LAW AFFECTS CONFIDENTIALITY OF UTILITY RECORDS

The Texas Legislature passed H.B. 859 to allow various utilities to maintain confidentiality of certain records at the request of the customer. Effective September 1, 1993, H.B. 859 provides that a government operated utility which provides water, sewer, garbage, gas, or electricity for compensation, may not disclose personal information in a customer's account records if the customer requests in writing that the utility keep the information confidential. The utility is required to include with a bill sent to each of its customers a notice of the customer's right to request confidentiality of personal information as well as any applicable fee or form required to comply with such requests. Personal information means an individual's address, telephone number, or social security number. This bill applies to WSC's, cities, districts and all governmental bodies who are subject to the Open Records Act.

Such confidentiality does not prohibit a WSC from disclosing the name and address of each member on a list to be made available to the Corporation's voting members, or their agents or attorneys, in connection with any annual or special meeting of the Corporation's members.

The attached forms are designed for your use and may be copied, customized to your utility's needs, and mailed to each customer as required by law. Note the following instructions:

PROPERTY OWNER'S NAME

LEGAL DESCRIPTION OF
PROPERTY

August Lakes Water Supply Corporation has attempted to acquire an easement for a community water distribution system across your property. It is now necessary to require an easement either be granted or refused by you within thirty (30) days after receipt of this notice. Attached is August Lakes WSC's standard easement form as furnished to us by the Farmers Home Administration. If you are not in agreement to grant easement, sign the middle portion of this document and return it to us, at which time this document will be filed in our office. Failure to return this document or the attached easement will result in a copy of this document being completed and signed by us to keep on file for future reference purposes. Failure to grant easement does not relieve August Lakes WSC of the obligation to serve water to the aforementioned property in the future, but does make the then current property owner, at time of application for water service, responsible for the financial burden of moving the water line from public right-of-way to private right-of-way plus any other normal charges for service. For further clarification, contact our office at 3310 Lakes of Katy Lane, Katy, TX 77493.

I, _____ hereby refuse August Lakes WSC easement for a community water distribution system on the aforementioned property.

I further certify a signed easement or signed refusal of easement was not received within thirty (30) days following receipt by property. I further state under oath that the engineer for the Corporation has furnished the property owner an estimate of cost for rerouting pipeline for which easement was denied to private property.

Capital Recovery Fee

The Corporation shall charge all new connections a Capital Recovery Fee as set by Board of Directors in the approved tariff. The Base Capital Recovery Fee shall be the required contribution for standard service at new location for 5/8" X 3/4" meter. The Base Capital Recovery Fee shall be adjusted for larger meters per AWWA meter equivalency factors approved in tariff. Funds collected through capital recovery fees shall provide funding for new production, storage treatment and pressure capacity construction to meet the additional service demand created by the applicant's proposed service. If new and adequate capacity is already available at the time a new service application is made, the capital recovery fee shall compensate the Corporation for this capacity without burdening other members. Where necessary, the capital recovery fee funds may be used for transmission line upgrades, replacements or installation where such construction will benefit the water system as a whole or significant portion of it. If a developer or other multi-connection service applicant installs production, storage, treatment, pressure or transmission facilities for the benefit of the Corporation, the developer or multi-connection service applicant may receive a reduction in the amount of per connection capital recovery fee they would otherwise pay, as may be approved by the Corporation's Board of Directors, in an amount not to exceed the money value of the original cost of the facilities constructed for the Corporation's benefit.

NOTE: ALTHOUGH AWWA DOES NOT RECOMMEND A CONTINUOUS FLOW OF GREATER THAN 50 PERCENT FOR DISPLACEMENT AND MULTIJET METERS, METER EQUIVALENTS ARE CALCULATED ON A PROPORTIONAL BASIS AND REMAIN THE SAME REGARDLESS OF ALLOWABLE RATES.

These meter equivalency factors shall be subject to change if, in the sole determination of the Corporation's engineer, a particular meter needed to fulfill a service applicant's demands has a higher flow rate than designated by the AWWA. The factors shall also be amended any time the AWWA revises its standards.
