Re: Palo Duro Service Company - Public Water System ID No. *Not Assigned*
Proposed New Public Water System
Engineer Contact Telephone: (817) 423-0060
Parker County, Texas

CN: 600640031; RN: Not assigned

Dear Mr. Boomer:

On April 27, 2015, the Texas Commission on Environmental Quality (TCEQ) received your letter dated April 23, 2015, submitting planning material for the proposed water system for the above referenced entity. Based on our preliminary review of the information submitted, this project cannot be reviewed further at this time because it is considered incomplete. Please provide the following additional information on or before 30 days from the date of this letter. Once this information is received, then your project will be considered complete, logged in on that date, and assigned to an engineer for review. If we do not receive **all** the requested information within 30 days, the project will be closed without review and you will be required to resubmit all of the necessary planning materials.

1. TCEQ is not able to download documents from another state agency's website on behalf of an applicant. A business plan is required for all new proposed public water system (PWS) unless the owner of the PWS is a county, political subdivision of the state (district), municipality, non profit water supply corporation incorporated under Chapter 67 of the Texas Water Code or meets one of the other exceptions listed in Title 30 Texas Administrative Code (TAC) Section 290.39(g). Please submit a business plan for the proposed water system which contains all information listed in Title 30 TAC Section 290.39(f)(1) thru (12).
2. All new proposed water systems require two copies of all documents. Please provide an additional set of engineering plans and technical specifications in your next submittal to aid in our review.

3. **TCEQ Core Data Form (Form No. 10400).** The Core Data Form (TCEQ-10400) is part of the TCEQ Central Registry to consolidate information for companies and individuals and their notifications, registrations, licenses, and permits including Public Water Systems (PWS). The completed Core Data form must be reviewed by the Public Drinking Water program before registering a PWS (with the assignment of a PWS identification number) and transferring the registration data to Central Registry. At that time, an individual owner (verified by county appraisal districts at a minimum) or legal entity (must be in Secretary of State) will receive a Customer Number (CN), if it doesn't already have one, and the PWS site will receive a Regulated Entity Number (RN), if it does not already have one.

Please submit the items listed above as soon as possible so that we may complete the review of your project. **These items must be submitted to the Utility Technical Review Team (MC-159) within 30 days or the entire package must be resubmitted for review. We are unable to store incomplete submittals beyond 30 days after the original date of receipt.** Please include the project description, subdivision name, utility name and Plan Review Log Number if assigned with your response.

For future reference, you can review part of the Utilities Technical Review Team's database to see if we have received your project. This is available on the TCEQ's homepage at the following address:

<http://www.tceq.texas.gov/drinkingwater/planrev.html#status>

You can download completion data checklists and the latest revision of Chapter 290 "Rules and Regulations for Public Water Systems" from this site:

<http://www.tceq.texas.gov/drinkingwater/planrev.html>

Mr. William L. Boomer, P.E.
