

Customer Growth and Billing Units - Wastewater

Customer Growth

Current retail wastewater connections on the system as of August 2012 were 2,717 LUEs. The project team projected an annual average of 2,792 retail wastewater LUEs for FYE 2013. The Agency also has one wholesale wastewater connection.

Billing Unit Projection

Billing unit determination for the wastewater utility was determined by reviewing the historical water usage for the FYE 2011 and FYE 2012 through March 2012. Each year had a similar average usage per connection, so the entire period was considered in formulating an accurate projection of future use. In developing projections of future demands, WRM attempts to "normalize" the data. Ideally, projections should be made for "normal" operating conditions. The projected wastewater usage for FYE 2013 is illustrated on Table 9.

Table 9: Projected Wastewater Usage (Gallons)

Estimated Flows, by Customer Class	FYE 2013
Residential	153,199,376
Commercial	74,059,971
Wholesale	19,178,400
Multi-Family	25,986,750
	272,424,498

Removal of Retail Only Costs

Similar to the analysis for the water utility, the project team had to recognize that certain costs are solely associated with providing services to retail customers. Retail only costs were isolated and removed from the analysis. Retail only *costs that were identified* are:

- **Repairs and Maintenance Costs** – The Agency has a contract service provider who operates and maintains the Agency's facilities. The Agency is billed a base-fee for general operational services. The Agency is also billed an additional fee for services for repairs and maintenance of facilities that are above and beyond the Agency's general contract services. The Agency is billed based on time, equipment, and materials for the actual services provided. Repairs and maintenance services include anything from repairing a motor at a lift station to repairing a leak on a collection line. Given the limited sample of work-orders available to quantify the fees associated with repairs and maintenance to regional facilities (that serve all of the Agency's

customers) versus non-regional facilities (such as small collection line maintenance), the entirety of these costs have been removed as a "retail only" cost.⁶

- **Commercial Pre Treatment Program** – Costs associated with management of the Agency's pre-treatment program for commercial customers was removed, as this cost is associated with the Agency's commercial retail customers and not the Agency's wholesale customer.
- **Debt Service for Non-Regional Facilities** – The Agency has an installment payment liability with the LCRA as well as Agency issued bonds for which annual debt service must be paid. The Agency's assets were closely examined to determine facilities that were regional in nature (that serves both retail and wholesale customers) and those facilities that were non-regional in nature (that serve retail only customers). The debt obligation attributable to retail-only customers (such as internal facilities in subdivisions) was removed from the analysis.

Cost Allocation

After retail only costs have been removed from the analysis, system-wide costs are then allocated to each classification of customer based upon the projected flows of that customer class. The results of this analysis are presented on Table 10.

Table 10: Summary of Cost Allocations

Customer Cost Allocation – Total Revenue Requirement	FYE 2013
Residential Customer Cost Allocation	\$ 1,596,625
Commercial Customer Cost Allocation	1,276,092
Wholesale Customer Cost Allocation	100,518
	\$ 2,973,235

⁶ It must be noted that in future years, when adequate data is available, the Agency may re-evaluate this line item and determine that a portion of the costs should also be recovered from wholesale customers.

Wastewater Rate Design

By comparing the Agency's projected revenue recovery at currently effective rates to the revenue requirements for wholesale customers, WRM determined that the Agency is projected to under-recover from wholesale customers by 18%, as outlined on Table 11.

Table 11: Summary of Wholesale Wastewater Revenue Recovery at Current Rates

	Cost of Service	Projected Revenues at Current Rates	Projected Over/(Under)	Percent Over //(Under)
Total Wholesale	\$ 100,518	\$ 82,741	(\$ 17,777)	-18%

Minimum Bill

WRM has not recommended a change to the Agency's wholesale wastewater customer's minimum bill.

Volumetric Rate

Table 12 below outlines the required volumetric rates for the Agency's wholesale wastewater customer to meet full cost recovery.

Table 12: Recommended Wholesale Wastewater Rates

	Current	FYE 2013
Minimum Bill	\$ 2,500	\$ 2,500
Volumetric Rate	\$ 2.75	\$ 3.68
