ 2.40 | \$ 3.14  |
| Customers Using PUA Raw Water | \$ 2.86 | \$ 3.75  |

## Section 3.0 Wastewater - Methodology and Findings

|  | <u>Page</u> |
|--|-------------|

| <i>Rate Design</i>                         | 19          |

## Customer Growth and Billing Units - Wastewater

### *Customer Growth*

Current retail wastewater connections on the system as of August 2012 were 2,717 LUEs. The project team projected an annual average of 2,792 retail wastewater LUEs for FYE 2013. The Agency also has one wholesale wastewater connection.

### *Billing Unit Projection*

Billing unit determination for the wastewater utility was determined by reviewing the historical water usage for the FYE 2011 and FYE 2012 through March 2012. Each year had a similar average usage per connection, so the entire period was considered in formulating an accurate projection of future use. In developing projections of future demands, WRM attempts to "normalize" the data. Ideally, projections should be made for "normal" operating conditions. The projected wastewater usage for FYE 2013 is illustrated on Table 9.

Table 9: Projected Wastewater Usage (Gallons)

| Estimated Flows,<br>by Customer Class | FYE 2013    |
|---------------------------------------|-------------|
| Residential                           | 153,199,376 |
| Commercial                            | 74,059,971  |
| Wholesale                             | 19,178,400  |
| Multi-Family                          | 25,986,750  |
|                                       | 272,424,498 |

### *Removal of Retail Only Costs*

Similar to the analysis for the water utility, the project team had to recognize that certain costs are solely associated with providing services to retail customers. Retail only costs were isolated and removed from the analysis. Retail only costs that were identified are:

- **Repairs and Maintenance Costs** – The Agency has a contract service provider who operates and maintains the Agency's facilities. The Agency is billed a base-fee for general operational services. The Agency is also billed an additional fee for services for repairs and maintenance of facilities that are above and beyond the Agency's general contract services. The Agency is billed based on time, equipment, and materials for the actual services provided. Repairs and maintenance services include anything from repairing a motor at a lift station to repairing a leak on a collection line. Given the limited sample of work-orders available to quantify the fees associated with repairs and maintenance to regional facilities (that serve all of the Agency's

customers) versus non-regional facilities (such as small collection line maintenance), the entirety of these costs have been removed as a "retail only" cost.<sup>6</sup>

- **Commercial Pre Treatment Program** – Costs associated with management of the Agency's pre-treatment program for commercial customers was removed, as this cost is associated with the Agency's commercial retail customers and not the Agency's wholesale customer.
- **Debt Service for Non-Regional Facilities** – The Agency has an installment payment liability with the LCRA as well as Agency issued bonds for which annual debt service must be paid. The Agency's assets were closely examined to determine facilities that were regional in nature (that serves both retail and wholesale customers) and those facilities that were non-regional in nature (that service retail only customers). The debt obligation attributable to retail-only customers (such as internal facilities in subdivisions) was removed from the analysis.

### *Cost Allocation*

After retail only costs have been removed from the analysis, system-wide costs are then allocated to each classification of customer based upon the projected flows of that customer class. The results of this analysis are presented on Table 10.

**Table 10: Summary of Cost Allocations**

| Customer Cost Allocation –<br>Total Revenue Requirement | FYE 2013     |
|---|--------------|
| Residential Customer Cost Allocation                    | \$ 1,596,625 |
| Commercial Customer Cost Allocation                     | 1,276,092    |
| Wholesale Customer Cost Allocation                      | 100,518      |
|   | \$ 2,973,235 |

<sup>6</sup> It must be noted that in future years, when adequate data is available, the Agency may re-evaluate this line item and determine that a portion of the costs should also be recovered from wholesale customers.

## Wastewater Rate Design

By comparing the Agency's projected revenue recovery at currently effective rates to the revenue requirements for wholesale customers, WRM determined that the Agency is projected to under-recover from wholesale customers by 18%, as outlined on Table 11.

**Table 11: Summary of Wholesale Wastewater Revenue Recovery at Current Rates**

|                 | Cost of Service | Projected Revenues at Current Rates | Projected Over/(Under) | Percent Over/(Under) |
|-----------------|-----------------|-------------------------------------|------------------------|----------------------|
| Total Wholesale | \$ 100,518      | \$ 82,741                           | (\$ 17,777)            | -18%                 |

### ***Minimum Bill***

WRM has not recommended a change to the Agency's wholesale wastewater customer's minimum bill.

### ***Volumetric Rate***

Table 12 below outlines the required volumetric rates for the Agency's wholesale wastewater customer to meet full cost recovery.

**Table 12: Recommended Wholesale Wastewater Rates**

|                 | Current  | FYE 2013 |
|-----------------|----------|----------|
| Minimum Bill    | \$ 2,500 | \$ 2,500 |
| Volumetric Rate | \$ 2.75  | \$ 3.68  |
