Development Incentives in Smart Growth Zones

Fees for projects in areas where development is encouraged are discounted. The percentage of the applicable fee to be charged is described below:

1. In the portion of the Desired Development Zone that is located in the extrajurisdictional jurisdiction: 80%
2. Except as provided in number (3) below, in the portion of the Desired Development Zone that is located in the city limits: 70%
3. In the urban watersheds: 50%

Urban Water Quality Structure Control Fund
Payment in lieu of Structural Water Quality Controls

$$\text{Payment} = (\$32,000 \times A_1 + \$18,000 \times A_2 + \$11,000 \times A_3 + \$8,000 \times A_4 + \$6,000 \times A_5) \times E + \$0.10 \times B + C \times D$$

Where:

- A₁ = Increment of impervious cover from 0 to 1.0 acres,
- A₂ = Increment of impervious cover from 1.01 to 2.0 acres,
- A₃ = Increment of impervious cover from 2.01 to 10.00 acres,
- A₄ = Increment of impervious cover from 10.01 to 20.00 acres,
- A₅ = Impervious cover greater than 20.0 acres,
- B = the gross square footage of the building excluding the first floor,
- C = the site area in acres,
- D = \$6,000 per acre for sites developed for commercial/multi-family use, or \$4,000 per acre for sites developed for single family or duplex residences; and
- E = Construction cost adjustment factor. The construction cost adjustment factor must be calculated annually using the Engineering News Record (ENR) 20 city average Construction Cost index with the base index being the ENR construction cost index of October 2002 (5597). For each fiscal year, the construction cost adjustment factor shall be recalculated in October as the ratio of the then current September ENR Construction Cost index divided by the October 2002 Construction Cost index. This new construction cost adjustment factor shall be applied to all fees collected during that fiscal year.

Impervious cover is the area for which water quality treatment is required pursuant to Section 1.9.2 of the Environmental Criteria Manual. For the purpose of this calculation, impervious cover shall be measured to the nearest 0.01 acre.

Regional Stormwater Management Participation Fees (RSMP)

Each Regional Stormwater Management Program (RSMP) agreement is mutually exclusive. No credit will be given for impervious cover paid for in previous RSMP agreements for subsequent phases of development. However, applicants may combine all related phases of a development into one RSMP agreement and remit the associated total fee at the time the permit for the first phase is approved.

NOTE: Requirements for participation in the Regional Stormwater Management Program are located in Section 8.2.2.D and Appendix D of the Drainage Criteria Manual.

The RSMP fee consists of two components: the construction cost component (CCC) and the land cost component (LCC). The two components are calculated independently for single-family developments and multi-family / commercial developments. Below are the details of how to calculate the fees.

2014-15 Fee Schedule

Amended 2013-14 Approved 2014-15 Change

Watershed Protection Department

1. RSPMP Construction Cost Component (CCC)

The number of impervious acres is used to determine this part of the fee. The number of impervious acres is based on the maximum allowable impervious acreage as allowed by the more restrictive of zoning or watershed ordinance for subdivisions. Site plans may use the actual impervious cover for the site. The construction cost component will be adjusted annually by using the "Engineering News Record" construction cost index with the base construction cost index being referenced to October 2002.

2. RSMP Land Cost Component (LCC)

The land cost component (LCC) is calculated separately for each type of development, in conjunction with the construction cost component.

$$\text{Land Cost Component} = \text{Land Cost per Acre} \times \text{Land Cost Area}$$

where:

$$\text{Land Cost per Acre} = \text{Appraisal District (appraised value / appraised area)} \times 0.05$$

OR = Capped value * 0.05

Capped Land Cost per Acre	Capped Value
Development Type	
Single-Family	\$ 40,000 per acre
Multi-Family / Commercial	\$120,000 per acre

$$\text{Land Cost Area} =$$

$$\text{New Development} = \text{Gross Site Area} - \text{Deductible Areas}$$

$$\text{Redevelopment} = \text{Limits of construction} - \text{Deductible Areas}$$

$$\text{Deductible Areas} = (\text{Drainage Easements, Water Quality Easements, and Conservation Easements})$$

Note: Impervious cover areas within easements cannot be deducted from the land cost area.

Land costs will be based on the land valuation. This may be established by a certified appraiser or by Appraisal Districts. The RSMP applicant must provide the parcel identification number for each parcel within the proposed development prior to RSMP approval. Upon RSMP participation approval, the applicant must provide dated copies of either a certified appraisal or the appraisal district's valuation for each parcel within the proposed development. Properties that are not appraised by Appraisal Districts, such as property owned by a governmental entity, may choose to use the capped land cost per acre values for RSMP participation. The land cost will be determined by the appraised value at the time of payment of the RSMP fee, not when the site is approved for participation in the RSMP. The effective date for Appraisal District valuations is the first of October for the current City of Austin fiscal year.

If a development encompasses more than one tax parcel, the land cost per acre will be based on the arithmetic mean of the land valuation from all parcels.

Exceptions

All Developments

For sites that are in more than one watershed, the calculated RSMP fee will be apportioned by the percentage of the site in each watershed.

Single Family:

Single-family developments may restrict the allowable impervious cover by plat note or by a legally recorded separate instrument if the plat was previously approved.

Fee Reductions for Certain Single Family Developments:

Lot Size (from plat)		Percent Impervious Cover	Pay a Reduced Fee of

Tree Mitigation to Compensate Trees Removed for Development
 Off-Site Tree Planting Fee

\$75.00 per caliper inch \$75.00 per caliper inch

(I) Development incentives in Smart Growth zones:

Fees for projects in areas where development is encouraged are discounted. The percentage of the applicable fee to be charged is described below

1. In the portion of the Desired Development Zone that is located in the extraterritorial jurisdiction: 80%
2. Except as provided in number (3) below, in the portion of the Desired Development Zone that is located in the city limits: 70%
3. In the urban watersheds: 50%

Note that development projects that have had fees determined by the Smart Growth Matrix are not eligible for the above reductions.

Parking Rates for City Facilities

The City manager may set a rate* for public use of a City parking facility in an amount not to exceed:

\$10.00 /vehicle in/out for evening rates	\$10.00 /vehicle in/out for evening rates
\$25.00 /day for day-time rates	\$25.00 /day for day-time rates
\$300.00 /month for day-time contract parking rates	\$300.00 /month for day-time contract parking rates

*The rate must be commercially reasonable with respect to the location of the facility and comparable business practices in the vicinity of the facility;

provided, however that a parking rate may be waived or modified by the city manager:

- (1) To avoid financial hardship to a member of the public in an emergency situation, enhance public convenience, safety, or improve efficiency of a parking facility;
- (2) To comply with the terms of a parking contract authorized by the city council;
- (3) To facilitate public access to city officials and meetings; or,
- (4) To reduce street congestion during significant public events attracting large numbers of people at a venue in the vicinity of a parking facility.

Note: These authorized parking charges apply to City parking facilities unless a fee for a specific event or location is otherwise prescribed in this fee schedule or other ordinance.

Return Check Charges

The Texas Business and Commerce Code allows the City to charge a processing fee for the return of a "payment device" that is defined as any check, item, paper or electronic payment, or other payment device used as a medium for payment.

The Texas Local Government Code allows a service charge for a payment by credit card that is not honored by the credit card company. The City amount of the service charge is the same as the fee charged for the collection of a check drawn on an account with insufficient funds.
