Dear Mr. Hebert:

Regarding your letter of 31/March 2010, the following action has been taken.

Attached is a letter from Family Rental Service promising a generator should we have a power failure.

A new cover for the pump station has been installed and is ready for your inspection.

Past DMRs back to the time of purchase are attached. The work was done by Dennis Woods, Class B operator, from figures that were collected daily.

We had an employee who was scheduled to take the daily inspection position; however he left to take a better paying job. We do, however, have someone already hired, who is training under Mr. Woods and is scheduled to take the classes provided by the TCEQ.

ALB work completed June 30 - 2010
