**ORDER NO. 2  
FINDING APPLICATION PACKAGE INCOMPLETE  
AND DEFICIENT; AND ESTABLISHING DEADLINES**

On February 27, 2015, Public Utility Commission of Texas (Commission) Staff filed comments regarding the application package. Commission Staff recommended that Aqua Water Supply Corporation's (Aqua WSC) application be found to be administratively incomplete because the application contains mapping and proposed notice deficiencies. Specifically, the map and notice documents do not contain the same total acreage as the digital data and because the area is not clearly defined, Commission Staff is unable to provide an evaluation regarding neighboring entities within the two-mile buffer. Commission Staff recommended that Aqua WSC not publish notice until the mapping and list of neighboring entities have been reviewed and approved by Commission Staff. Commission Staff represented that Aqua WSC may contact the Commission's mapping staff for mapping and notice assistance regarding this docket.

Commission Staff proposes that Aqua WSC be afforded additional time to cure the mapping and notice deficiencies identified by Commission Staff and that following Aqua WSC's filing, Commission Staff will provide a review and recommendation regarding completeness and/or propose a procedural schedule for further processing.

Consistent with Commission Staff's recommendation, the application package is found to be administratively incomplete and deficient. On or before **April 3, 2015**, Aqua WSC shall amend its application to cure the deficiencies identified by Commission Staff.

On or before **April 17, 2015**, Commission Staff shall file a recommendation regarding administrative completeness of the application and notice and/or propose a procedural schedule.
