Re: The City of Austin's Water and Sewer Applications for Certificates of Convenience and Necessity

Dear Mr. Howell:

I am writing this letter to express my support for the City of Austin's applications for water and wastewater certificates of convenience and necessity (CCNs). We currently own 700+ acres along F.M. 969, located in the eastern portion of Austin's extraterritorial jurisdiction. We believe that the City would be the best provider of water and wastewater services for our property due to its objective long-term planning, reliability, and lower costs of service. Securing water and sewer service from the City of Austin is very important in assuring a future of quality development in our area.

Again, I would like to express my full support for the City of Austin's water and wastewater CCN's in the areas for which they have applied.

Sincerely,

David M. Hailey
Operations Manager
