REQUEST FOR A PUBLIC HEARING

RECEIVED
2014 DEC 17 PM 4:40

PUBLIC UTILITY COMMISSION
FILING CLERK

(1) My name is David Bennett, and my mailing address is 1814 S. State Hwy 78, Bonham, Texas 75418. My daytime phone number is (903) 583-4948.

(2) My objection is to the City of Bonham's application to amend CCN Nos. 11186 and 20460 and to obtain dual certification with portions of Southwest Fannin County SUD and White Shed Water Supply Corporation and to decertify portions of Bois D'Arc MUD and Ravenna Nunnelee Water Supply Corporation with the Texas Commission on Environmental Quality to provide water and sewer utility service in Fannin County.

(3) I request a public hearing.

(4) I am a member of Southbound Water Supply Corporation, a small co-op formed in 1967 for the purpose of distributing water to residences along State Highway 78 south of Bonham, Texas. I live in the area where the City of Bonham wishes to extend its area certification. The granting of the CCN is an intrusion into our current arrangement and would limit the options of the co-op, of which I am a member, should the application of the City of Bonham be granted. The granting of the City of Bonham's application would be manifestly inequitable and unfair in consideration of all pertinent facts.

(5) The proposed amendment to the application is to exclude from the proposed utility service area that territory to which water is distributed by Southbound Water Supply Corporation. Currently, Southbound Water Supply Corporation is purchasing water from the City of Bonham. Also, Southbound Water Supply Corporation is in the process of filing its own application for a CCN.

Bonham City Commission deals with CCN protesters

BY VICKI GRAVES
HERALD DEMOCRAT

BONHAM — Residents from outside Bonham's city limits showed up at City Hall Monday night riled and ready to oppose what they thought might mean annexation into the city or a tax increase.

Many had received letters announcing that Bonham had filed applications with the state to amend Certificates of Convenience and Necessity to obtain dual certifications with parts of Southwest Fannin County SUD and White Shed Water Supply Corp. and to decertify parts of Bois d' Arc MUD and Ravenna Nunnelee Water Supply Corp. regarding water and sewer utility service. Other residents in the same area received no letters. And everyone concerned wanted to know why.

The proposed utility service area is 4.6 miles north, 1.9 miles south, 1.3 miles east and 4.2 miles west of downtown Bonham. The area is bounded on the north by FM 1753; on the east by Bois d' Arc Creek; on the south by FM 1629; and on the west by FM 898.

The people in the affected area didn't want city water and sewer. They already have water wells or water service and septic systems, many of those in the audience said.

The letters arrived with maps enclosed showing the CCN area to be encompassed. They gave a Nov. 31 deadline for protesters to file any complaints. However, City Manager Blaine Hinds, at the meeting, said nothing is going to change and explained what those letters were all about.

The letters regarding the CCN for water and sewer are required by the Texas Commission on Environmental Quality because, in August, the city filed an application to expand and part of the city's obligation is to notify property owners in the area of the certificate, he said. Some people didn't get letters because the addresses were incorrect because of the 911 system, Hinds added.

"The reason we filed for a new certificate is that a year ago, Bois MUD filed application that encroached inside the city limits and Bonham has been going through a long procedure to redraw the lines of the application submitted by Bois d' Arc. In order to protect the city's future interest in terms of water and sewer service, we were advised that it was in our best interest to extend our certificate of convenience and necessity out to our extraterritorial jurisdiction limits,

which is the planning area the state provides for each city."

This does not mean the city of Bonham is going to annex the area or that the city is going to require anyone on another water supply to change, he said. "It does not mean the city requires you to get on the sewer system. It only means that if a sewer system is desired, then the sewer has to be connected to the city. There can't be little independent sewer systems out there."

"We are not going to annex anybody," Mayor Roy Floyd told the people. "Don't worry about it. Not in my lifetime is it going to happen. Every city has an extraterritorial jurisdiction, which means, within that limit, we have the authority to do water or sewer. It's always been true in the state of Texas and the smaller water supply corps have usurped that on some occasions because Bonham is not out there serving already. But when they try to get a legal right to do that, we certainly take exception to that. We're not asking any of their people to join us. But if it ever comes up and we decide to go out there, this is our service area."

Hinds said the reason the city got into White Shed's territory is that it's between Lake Bonham and the city and they are trying to have a continuous service area all the way out to Lake Bonham.

Resident Marie Spann asked who sent out the letters and Hinds told her it was a consultant that works for the city. However, he said the city created the mailing list. "We're all sending petitions to Austin," Spann said. "A petition's fine, but it's not going to mean anything because that's not going to happen," Floyd said.

Nettie Mendenhall asked why certain people got letters and others didn't. Commissioner John Burnett told her that unless people have changed their address, they need to change it because the appraisal district is required by law to send out all information based on the information they have and they can't change that address without the property owner's approval.

"If you pass this water-sewer system, we in the outlying houses would be paying for what we're not getting and we would not be getting anything," Mendenhall said. "We have our water wells, septic systems and yet, if you pass this, we're going to be paying taxes and bonds when we're not going to get anything."

REQUEST FOR A PUBLIC HEARING

Bonham City Commission deals with CCN protesters

BY VICKI GRAVES
HERALD DEMOCRAT

BONHAM — Residents from outside Bonham's city limits showed up at City Hall Monday night riled and ready to oppose what they thought might mean annexation into the city or a tax increase.

Many had received letters announcing that Bonham had filed applications with the state to amend Certificates of Convenience and Necessity to obtain dual certifications with parts of Southwest Fannin County SUD and White Shed Water Supply Corp. and to decertify parts of Bois d' Arc MUD and Ravenna Nunnelee Water Supply Corp. regarding water and sewer utility service. Other residents in the same area received no letters. And everyone concerned wanted to know why.

The proposed utility service area is 4.6 miles north, 1.9 miles south, 1.3 miles east and 4.2 miles west of downtown Bonham. The area is bounded on the north by FM 1753; on the east by Bois d' Arc Creek; on the south by FM 1629; and on the west by FM 898.

The people in the affected area didn't want city water and sewer. They already have water wells or water service and septic systems, many of those in the audience said.

The letters arrived with maps enclosed showing the CCN area to be encompassed. They gave a Nov. 31 deadline for protesters to file any complaints. However, City Manager Blaine Hinds, at the meeting, said nothing is going to change and explained what those letters were all about.

The letters regarding the CCN for water and sewer are required by the Texas Commission on Environmental Quality because, in August, the city filed an application to expand and part of the city's obligation is to notify property owners in the area of the certificate, he said. Some people didn't get letters because the addresses were incorrect because of the 911 system, Hinds added.

"The reason we filed for a new certificate is that a year ago, Bois MUD filed application that encroached inside the city limits and Bonham has been going through a long procedure to redraw the lines of the application submitted by Bois d' Arc. In order to protect the city's future interest in terms of water and sewer service, we were advised that it was in our best interest to extend our certificate of convenience and necessity out to our extrajurisdictional limits,

which is the planning area the state provides for each city."

This does not mean the city of Bonham is going to annex the area or that the city is going to require anyone on another water supply to change, he said. "It does not mean the city requires you to get on the sewer system. It only means that if a sewer system is desired, then the sewer has to be connected to the city. There can't be little independent sewer systems out there."

"We are not going to annex anybody," Mayor Roy Floyd told the people. "Don't worry about it. Not in my lifetime is it going to happen. Every city has an extrajurisdictional jurisdiction, which means, within that limit, we have the authority to do water or sewer. It's always been true in the state of Texas and the smaller water supply corps have usurped that on some occasions because Bonham is not out there serving already. But when they try to get a legal right to do that, we certainly take exception to that. We're not asking any of their people to join us. But if it ever comes up and we decide to go out there, this is our service area."

Hinds said the reason the city got into White Shed's territory is that it's between Lake Bonham and the city and they are trying to have a continuous service area all the way out to Lake Bonham.

Resident Marie Spann asked who sent out the letters and Hinds told her it was a consultant that works for the city. However, he said the city created the mailing list. "We're all sending petitions to Austin," Spann said. "A petition's fine, but it's not going to mean anything because that's not going to happen," Floyd said.

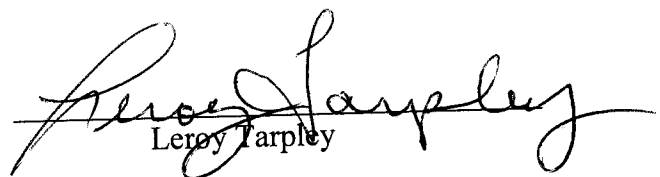

Nettie Mendenhall asked why certain people got letters and others didn't. Commissioner John Burnett told her that unless people have changed their address, they need to change it because the appraisal district is required by law to send out all information based on the information they have and they can't change that address without the property owner's approval.

"If you pass this water-sewer system, we in the outlying houses would be paying for what we're not getting and we would not be getting anything," Mendenhall said. "We have our water wells, septic systems and yet, if you pass this, we're going to be paying taxes and bonds when we're not going to get anything."

REQUEST FOR A PUBLIC HEARING

- (1) My name is Kenneth Fugate and my mailing address is 1421 S. State Hwy 78, Bonham, Texas 75418. My daytime phone number is (903) 583-2555.
- (2) My objection is to the City of Bonham's application to amend CCN Nos. 11186 and 20460 and to obtain dual certification with portions of Southwest Fannin County SUD and White Shed Water Supply Corporation and to decertify portions of Bois D'Arc MUD and Ravenna Nunnelee Water Supply Corporation with the Texas Commission on Environmental Quality to provide water and sewer utility service in Fannin County.
- (3) I request a public hearing.
- (4) I am a member of Southbound Water Supply Corporation, a small co-op formed in 1967 for the purpose of distributing water to residences along State Highway 78 south of Bonham, Texas. I live in the area where the City of Bonham wishes to extend its area certification. The granting of the CCN is an intrusion into our current arrangement and would limit the options of the co-op, of which I am a member, should the application of the City of Bonham be granted. The granting of the City of Bonham's application would be manifestly inequitable and unfair in consideration of all pertinent facts.
- (5) The proposed amendment to the application is to exclude from the proposed utility service area that territory to which water is distributed by Southbound Water Supply Corporation. Currently, Southbound Water Supply Corporation is purchasing water from the City of Bonham. Also, Southbound Water Supply Corporation is in the process of filing its own application for a CCN.

Bonham City Commission deals with CCN protesters

BY VICKI GRAVES
HERALD DEMOCRAT

BONHAM — Residents from outside Bonham's city limits showed up at City Hall Monday night riled and ready to oppose what they thought might mean annexation into the city or a tax increase.

Many had received letters announcing that Bonham had filed applications with the state to amend Certificates of Convenience and Necessity to obtain dual certifications with parts of Southwest Fannin County SUD and White Shed Water Supply Corp. and to decertify parts of Bois d' Arc MUD and Ravenna Nunnelee Water Supply Corp. regarding water and sewer utility service. Other residents in the same area received no letters. And everyone concerned wanted to know why.

The proposed utility service area is 4.6 miles north, 1.9 miles south, 1.3 miles east and 4.2 miles west of downtown Bonham. The area is bounded on the north by FM 1753; on the east by Bois d' Arc Creek; on the south by FM 1623; and on the west by FM 898.

The people in the affected area didn't want city water and sewer. They already have water wells or water service and septic systems, many of those in the audience said.

The letters arrived with maps enclosed showing the CCN area to be encompassed. They gave a Nov. 31 deadline for protesters to file any complaints. However, City Manager Blaine Hinds, at the meeting, said nothing is going to change and explained what those letters were all about.

The letters regarding the CCN for water and sewer are required by the Texas Commission on Environmental Quality because, in August, the city filed an application to expand and part of the city's obligation is to notify property owners in the area of the certificate, he said. Some people didn't get letters because the addresses were incorrect because of the 911 system, Hinds added.

"The reason we filed for a new certificate is that a year ago, Bois MUD filed application that encroached inside the city limits and Bonham has been going through a long procedure to redraw the lines of the application submitted by Bois d' Arc. In order to protect the city's future interest in terms of water and sewer service, we were advised that it was in our best interest to extend our certificate of convenience and necessity out to our extrajurisdictional limits,

which is the planning area the state provides for each city."

This does not mean the city of Bonham is going to annex the area or that the city is going to require anyone on another water supply to change, he said. "It does not mean the city requires you to get on the sewer system. It only means that if a sewer system is desired, then the sewer has to be connected to the city. There can't be little independent sewer systems out there."

"We are not going to annex anybody," Mayor Roy Floyd told the people. "Don't worry about it. Not in my lifetime is it going to happen. Every city has an extrajurisdictional jurisdiction, which means, within that limit, we have the authority to do water or sewer. It's always been true in the state of Texas and the smaller water supply corps have usurped that on some occasions because Bonham is not out there serving already. But when they try to get a legal right to do that, we certainly take exception to that. We're not asking any of their people to join us. But if it ever comes up and we decide to go out there, this is our service area."

Hinds said the reason the city got into White Shed's territory is that it's between Lake Bonham and the city and they are trying to have a continuous service area all the way out to Lake Bonham.

Resident Marie Spann asked who sent out the letters and Hinds told her it was a consultant that works for the city. However, he said the city created the mailing list. "We're all sending petitions to Austin," Spann said. "A petition's fine, but it's not going to mean anything because that's not going to happen," Floyd said.

Bonham City Commission deals with CCN protesters

BY VICKI GRAVES
HERALD DEMOCRAT

BONHAM — Residents from outside Bonham's city limits showed up at City Hall Monday night riled and ready to oppose what they thought might mean annexation into the city or a tax increase.

Many had received letters announcing that Bonham had filed applications with the state to amend Certificates of Convenience and Necessity to obtain dual certifications with parts of Southwest Fannin County SUD and White Shed Water Supply Corp. and to decertify parts of Bois d' Arc MUD and Ravenna Nunnelee Water Supply Corp. regarding water and sewer utility service. Other residents in the same area received no letters. And everyone concerned wanted to know why.

The proposed utility service area is 4.6 miles north, 1.9 miles south, 1.3 miles east and 4.2 miles west of downtown Bonham. The area is bounded on the north by FM 1753; on the east by Bois d' Arc Creek; on the south by FM 1629; and on the west by FM 898.

The people in the affected area didn't want city water and sewer. They already have water wells or water service and septic systems, many of those in the audience said.

The letters arrived with maps enclosed showing the CCN area to be encompassed. They gave a Nov. 31 deadline for protesters to file any complaints. However, City Manager Blaine Hinds, at the meeting, said nothing is going to change and explained what those letters were all about.

The letters regarding the CCN for water and sewer are required by the Texas Commission on Environmental Quality because, in August, the city filed an application to expand and part of the city's obligation is to notify property owners in the area of the certificate, he said. Some people didn't get letters because the addresses were incorrect because of the 911 system, Hinds added.

"The reason we filed for a new certificate is that a year ago, Bois MUD filed application that encroached inside the city limits and Bonham has been going through a long procedure to redraw the lines of the application submitted by Bois d' Arc. In order to protect the city's future interest in terms of water and sewer service, we were advised that it was in our best interest to extend our certificate of convenience and necessity out to our extraterritorial jurisdiction limits,

which is the planning area the state provides for each city."

This does not mean the city of Bonham is going to annex the area or that the city is going to require anyone on another water supply to change, he said. "It does not mean the city requires you to get on the sewer system. It only means that if a sewer system is desired, then the sewer has to be connected to the city. There can't be little independent sewer systems out there."

"We are not going to annex anybody," Mayor Roy Floyd told the people. "Don't worry about it. Not in my lifetime is it going to happen. Every city has an extraterritorial jurisdiction, which means, within that limit, we have the authority to do water or sewer. It's always been true in the state of Texas and the smaller water supply corps have usurped that on some occasions because Bonham is not out there serving already. But when they try to get a legal right to do that, we certainly take exception to that. We're not asking any of their people to join us. But if it ever comes up and we decide to go out there, this is our service area."

Hinds said the reason the city got into White Shed's territory is that it's between Lake Bonham and the city and they are trying to have a continuous service area all the way out to Lake Bonham.

Resident Marie Spann asked who sent out the letters and Hinds told her it was a consultant that works for the city. However, he said the city created the mailing list. "We're all sending petitions to Austin," Spann said. "A petition's fine, but it's not going to mean anything because that's not going to happen," Floyd said.

Nettie Mendenhall asked why certain people got letters and others didn't. Commissioner John Burnett told her that unless people have changed their address, they need to change it because the appraisal district is required by law to send out all information based on the information they have and they can't change that address without the property owner's approval.

"If you pass this water-sewer system, we in the outlying houses would be paying for what we're not getting and we would not be getting anything," Mendenhall said. "We have our water wells, septic systems and yet, if you pass this, we're going to be paying taxes and bonds when we're not going to get anything."

REQUEST FOR A PUBLIC HEARING

- (1) My name is Frank B. Rose and my mailing address is 691 S. State Hwy 78, Bonham, Texas 75418. My daytime phone number is (903) 640-2102.
- (2) My objection is to the City of Bonham's application to amend CCN Nos. 11186 and 20460 and to obtain dual certification with portions of Southwest Fannin County SUD and White Shed Water Supply Corporation and to decertify portions of Bois D'Arc MUD and Ravenna Nunnelee Water Supply Corporation with the Texas Commission on Environmental Quality to provide water and sewer utility service in Fannin County.
- (3) I request a public hearing.
- (4) I am a member of Southbound Water Supply Corporation, a small co-op formed in 1967 for the purpose of distributing water to residences along State Highway 78 south of Bonham, Texas. I live in the area where the City of Bonham wishes to extend its area certification. The granting of the CCN is an intrusion into our current arrangement and would limit the options of the co-op, of which I am a member, should the application of the City of Bonham be granted. The granting of the City of Bonham's application would be manifestly inequitable and unfair in consideration of all pertinent facts.
- (5) The proposed amendment to the application is to exclude from the proposed utility service area that territory to which water is distributed by Southbound Water Supply Corporation. Currently, Southbound Water Supply Corporation is purchasing water from the City of Bonham. Also, Southbound Water Supply Corporation is in the process of filing its own application for a CCN.

Bonham City Commission deals with CCN protesters

BY VICKI GRAVES
HERALD DEMOCRAT

BONHAM — Residents from outside Bonham's city limits showed up at City Hall Monday night riled and ready to oppose what they thought might mean annexation into the city or a tax increase.

Many had received letters announcing that Bonham had filed applications with the state to amend Certificates of Convenience and Necessity to obtain dual certifications with parts of Southwest Fannin County SUD and White Shed Water Supply Corp. and to decertify parts of Bois d' Arc MUD and Ravenna Nunnelee Water Supply Corp. regarding water and sewer utility service. Other residents in the same area received no letters. And everyone concerned wanted to know why.

The proposed utility service area is 4.6 miles north, 1.9 miles south, 1.3 miles east and 4.2 miles west of downtown Bonham. The area is bounded on the north by FM 1753; on the east by Bois d' Arc Creek; on the south by FM 1629; and on the west by FM 898.

The people in the affected area didn't want city water and sewer. They already have water wells or water service and septic systems, many of those in the audience said.

The letters arrived with maps enclosed showing the CCN area to be encompassed. They gave a Nov. 31 deadline for protesters to file any complaints. However, City Manager Blaine Hinds, at the meeting, said nothing is going to change and explained what those letters were all about.

The letters regarding the CCN for water and sewer are required by the Texas Commission on Environmental Quality because, in August, the city filed an application to expand and part of the city's obligation is to notify property owners in the area of the certificate, he said. Some people didn't get letters because the addresses were incorrect because of the 911 system, Hinds added.

"The reason we filed for a new certificate is that a year ago, Bois MUD filed application that encroached inside the city limits and Bonham has been going through a long procedure to redraw the lines of the application submitted by Bois d' Arc. In order to protect the city's future interest in terms of water and sewer service, we were advised that it was in our best interest to extend our certificate of convenience and necessity out to our extrajurisdictional limits,

which is the planning area the state provides for each city."

This does not mean the city of Bonham is going to annex the area or that the city is going to require anyone on another water supply to change, he said. "It does not mean the city requires you to get on the sewer system. It only means that if a sewer system is desired, then the sewer has to be connected to the city. There can't be little independent sewer systems out there."

"We are not going to annex anybody," Mayor Roy Floyd told the people. "Don't worry about it. Not in my lifetime is it going to happen. Every city has an extrajurisdictional jurisdiction, which means, within that limit, we have the authority to do water or sewer. It's always been true in the state of Texas and the smaller water supply corps have usurped that on some occasions because Bonham is not out there serving already. But when they try to get a legal right to do that, we certainly take exception to that. We're not asking any of their people to join us. But if it ever comes up and we decide to go out there, this is our service area."

Hinds said the reason the city got into White Shed's territory is that it's between Lake Bonham and the city and they are trying to have a continuous service area all the way out to Lake Bonham.

Resident Marie Spann asked who sent out the letters and Hinds told her it was a consultant that works for the city. However, he said the city created the mailing list. REQUEST FOR A PUBLIC HEARING

- (1) My name is Amanda Freitas and my mailing address is 265 S. FM 271, Bonham, Texas 75418. My daytime phone number is (903) 640-1978.
- (2) My objection is to the City of Bonham's application to amend CCN Nos. 11186 and 20460 and to obtain dual certification with portions of Southwest Fannin County SUD and White Shed Water Supply Corporation and to decertify portions of Bois D'Arc MUD and Ravenna Nunnelee Water Supply Corporation with the Texas Commission on Environmental Quality to provide water and sewer utility service in Fannin County.
- (3) I request a public hearing.
- (4) I am a member of Southbound Water Supply Corporation, a small co-op formed in 1967 for the purpose of distributing water to residences along State Highway 78 south of Bonham, Texas. I live in the area where the City of Bonham wishes to extend its area certification. The granting of the CCN is an intrusion into our current arrangement and would limit the options of the co-op, of which I am a member, should the application of the City of Bonham be granted. The granting of the City of Bonham's application would be manifestly inequitable and unfair in consideration of all pertinent facts.
- (5) The proposed amendment to the application is to exclude from the proposed utility service area that territory to which water is distributed by Southbound Water Supply Corporation. Currently, Southbound Water Supply Corporation is purchasing water from the City of Bonham. Also, Southbound Water Supply Corporation is in the process of filing its own application for a CCN.

Bonham City Commission deals with CCN protesters

BY VICKI GRAVES
HERALD DEMOCRAT

BONHAM — Residents from outside Bonham's city limits showed up at City Hall Monday night riled and ready to oppose what they thought might mean annexation into the city or a tax increase.

Many had received letters announcing that Bonham had filed applications with the state to amend Certificates of Convenience and Necessity to obtain dual certifications with parts of Southwest Fannin County SUD and White Shed Water Supply Corp. and to decertify parts of Bois d' Arc MUD and Ravenna Nunnelee Water Supply Corp. regarding water and sewer utility service. Other residents in the same area received no letters. And everyone concerned wanted to know why.

The proposed utility service area is 4.6 miles north, 1.9 miles south, 1.3 miles east the 4.2 miles west of downtown Bonham. The area is bounded on the north by FM 1753; on the east by Bois d' Arc Creek; on the south by FM 1629; and on the west by FM 898.

The people in the affected area didn't want city water and sewer. They already have water wells or water service and septic systems, many of those in the audience said.

The letters arrived with maps enclosed showing the CCN area to be encompassed. They gave a Nov. 31 deadline for protesters to file any complaints. However, City Manager Blaine Hinds, at the meeting, said nothing is going to change and explained what those letters were all about.

The letters regarding the CCN for water and sewer are required by the Texas Commission on Environmental Quality because, in August, the city filed an application to expand and part of the city's obligation is to notify property owners in the area of the certificate, he said. Some people didn't get letters because the addresses were incorrect because of the 911 system, Hinds added.

"The reason we filed for a new certificate is that a year ago, Bois MUD filed application that encroached inside the city limits and Bonham has been going through a long procedure to redraw the lines of the application submitted by Bois d' Arc. In order to protect the city's future interest in terms of water and sewer service, we were advised that it was in our best interest to extend our certificate of convenience and necessity out to our extraterritorial jurisdiction limits,

which is the planning area the state provides for each city."

This does not mean the city of Bonham is going to annex the area or that the city is going to require anyone on another water supply to change, he said. "It does not mean the city requires you to get on the sewer system. It only means that if a sewer system is desired, then the sewer has to be connected to the city. There can't be little independent sewer systems out there."

"We are not going to annex anybody," Mayor Roy Floyd told the people. "Don't worry about it. Not in my lifetime is it going to happen. Every city has an extraterritorial jurisdiction, which means, within that limit, we have the authority to do water or sewer. It's always been true in the state of Texas and the smaller water supply corps have usurped that on some occasions because Bonham is not out there serving already. But when they try to get a legal right to do that, we certainly take exception to that. We're not asking any of their people to join us. But if it ever comes up and we decide to go out there, this is our service area."

Hinds said the reason the city got into White Shed's territory is that it's between Lake Bonham and the city and they are trying to have a continuous service area all the way out to Lake Bonham.

Resident Marie Spann asked who sent out the letters and Hinds told her it was a consultant that works for the city. However, he said the city created the mailing list. "We're all sending petitions to Austin," Spann said. "A petition's fine, but it's not going to mean anything because that's not going to happen," Floyd said.

Nettie Mendenhall asked why certain people got letters and others didn't. Commissioner John Burnett told her that unless people have changed their address, they need to change it because the appraisal district is required by law to send out all information based on the information they have and they can't change that address without the property owner's approval.

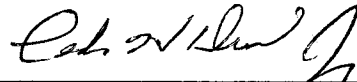

"If you pass this water-sewer system, we in the outlying houses would be paying for what we're not getting and we would not be getting anything," Mendenhall said. "We have our water wells, septic systems and yet, if you pass this, we're going to be paying taxes and bonds when we're not going to get anything."

REQUEST FOR A PUBLIC HEARING

Bonham City Commission deals with CCN protesters

BY VICKI GRAVES
HERALD DEMOCRAT

BONHAM — Residents from outside Bonham's city limits showed up at City Hall Monday night riled and ready to oppose what they thought might mean annexation into the city or a tax increase.

Many had received letters announcing that Bonham had filed applications with the state to amend Certificates of Convenience and Necessity to obtain dual certifications with parts of Southwest Fannin County SUD and White Shed Water Supply Corp. and to decertify parts of Bois d' Arc MUD and Ravenna Nunnelee Water Supply Corp. regarding water and sewer utility service. Other residents in the same area received no letters. And everyone concerned wanted to know why.

The proposed utility service area is 4.6 miles north, 1.9 miles south, 1.3 miles east the 4.2 miles west of downtown Bonham. The area is bounded on the north by FM 1753; on the east by Bois d' Arc Creek; on the south by FM 1629; and on the west by FM 898.

The people in the affected area didn't want city water and sewer. They already have water wells or water service and septic systems, many of those in the audience said.

The letters arrived with maps enclosed showing the CCN area to be encompassed. They gave a Nov. 31 deadline for protesters to file any complaints. However, City Manager Blaine Hinds, at the meeting, said nothing is going to change and explained what those letters were all about.

The letters regarding the CCN for water and sewer are required by the Texas Commission on Environmental Quality because, in August, the city filed an application to expand and part of the city's obligation is to notify property owners in the area of the certificate, he said. Some people didn't get letters because the addresses were incorrect because of the 911 system, Hinds added.

"The reason we filed for a new certificate is that a year ago, Bois MUD filed application that encroached inside the city limits and Bonham has been going through a long procedure to redraw the lines of the application submitted by Bois d' Arc. In order to protect the city's future interest in terms of water and sewer service, we were advised that it was in our best interest to extend our certificate of convenience and necessity out to our extraterritorial jurisdiction limits,

which is the planning area the state provides for each city."

This does not mean the city of Bonham is going to annex the area or that the city is going to require anyone on another water supply to change, he said. "It does not mean the city requires you to get on the sewer system. It only means that if a sewer system is desired, then the sewer has to be connected to the city. There can't be little independent sewer systems out there."

"We are not going to annex anybody," Mayor Roy Floyd told the people. "Don't worry about it. Not in my lifetime is it going to happen. Every city has an extraterritorial jurisdiction, which means, within that limit, we have the authority to do water or sewer. It's always been true in the state of Texas and the smaller water supply corps have usurped that on some occasions because Bonham is not out there serving already. But when they try to get a legal right to do that, we certainly take exception to that. We're not asking any of their people to join us. But if it ever comes up and we decide to go out there, this is our service area."

Hinds said the reason the city got into White Shed's territory is that it's between Lake Bonham and the city and they are trying to have a continuous service area all the way out to Lake Bonham.

Resident Marie Spann asked who sent out the letters and Hinds told her it was a consultant that works for the city. However, he said the city created the mailing list. "We're all sending petitions to Austin," Spann said. "A petition's fine, but it's not going to mean anything because that's not going to happen," Floyd said.

Nettie Mendenhall asked why certain people got letters and others didn't. Commissioner John Burnett told her that unless people have changed their address, they need to change it because the appraisal district is required by law to send out all information based on the information they have and they can't change that address without the property owner's approval.

"If you pass this water-sewer system, we in the outlying houses would be paying for what we're not getting and we would not be getting anything," Mendenhall said. "We have our water wells, septic systems and yet, if you pass this, we're going to be paying taxes and bonds when we're not going to get anything."

- (1) My name is Leroy Tarpley and my mailing address is 295 S. State Hwy 78, Bonham, Texas 75418. My daytime phone number is (903) 583-8145.
- (2) My objection is to the City of Bonham's application to amend CCN Nos. 11186 and 20460 and to obtain dual certification with portions of Southwest Fannin County SUD and White Shed Water Supply Corporation and to decertify portions of Bois D'Arc MUD and Ravenna Nunnelee Water Supply Corporation with the Texas Commission on Environmental Quality to provide water and sewer utility service in Fannin County.
- (3) I request a public hearing.
- (4) I am a member of Southbound Water Supply Corporation, a small co-op formed in 1967 for the purpose of distributing water to residences along State Highway 78 south of Bonham, Texas. I live in the area where the City of Bonham wishes to extend its area certification. The granting of the CCN is an intrusion into our current arrangement and would limit the options of the co-op, of which I am a member, should the application of the City of Bonham be granted. The granting of the City of Bonham's application would be manifestly inequitable and unfair in consideration of all pertinent facts.
- (5) The proposed amendment to the application is to exclude from the proposed utility service area that territory to which water is distributed by Southbound Water Supply Corporation. Currently, Southbound Water Supply Corporation is purchasing water from the City of Bonham. Also, Southbound Water Supply Corporation is in the process of filing its own application for a CCN.

Bonham City Commission deals with CCN protesters

BY VICKI GRAVES
HERALD DEMOCRAT

BONHAM — Residents from outside Bonham's city limits showed up at City Hall Monday night riled and ready to oppose what they thought might mean annexation into the city or a tax increase.

Many had received letters announcing that Bonham had filed applications with the state to amend Certificates of Convenience and Necessity to obtain dual certifications with parts of Southwest Fannin County SUD And White Shed Water Supply Corp. and to decertify parts of Bois d' Arc MUD and Ravenna Nunnelee Water Supply Corp. regarding water and sewer utility service. Other residents in the same area received no letters. And everyone concerned wanted to know why.

The proposed utility service area is 4.6 miles north, 1.9 miles south, 1.3 miles east the 4.2 miles west of downtown Bonham. The area is bounded on the north by FM 1753; on the east by Bois d' Arc Creek; on the south by FM 1629; and on the west by FM 898.

The people in the affected area didn't want city water and sewer. They already have water wells or water service and septic systems, many of those in the audience said.

The letters arrived with maps enclosed showing the CCN area to be encompassed. They gave a Nov. 31 deadline for protesters to file any complaints. However, City Manager Blaine Hinds, at the meeting, said nothing is going to change and explained what those letters were all about.

The letters regarding the CCN for water and sewer are required by the Texas Commission on Environmental Quality because, in August, the city filed an application to expand and part of the city's obligation is to notify property owners in the area of the certificate, he said. Some people didn't get letters because the addresses were incorrect because of the 911 system, Hinds added.

"The reason we filed for a new certificate is that a year ago, Bois MUD filed application that encroached inside the city limits and Bonham has been going through a long procedure to redraw the lines of the application submitted by Bois d' Arc. In order to protect the city's future interest in terms of water and sewer service, we were advised that it was in our best interest to extend our certificate of convenience and necessity out to our extraterritorial jurisdiction limits,

which is the planning area the state provides for each city."

This does not mean the city of Bonham is going to annex the area or that the city is going to require anyone on another water supply to change, he said. "It does not mean the city requires you to get on the sewer system. It only means that if a sewer system is desired, then the sewer has to be connected to the city. There can't be little independent sewer systems out there."

"We are not going to annex anybody," Mayor Roy Floyd told the people. "Don't worry about it. Not in my lifetime is it going to happen. Every city has an extraterritorial jurisdiction, which means, within that limit, we have the authority to do water or sewer. It's always been true in the state of Texas and the smaller water supply corps have usurped that on some occasions because Bonham is not out there serving already. But when they try to get a legal right to do that, we certainly take exception to that. We're not asking any of their people to join us. But if it ever comes up and we decide to go out there, this is our service area."

Hinds said the reason the city got into White Shed's territory is that it's between Lake Bonham and the city and they are trying to have a continuous service area all the way out to Lake Bonham.

Resident Marie Spann asked who sent out the letters and Hinds told her it was a consultant that works for the city. However, he said the city created the mailing list. "We're all sending petitions to Austin," Spann said. "A petition's fine, but it's not going to mean anything because that's not going to happen," Floyd said.

Nettie Mendenhall asked why certain people got letters and others didn't. Commissioner John Burnett told her that unless people have changed their address, they need to change it because the appraisal district is required by law to send out all information based on the information they have and they can't change that address without the property owner's approval.

"If you pass this water-sewer system, we in the outlying houses would be paying for what we're not getting and we would not be getting anything," Mendenhall said. "We have our water wells, septic systems and yet, if you pass this, we're going to be paying taxes and bonds when we're not going to get anything."

REQUEST FOR A PUBLIC HEARING

Bonham City Commission deals with CCN protesters

BY VICKI GRAVES
HERALD DEMOCRAT

BONHAM — Residents from outside Bonham's city limits showed up at City Hall Monday night riled and ready to oppose what they thought might mean annexation into the city or a tax increase.

Many had received letters announcing that Bonham had filed applications with the state to amend Certificates of Convenience and Necessity to obtain dual certifications with parts of Southwest Fannin County SUD and White Shed Water Supply Corp. and to decertify parts of Bois d' Arc MUD and Ravenna Nunnelee Water Supply Corp. regarding water and sewer utility service. Other residents in the same area received no letters. And everyone concerned wanted to know why.

The proposed utility service area is 4.6 miles north, 1.9 miles south, 1.3 miles east the 4.2 miles west of downtown Bonham. The area is bounded on the north by FM 1753; on the east by Bois d' Arc Creek; on the south by FM 1629; and on the west by FM 898.

The people in the affected area didn't want city water and sewer. They already have water wells or water service and septic systems, many of those in the audience said.

The letters arrived with maps enclosed showing the CCN area to be encompassed. They gave a Nov. 31 deadline for protesters to file any complaints. However, City Manager Blaine Hinds, at the meeting, said nothing is going to change and explained what those letters were all about.

The letters regarding the CCN for water and sewer are required by the Texas Commission on Environmental Quality because, in August, the city filed an application to expand and part of the city's obligation is to notify property owners in the area of the certificate, he said. Some people didn't get letters because the addresses were incorrect because of the 911 system, Hinds added.

"The reason we filed for a new certificate is that a year ago, Bois MUD filed application that encroached inside the city limits and Bonham has been going through a long procedure to redraw the lines of the application submitted by Bois d' Arc. In order to protect the city's future interest in terms of water and sewer service, we were advised that it was in our best interest to extend our certificate of convenience and necessity out to our extraterritorial jurisdiction limits,

which is the planning area the state provides for each city."

This does not mean the city of Bonham is going to annex the area or that the city is going to require anyone on another water supply to change, he said. "It does not mean the city requires you to get on the sewer system. It only means that if a sewer system is desired, then the sewer has to be connected to the city. There can't be little independent sewer systems out there."

"We are not going to annex anybody," Mayor Roy Floyd told the people. "Don't worry about it. Not in my lifetime is it going to happen. Every city has an extraterritorial jurisdiction, which means, within that limit, we have the authority to do water or sewer. It's always been true in the state of Texas and the smaller water supply corps have usurped that on some occasions because Bonham is not out there serving already. But when they try to get a legal right to do that, we certainly take exception to that. We're not asking any of their people to join us. But if it ever comes up and we decide to go out there, this is our service area."

Hinds said the reason the city got into White Shed's territory is that it's between Lake Bonham and the city and they are trying to have a continuous service area all the way out to Lake Bonham.

Resident Marie Spann asked who sent out the letters and Hinds told her it was a consultant that works for the city. However, he said the city created the mailing list. "We're all sending petitions to Austin," Spann said. "A petition's fine, but it's not going to mean anything because that's not going to happen," Floyd said.

Nettie Mendenhall asked why certain people got letters and others didn't. Commissioner John Burnett told her that unless people have changed their address, they need to change it because the appraisal district is required by law to send out all information based on the information they have and they can't change that address without the property owner's approval.

"If you pass this water-sewer system, we in the outlying houses would be paying for what we're not getting and we would not be getting anything," Mendenhall said. "We have our water wells, septic systems and yet, if you pass this, we're going to be paying taxes and bonds when we're not going to get anything."

Re: Application of City of Bonham to amend CCN No. 11186 and 20460 and to obtain dual Certification with portions of Southwest Fannin County SUD and White Shed Water Supply Corporation and to decertify portions of Bois D' Arc MUD and Ravenna Nunnelee Water Supply Corporation with the Texas Commission on Environmental Quality
To provide water & sewer utility service in Fannin County

Dear Madam or Sir:

Please accept this letter as notice of opposition and a request for a public hearing in Bonham, Texas regarding the above referenced application submitted by the City of Bonham. As a resident living in the area affected by the application submitted by City of Bonham, I believe I deserve a public hearing and a much more detailed explanation of the changes this amendment of the City of Bonham to amend CCN #11186 and 20460 and to obtain dual Certification with portions of Southwest Fannin County SUD and White Shed Water Corporation and to decertify portions of Bois D' Arc MUD and Ravenna Nunnelee Water Supply Corporation with the Texas Commission on Environmental Quality to provide water and sewer utility service in Fannin County would bring to Fannin County.

Respectfully,
