House Bill (HB) 1600 and Senate Bill (SB) 567 83rd
Legislature, Regular Session, transferred the functions
relating to the economic regulation of water and sewer
utilities from the TCEQ to the PUC effective
September 1, 2014.

6-19-14

To Whom Concerns:

In Reference of Texas H2O Inc.
requested review of selling to Agua Texas

My concern is those of us that
have obtained credit from Texas H2O
for services they charged for grinded
will this be honored by
Agua of Texas.

I am not sure that the sale
of Tx H2O to Agua would be any
better - as cost in review of
Agua is noting in the reports on
high charges and poor customer
service in the BBB report -
However, again if Texas H2O does
Sale will I continue to get
the credit of the remaining balance
due from Agua or will Texas H2O
submit a difference check.

Thank you
B. Davis

UTILITIES & DISTRICTS
SECTION

Plumbing Restrictions: The following unacceptable plumbing practices are prohibited by state regulations:

1. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow device.
2. No Cross-Connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device.
3. No connection, which allows water to be returned to the public water supply, is permitted.
4. No pipe or pipe fitting which contains more than 8.0% lead may be used for the installation or repair of plumbing at any connection, which provides water for human use.
5. No solder or flux which contains more than 0.2% lead can be used for the Installation of repair of plumbing at any connection which provides water for human use.

Customers initiating new water service shall provide a completed "Service Inspection Certification" as required by the utility's tariff. The customer must provide a copy of this certificate within 30 days after initiating new service.

The customer shall, at his own expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Utility.

The applicant has been shown a copy of the Utility's Texas Commission on Environmental Quality approved tariff and agrees to pay the rate in the tariff and abide by the requirements in this application. **If the customer fails to comply with the Terms of this contract, the Utility shall, at its option, terminate service or properly inspect, install, test and maintain required equipment and bill the customer.**
