## I. INTRODUCTION AND QUALIFICATIONS

| 2  | Q. | PLEASE STATE YOUR NAME, OCCUPATION, AND BUSINESS ADDRESS.                           |
|----|----|---|
| 3  | A. | My name is Chris Ekrut. I am a Director with NewGen Strategies & Solutions, LLC.    |
| 4  |    | (NewGen). My business address is 1300 E. Lookout Dr., Ste. 100, Richardson, Texas   |
| 5  |    | 75082.  |
| 6  | Q. | PLEASE OUTLINE YOUR EDUCATIONAL AND PROFESSIONAL                                    |
| 7  |    | BACKGROUND.   |
| 8  | A. | My educational and professional background are outlined in my professional resume,  |
| 9  |    | herein included as Attachment CDE-1.  |
| 10 | Q. | GENERALLY, WHAT DOES YOUR WORK WITH NEWGEN ENTAIL?                                  |
| 11 | A. | I provide a broad range of consulting services, including, but not limited to:      |
| 12 |    | • Cost of service and rate design studies   |
| 13 |    | Litigation support  |
| 14 |    | System valuations   |
| 15 |    | • Operational and organization studies  |
| 16 |    | Socioeconomic impact analysis   |
| 17 |    | Business Plan development   |
| 18 |    | Program / Project Management  |
| 19 | Q. | ON WHOSE BEHALF ARE YOU PRESENTING TESTIMONY IN THIS                                |
| 20 |    | PROCEEDING?   |
| 21 | A. | I am presenting testimony on behalf of the Office of Public Utility Counsel (OPUC). |
| 22 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE PUBLIC UTILITY                             |
| 23 |    | COMMISSION ON COST OF SERVICE AND/OR RATE MATTERS?                                  |
|    |    |   |

A. No, I have not previously testified before the Public Utility Commission (PUC).
 However, I have filed written direct testimony regarding the development of rates before
 the Texas Commission on Environmental Quality (TCEQ) in Docket No. 2009-0505 UCR. Additionally, Attachment CDE-1 contains a listing of the prior contested cases in
 which I participated but did not submit testimony.

6

## II. <u>PURPOSE AND SCOPE</u>

## 7 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

8 A. My purpose in this proceeding is to provide my recommendations with respect to the 9 reasonableness of Quadvest L.P.'s (Quadvest or the Company) requested increase in 10 water rates and proposed water rate design.

# Q. CAN YOU PLEASE SUMMARIZE THE RECOMMENDATIONS YOU WILL DISCUSS WITHIN YOUR TESTIMONY?

## 13 A. Within my testimony, I will be addressing the following recommendations:

- The Company's request for a Phase II increase of \$368,928 specific to the installation
   of automated meter reading infrastructure be disallowed;
- The Company's requested level of investor supplied capital be reduced in the amount
   of \$219,000 to reflect customer deposits at the end of the test year;
- The Company's requested level of investor supplied capital be further reduced in the
   amount of \$248,222 to reflect the Company's accumulated deferred federal income
   tax balances as of the end of the test year;

| 1  |    | • The Company's requested level of operations and maintenance expenses be reduced           |
|----|----|---|
| 2  |    | in the amount of \$39,793 to remove rate case expenses; and,                                |
| 3  |    | • The Company's proposed rate design should be modified consistent with my                  |
| 4  |    | testimony.  |
| 5  | Q. | PLEASE SUMMARIZE THE OVERALL IMPACT OF THE ADJUSTMENTS TO                                   |
| 6  |    | THE COMPANY'S REVENUE REQUIREMENT RESULTING FROM YOUR                                       |
| 7  |    | <b>RECOMMENDATIONS?</b>   |
| 8  | A. | The Company has requested a total revenue requirement of \$7,044,989. As illustrated in     |
| 9  |    | Schedule CDE-1, my recommendations result in a reduction of \$464,458 from the              |
| 10 |    | Company's requested revenue requirement. This is a reduction of approximately 6.59%         |
| 11 |    | from the requested test year amount.  |
| 12 |    | III AUTOMATED METED DE ADINO DEOLIEOT   |
| 12 |    | III. <u>AUTOMATED METER READING REQUEST</u>   |
| 13 | Q. | PLEASE SUMMARIZE YOUR UNDERSTANDING OF QUADVEST'S   |
| 14 |    | REQUEST TO INCLUDE AUTOMATED METER READING INVESTMENT?                                      |
| 15 | A. | As a part of this application, Quadvest is requesting over \$2 million to complete the      |
| 16 |    | deployment of automated meter readers (AMR) within its various systems. As stated in        |
| 17 |    | the Direct Testimony of Company Witness Charles Loy, Quadvest "is proposing as part         |
| 18 |    | of this filing to include these capital costs as a known and measureable adjustment to test |
| 19 |    | year costs; however, it is proposing to defer the effective date of the portion of the rate |
|    |    |   |

.

<sup>1</sup> Direct Testimony of Charles E. Loy, CPA, Page 6 (Bates Page 8), Lines 1 through 7.

these advanced meters have already been deployed at a number of systems, including
 Bauer Landing, Bella Vista, Magnolia Lakes, and Waterstone.<sup>2</sup> Thus, Quadvest's request
 relates only to those AMR's that have not yet been installed.

4 Q. HOW MUCH OF QUADVEST'S REQUESTED REVENUE REQUIREMENT
5 INCREASE IS COMPRISED OF THE INCLUSION OF AMR?

A. As illustrated in the application at Bates Page 22, Point (c), the inclusion of the AMR is
 attributable to approximately \$368,928, or 36.82%, of the requested increase in annual
 revenue, inclusive of impacts to the requested return, income taxes, and operating
 expenses.

# 10 Q. DO YOU AGREE WITH THE INCLUSION OF THE AMR SYSTEM IN THE 11 COMPANY'S REQUEST?

12 A. No, I do not.

## 13 Q. PLEASE EXPLAIN.

A. Section 13.183 of the Texas Water Code (TWC) requires that invested capital be "used and useful in rendering service to the public." Additionally, the PUC Substantive Rules in effect at the time the application was filed require, at 16 TAC §24.31(b), that rates be based on a historical test year "that ended less than 12 months" before the effective date of the rates. These same rules, at 16 TAC §24.31(c)(2)(A), echo the provision of TWC §13.183 that plant investment can only be included in rate base to the extent such investment was "used and useful to the utility in providing service." The Company

<sup>&</sup>lt;sup>2</sup> See WP/5.2, which states that "# of meters excludes [sic] Bauer Landing, Bella Vista, Magnolia Lakes & Waterstone as already have AMR as of the end of test year."

1 concedes that the requested AMR investment is not used and useful. Mr. Loy testifies 2 that the "AMR was not used and useful at the time of the filing of this case."<sup>3</sup> As such, 3 the requested AMR system should not be included within rate base. The Company's 4 commitment to defer this portion of the increase until such time as the plant is used and 5 useful is simply not consistent with ratemaking principles that require rates to be based 6 upon an historical test year for plant that is used and useful in serving the public.

# Q. HAS THE COMPANY IDENTIFIED ANY OTHER LAW OR RULE THAT ALLOWS A WATER UTILITY TO COLLECT OR SECURE THE COST OF AMR INVESTMENT BEFORE SUCH INVESTMENT IS USED AND USEFUL?

10 A. No. Chapter 13 of the Texas Water Code does not address or allow for the collection of 11 revenues for the installation of advanced water meters, much less prior to their 12 installation. This contrasts with the treatment of advanced meters for electric utilities, for 13 which a specific law (See PURA §39.107(h) and 16 TAC §25.130) authorizes the 14 collection of a surcharge for advanced meters. To my knowledge, no such allowance 15 exists in the Water Code or in Chapter 24 of the Commission's rules.

I would note that TWC §13.183(b) does allow the Commission to authorize the collection of additional revenues for customers specific to capital improvements "necessary to provide facilities capable of providing adequate and continuous utility service." In the event such treatment is authorized, these revenues are to be considered "contributed capital or contributions in aid of construction and may not be included in invested capital, and depreciation expense is not allowed." In this case, the Company has

<sup>3</sup> Direct Testimony of Charles E. Loy, CPA, Page 10 (Bates Page 12), Lines 11 through 17.

not requested the granting of such additional revenues under this provision, nor has the
 Company proven that the AMR investment is essential to the provision of continuous and
 adequate service to its customers. Finally, had the Company made this request, and were
 it granted, the funds would be considered contributed capital and the Company's
 adjustment to annual depreciation, return, and taxes would not be allowed.

# 6 Q. ARE THERE ANY EXCEPTIONS TO THE USED AND USEFUL 7 REQUIREMENT THAT WOULD ALLOW A UTILITY TO INCLUDE PLANT 8 INVESTMENT IN RATE BASE THAT IS NOT IN SERVICE?

9 A. No. The Commission's rules, as they existed at the time the application was filed, 10 include no exception to allow into rate base plant that is not used and useful, unless such 11 plant was considered construction work in progress (CWIP). However, the rules further 12 recognized that inclusion of CWIP, to the extent it is permitted, constituted an "exceptional circumstance," and the burden of proof for inclusion of such plant items was 13 14 substantial. Because the rules in effect at the time the application was filed do not permit 15 a post-test year adjustment, and because the Company has not requested CWIP, (nor 16 submitted evidence supporting such a request), the Company is not entitled to set rates 17 for future AMR costs.

The Company may argue that the Commission's new rules applicable to water providers, as amended on September 13, 2015, do contain an exception for post-test year adjustments. However, those rules are not applicable to this case, and even if the Commission were to consider the Company's request under the new rules, Quadvest is not entitled to recovery.

| 1  |    | Section 24.31(c)(5) of the rules, as amended, allows for a post-test year              |
|----|----|--|
| 2  |    | adjustment to historical test year data for known and measureable rate base additions. |
| 3  |    | Specifically, the rule states that the additions may only be considered if:            |
| 4  |    | (i) the addition represents plant which would appropriately be recorded for            |
| 5  |    | investor-owned water or wastewater utilities in NARUC account 101 or                   |
| 6  |    | 102;   |
| 7  |    | (ii) the addition comprises at least 10% of the water or wastewater utility's          |
| 8  |    | requested rate base, exclusive of post-test year adjustments and CWIP:                 |
| 9  |    | (iii) the addition is in service before the rate year begins; and,                     |
| 10 |    | (iv) the attendant impacts on all aspects of a utility's operations (including but     |
| 11 |    | not limited to, revenue, expenses, and invested capital) can with                      |
| 12 |    | reasonable certainty be identified, quantified and matched. Attendant                  |
| 13 |    | impacts are those that reasonably result as a consequence of the post-test             |
| 14 |    | year adjustment being proposed.  |
| 15 | Q. | DOES THE COMPANY'S REQUEST MEET EACH OF THE TESTS OUTLINED                             |
| 16 |    | ABOVE?   |
| 17 | A. | No. I would note that each of the above requirements must be met, and failure to       |
| 18 |    | establish any one of the requirements results in disallowance of the post-test year    |
| 19 |    | adjustment. In this instance, the Company fails to meet all of the requirements of the |
| 20 |    | newly adopted rule.  |
|    |    |  |

Redacted Direct Testimony of Chris Ekrut On Behalf of the Office of Public Utility Counsel SOAH Docket No. 473-16-1848.WS; PUC Docket No. 44809 Page 7 of 42

| 1  | With reference to Item (i), NARUC Account 101 includes "the original cost of                         |
|----|--|
| 2  | utility plant owned and used by the utility in its utility operations." <sup>4</sup> While the meter |
| 3  | investment as a post-test year adjustment could be booked into Account 101 as plant if it            |
| 4  | were purchased and in service subsequent to the test year and before the rate year, the              |
| 5  | Company's proposed AMR investment does not meet the "owned and used by the utility"                  |
| 6  | criterion. In the case of the AMR request, the full amount of the plant investment has not           |
| 7  | been made and the system cannot said to be "owned" by the utility, nor is it all currently           |
| 8  | used by the utility in current operation, as testified to by Mr. Loy. As such, the                   |
| 9  | Company's request, to the extent the AMR meters have not been purchased and installed,               |
| 10 | cannot be included in Account 101. Only AMR meters that have been purchased and are                  |
| 11 | currently in service, subsequent to the Test Year, would meet the test in Item (i).                  |
| 12 | With respect to Item (ii), the Company's requested level of rate base, or investor                   |
| 13 | supplied capital as noted in 16 TAC §24.31(c)(2), was \$14,194,706. When the AMR                     |
| 14 | investment of \$2,070,410 is excluded as a post-test year adjustment, rate base is reduced           |
| 15 | to \$12,124,296. When the AMR Investment is then considered as a percentage of this                  |
| 16 | figure, the result is approximately 17%. As such, the Company's request appears to meet              |
| 17 | the 10% threshold outlined in Item (ii).   |
| 10 |  |

- 18 19
- Item (iii) requires that the plant be in service before the beginning of the rate year, that is, the effective date of the rate increase. Quadvest's requested increase was

<sup>&</sup>lt;sup>4</sup> National Association of Regulatory Commissioners, Uniform System of Accounts for Class A Water Utilities, 1996 (emphasis added). (NARUC's classification of water systems is based on level of revenue as opposed to connection count. Quadvest's level of revenue classifies it as a Class A utility in the application of the standard Chart of Accounts).

| 1  |    | effective on August 8, 2015. As such, the rate year began on August 8, 2015 and the             |
|----|----|---|
| 2  |    | AMR investment would have to have been in service before that date for it to qualify as a       |
| 3  |    | post-test year adjustment under the new rule. However, the Company's requested level            |
| 4  |    | of AMR investment was not in service prior to the August 8 <sup>th</sup> effective date and the |
| 5  |    | commencement of the rate year. As such, the Company's request does not meet the test            |
| 6  |    | outlined in Item (iii).   |
| 7  |    | Finally, with regards to Item (iv), the revised rules require that all attendant                |
| 8  |    | impacts have to be identified, quantified, and matched. The Company has failed to               |
| 9  |    | consider, for example, the retirement and salvage value of existing meters and changes in       |
| 10 |    | customer service operations and maintenance expenses.   |
| 11 | Q. | DO YOU HAVE SOME EXAMPLES OF COSTS THAT THE COMPANY HAS   |
| 12 |    | NOT IDENTIFIED, QUANTIFIED OR MATCHED?  |
| 13 | A. | Yes. There are some obvious examples of attendant impacts that the Company has failed           |
| 14 |    | to identify, quantify, and match. For example, the Company admits that an adjustment to         |
| 15 |    | net plant of approximately \$110,000 would be needed to reflect the retirement of current       |
| 16 |    | meters after the transition to AMR. <sup>5</sup> In addition, Quadvest indicates that a further |
| 17 |    | adjustment would also be needed to reflect salvage value on existing meters. <sup>6</sup> There |
| 18 |    | would presumably be other impacts such as changes in customer service expense, labor            |
| 19 |    | expense, and changes to operational costs associated with meter maintenance. Therefore,         |

<sup>&</sup>lt;sup>5</sup> Quadvest Response to OPUC RFI 4-10(a).

<sup>&</sup>lt;sup>6</sup> Quadvest Response to OPUC RFI 4-10(b).

1

2

as demonstrated by these examples, the Company has failed to comply with the Commission's directive to identify, quantify, and match all attendant impacts.

Further, the Company states that "The AMR project will result in a cost to the customer but we believe this cost in the long term will allow us to provide better customer service, promote water conservation, and potentially realize some operational efficiency."<sup>7</sup> But these benefits identified by the Company, apart from being highly speculative, are not quantified or matched.

8 Quadvest has only recognized that there will be a reduction in third-party meter 9 reading expense associated with the installation of the AMR system. This is a reduction 10 in operations and maintenance expense of \$82,149 coupled with a proposed increase in 11 annual cost of \$451,076.<sup>8</sup> Apart from the single decrease to operations and maintenance 12 expense, and the associated increases to the requested return and depreciation expense, 13 the Company has clearly failed to recognize the additional attendant impacts associated 14 with a conversion to AMR technology.

Given the Company's inability to meet all of the criteria of the new post-test year adjustment rule, the requested AMR investment not only fails the used and useful requirement under the TWC and PUC substantive rules, it also fails to meet the requirements of post-test year adjustment were it to be considered under the Commission's revised rules.

<sup>&</sup>lt;sup>7</sup> Quadvest Response to Staff RFI 1-43(i).

<sup>&</sup>lt;sup>8</sup> Bates Page 22, Point (c).

# 1Q.DO YOU AGREE WITH QUADVEST'S CHARACTERIZATION THAT THE2AMR IS A KNOWN AND MEASUREABLE CHANGE?

3 A. No, I do not.

4 Q. PLEASE EXPLAIN.

5 A. First, known and measureable changes generally are applied to expense items, not rate 6 base. PUC Substantive Rule §23.31(b) states with regards to allowable expenses, "only 7 the utility's historical test year expenses as adjusted for known and measureable changes 8 may be considered." Adjustments to rate base are better characterized as post-test year 9 adjustments for which there was no provision under the rules of the Commission at the 10 time the application was filed. In the case of the Company's requested increase to annual 11 depreciation expense, which could be considered a known and measureable change, this 12 adjustment is requested based on plant that is not used and useful. Given that the AMR 13 system fails to meet this most basic requirement, there is not an allowable known and 14 measureable change to depreciation expense specific to annual depreciation. Whether the 15 adjustments are made to expense or rate base, the adjustments requested by the Company 16 simply do not meet the known and measureable standard.

# 17 Q. WHAT IS CONTEMPLATED BY THE KNOWN AND MEASURABLE 18 STANDARD?

A. As recognized in the treatise "Accounting for Public Utilities," known and measurable
 changes are certainly recognizable, "but only when they are known with *an absolute*

finality and measurable by some explicit test year activity."<sup>9</sup> The Company's own 1 witness, Mr. Loy, also testifies that known and measurable changes must be "reasonably 2 certain and not speculative."<sup>10</sup> Finally, the Commission's own rules, as revised, provide 3 an additional standard for what constitutes a known and measureable change. Section 4 24.3(33) states that for a change to be known and measureable it must be "verifiable on 5 6 the record as to amount and certainty of effectuation. Reasonably certain to occur within 12 months of the end of the test year."<sup>11</sup> Though not in effect at the time this application 7 8 was filed, this definition is instructive as to the level of certainty contemplated by the 9 phrase.

# 10Q.WHY DOES THE COMPANY'S REQUEST FOR AMR NOT MEET THE11KNOWN AND MEASURABLE STANDARD?

A. From the information contained within the application and subsequent discovery responses, it is clear that the Company's request for AMR does not meet the level of certainty required to be considered a known and measureable change. The Company admits that its request was based on "management's best estimate at the time."<sup>12</sup> For example, while the Company did not provide any documentation as part of its direct case, it has provided through discovery an *estimation* of the costs derived from its agreement with HydroPro Solutions LLC. However, this agreement was executed several months

<sup>&</sup>lt;sup>9</sup> Robert L Hahne and Gregory E. Aliff, "Accounting for Public Utilities", §7.05 Pro Forma Adjustments to the Test Year Data, Page 7-10; Rel. 2-10/85 Pub. 016 (emphasis added).

<sup>&</sup>lt;sup>10</sup> Direct Testimony of Charles E. Loy, CPA, Page 15 (Bates Page 17), Lines 10 through 13.

<sup>&</sup>lt;sup>11</sup> 16 TAC § 24.3(33).

<sup>&</sup>lt;sup>12</sup> Quadvest Response to OPUC RFI 3-1.

| 1                          |    | after the filing of the Company's rate case. <sup>13</sup> Furthermore, this agreement is not an  |
|----------------------------|----|---|
| 2                          |    | either within or  |
| 3                          |    | subsequent to the test year and contains conditions that the Company has not, and cannot,   |
| 4                          |    | meet.   |
| 5                          | Q. | PLEASE EXPLAIN WHY THE TERMS OF THE AGREEMENT DO NOT MEET   |
| 6                          |    | THE KNOWN AND MEASURABLE STANDARD.  |
| 7                          | A. | The price for purchase and installation, the timing of installation, and the very nature of   |
| 8                          |    | the agreement itself is tentative and subject to change and, therefore, is not "reasonably  |
| 9                          |    | certain." First, Quadvest indicates that, based on Task Orders signed with HydroPro   |
|                            |    |   |
| 10                         |    | Solutions, LLC,   |
| 10<br>11                   |    | Solutions, LLC,   |
|                            |    |   |
| 11                         |    |   |

<sup>16</sup> Ibid.

<sup>&</sup>lt;sup>13</sup> Quadvest Confidential Response to OPUC RFI 3-1(b).

<sup>&</sup>lt;sup>14</sup> Quadvest Confidential Response to OPUC RFI 3-1(a).

<sup>&</sup>lt;sup>15</sup> Quadvest Confidential Response to OPUC RFI 3-1(b).

the pricing provided. Given the above, the cost of the investment is clearly not a known
 condition at this time.

# 3 Q. ARE THERE ADDITIONAL REASONS WHY THE COMPANY'S REQUEST 4 FOR AMR IS NOT KNOWN AND MEASURABLE?

5 A. Yes. The Company has made it clear that it will not proceed with the project without 6 prior Commission approval. Quadvest witness Mr. Eastman states that the completion of the AMR project "is dependent upon the finalization of this rate case . . . "<sup>17</sup> Mr. Eastman 7 8 further states that if the Company's request for inclusion of the AMR through the 9 approval of the Phase II increase is not approved, "then Quadvest would have to 10 reevaluate the timely and overall scope of the AMR project (most likely delaying and reducing the overall scope of AMR project)."<sup>18</sup> Finally, Mr. Eastman indicates that the 11 12 third phase of the Company's AMR migration strategy is dependent "upon obtaining assurance that we can immediately start to recover investment."<sup>19</sup> Mr. Eastman's 13 14 responses make it clear that the only way the AMR project will move forward at the 15 requested level of plant investment included in the application will be if the Commission 16 approves the Company's request.

# 17 Q. IS THE NEED FOR PRIOR COMMISSION APPROVAL REFLECTED IN 18 QUADVEST'S AGREEMENT WITH HYDROPRO SOLUTIONS?

<sup>&</sup>lt;sup>17</sup> Quadvest Response to Staff RFI 1-43.

<sup>&</sup>lt;sup>18</sup> Quadvest Response to OPUC RFI 2-13.

<sup>&</sup>lt;sup>19</sup> Quadvest Response to OPUC 4-13(a).

This provision, along with the Company's own admission that the
investment may not happen as anticipated, further demonstrates that the AMR investment
is not a known change. Under Mr. Loy's own standard, a known and measureable
change cannot be speculative. The testimony by the Company indicates that the
investment in AMR is, at best, speculative and dependent on the final action of the
Commission in this proceeding.<sup>21</sup>

# Q. YOU STATED EARLIER THAT THE COMPANY HAS PREVIOUSLY DEPLOYED SOME AUTOMATED METERS. CAN YOU PLEASE DESCRIBE THE LEVEL OF INVESTMENT THE COMPANY HAS MADE SO FAR?

A. The Company's documented activity within the test year and subsequent to the test year with regards to AMR investment appears to be minimal. According to the Company's application, the Bauer Landing (237 meters), Bella Vista (256 meters), Magnolia Lakes (292 meters), & Waterstone Systems (75 meters) already have AMR installed as of the end of the test year. This results in an estimated 860 AMR meters already installed in Quadvest systems. Comparing this figure to the estimated 10,152 meters within the meter listing provided in response to OPUC RFI 2-9, this results in the Company needing

1

2

3

A.

<sup>&</sup>lt;sup>20</sup> Quadvest Confidential Response to OPUC RFI 3-1(b).

<sup>&</sup>lt;sup>21</sup> Direct Testimony of Charles E. Loy, CPA, Page 15 (Bates Page 17), Lines 10 through 13.

to replace 9,292 meters, or over 91% of the Company's meters, prior to implementing
 Phase II of the requested increase.

# Q. WHAT IS YOUR CONCLUSION REGARDING THE COMPANY'S REQUEST FOR AMR?

5 A. Given the minimal investment in AMR infrastructure that has occurred to-date, the 6 changing and uncertain nature of the estimate of the costs associated with the AMR 7 investment, the lack of supportive documentation provided in the application, and the 8 Company's response that the requested investment will only occur with full Commission 9 approval of the Company's request, the requested AMR investment does not constitute a 10 truly known and measurable condition. The amount of the investment is not verifiable 11 with currently available documentation and the Company has admitted that the requested 12 level of investment is a "best estimate"<sup>22</sup>

Finally, the certainty of the investment within 12 months of the end of the test year is clearly not known. The AMR investment clearly 15 does not meet the accepted standard of a known and measureable change.

In summary, the Company's requested AMR investment fails to meet the test of used and useful plant investment during the test year; fails to qualify for a post-test year adjustment, if one could be considered under the law governing this application, as the Company has, among other things, failed to identify, quantify, and match all attendant impacts associated with the AMR investment; and it cannot reasonably be characterized as a known and measureable change due to the uncertainties associated with the

<sup>22</sup> Quadvest Response to OPUC RFI 3-1.

investment. Given the above, it is clear that the Company has failed to meet its burden of
 proof on this issue and the inclusion of the AMR system within the Company's revenue
 requirement, and implemented through a Phase II rate, should be disallowed.

# 4 Q. DO YOU BELIEVE THAT THE AMR PROJECT WOULD NEVERTHELESS BE 5 IN THE PUBLIC INTEREST?

6 No. The Company has not shown that the economic benefits of the AMR investment to A. customers outweigh, or are at least equal to, the costs. The Company's proposal as 7 contained in the application is to increase costs to ratepayers by a net amount of \$368,928 8 annually. Assuming that there are no additional benefits of the proposed system, the 9 10 level of benefit to customers compared with the additional annual cost calls into question the overall prudency of the AMR investment. While Mr. Eastman states the AMR 11 investment will lead to a "better customer service experience,"23 and Mr. Loy states that 12 the AMR investment will be beneficial to Quadvest's customers,<sup>24</sup> neither witness 13 14 provides any further discussion or quantification of these benefits and how said benefits justify a monthly, per customer increase in rates of roughly \$3.49 (\$368,928 / 8,811 15 16 connections / 12 months) or approximately \$2.56 per meter equivalent (\$368,928 / 17 143,856 test year meter equivalents). Further, Mr. Eastman admits that, beyond the reduced cost for third party meter reading, there "is no additional quantifiable cost 18 19 reduction provided by AMR meters."<sup>25</sup> While Mr. Eastman does state that the

<sup>&</sup>lt;sup>23</sup> Direct Testimony of Jeffrey Eastman, Page 8 (Bates Page 10), Line 13.

<sup>&</sup>lt;sup>24</sup> Direct Testimony of Charles E. Loy, CPA, Page 6 (Bates Page 8), Line 14.

<sup>&</sup>lt;sup>25</sup> Quadvest Response to OPUC RFI 4-12.

investment "should allow Quadvest to slow the need for additional headcount,"26 this 1 level of cost avoidance is not certain and no attempt is made by the Company to quantify 2 this impact. Without demonstration of further benefit, I cannot see how the AMR 3 investment proposed by the Company could be considered to be in the best interest of the 4 5 Company's ratepayers.

6

Moreover, the Company states that it will depreciate the AMRs over a 10 year period<sup>27</sup>, which indicates a 10 year useful life. In contrast, the Company's current meters 7 mostly carry a 20-year service life.<sup>28</sup> Presumably, this 10-year service life is based on 8 <sup>29</sup> It is not cost effective for the Company to install 9 AMRs at a substantial increase in costs to customers, especially when these meters carry 10 11 a lesser service life than the Company's existing investment.

12 The differential in service lives notwithstanding, at a simplistic level and ignoring the impact of inflation, the Company is proposing over a 10-year period to save 13 approximately \$821,000 (\$82,149 x 10 years) in third-party meter reading expense while 14 15 charging customers over \$2 million in depreciation expense, not to mention additional charges for return on investment and income taxes. Spending \$2 million to save 16 \$821,000 over 10 years does not make economic sense. The system will never pay for 17 18 itself regardless of the assumed service life as the increase in costs associated with the

<sup>&</sup>lt;sup>26</sup> Ibid.

<sup>&</sup>lt;sup>27</sup> Quadvest Response to Staff RFI 1-43(i).

<sup>&</sup>lt;sup>28</sup> Response to OPUC 4-10(c).

<sup>&</sup>lt;sup>30</sup> Robert L Hahne and Gregory E. Aliff, "Accounting for Public Utilities", §4.04[11][e] Customer Deposits, Page 4-44; Rel. 2-10/85 Pub. 016.

system are so much greater than the offsetting reductions. Customers are better off
paying for third-party meter reading as it recognizes the best economic option. Clearly,
the requested AMR investment is not in the best interest of ratepayers and should be
disallowed by the Commission.

 5
 IV.
 OTHER RECOMMENDED ADJUSTMENTS TO INVESTOR SUPPLIED

 6
 <u>CAPITAL</u>

# 7 Q. DO YOU HAVE OTHER RECOMMENDED ADJUSTMENTS TO THE 8 COMPANY'S REQUEST?

9 A. Yes. I recommend that the Company's rate base be reduced to remove customer
10 deposits. PUC Substantive rules at 16 TAC §24.31(c)(3)(v) require that "other sources of
11 cost-free capital" be excluded from rate base. One such example of cost free capital is
12 customer deposits. As noted in "Accounting for Public Utilities," customer deposits are
13 "similar in nature to customer advances for construction . . . Like customer advances, the
14 deposits are available to the utility for use in support of its rate base investment."<sup>30</sup>

According to its tariff contained within the application, Quadvest requires customers who "cannot establish credit to the satisfaction of the utility"<sup>31</sup> to pay a deposit. The tariff also requires refund of the deposit "plus interest for any customer who has paid 18 consecutive billings without being delinquent."<sup>32</sup>

<sup>&</sup>lt;sup>30</sup> Robert L Hahne and Gregory E. Aliff, "Accounting for Public Utilities", §4.04[11][e] Customer Deposits, Page 4-44; Rel. 2-10/85 Pub. 016.

<sup>&</sup>lt;sup>31</sup> Water Utility Tariff for Quadvest, L.P., Tariff Page 2 (Bates Pages 96), Section 2.04.

<sup>&</sup>lt;sup>32</sup> Ibid, Tariff Page 2a (Bates Page 97).

# 1Q.WHAT ADJUSTMENT ARE YOU RECOMMENDING SPECIFIC TO2CUSTOMER DEPOSITS?

A. I recommend that a reduction in the amount of \$219,000 be made to the Company's
 requested rate base, with a corresponding increase of \$197 made to the utility's overall
 revenue requirement reflective of interest expense within the test year related to deposits.

## 6

# Q. PLEASE EXPLAIN YOUR RECOMMENDATION.

Given that the utility pays interest on customer deposits, two alternative methods can be
utilized to properly reflect customer deposits. As noted in Accounting for Public
Utilities, "The liability may be deducted from the rate base with the associated interest
included as a component of the cost of service, or the liability may be included in the
capital structure for purposes of calculating the allowed rate of return."<sup>33</sup>

In reviewing the application at Page 11, Table IV.D (Bates Page 63) it does not appear that the Company has included customer deposits within the capital structure. As such, I recommend utilizing the first method referenced above – that is, removing the customer deposits from rate base while including the associated interest within the cost of service.

According to the Company's response to OPUC Request for Information 2-12, as of test year end, the Company had approximately \$219,000 in outstanding customer deposits. According to the Commission's listing of historical interest rates for 2014, the

<sup>&</sup>lt;sup>33</sup> Robert L Hahne and Gregory E. Aliff, "Accounting for Public Utilities", §4.04[11][e] Customer Deposits, Page 4-44; Rel. 2-10/85 Pub. 016.

applicable interest rates for customer deposits during the test year was 0.09%.<sup>34</sup> I would
 note that these historical interest rates are reflective of the substantive rules applicable to
 electric providers; however, for purposes of this analysis I assume that the same or
 similar interest rate would also be reasonable for water providers.

5 Based on the assumptions above, Column D of Schedule CDE-1 reflects my 6 recommended adjustment to the Company's requested rate base specific to customer 7 deposits, and the resulting impact on the Company's requested revenue requirement. In 8 total, my adjustments reflect a \$25,745 reduction in the Company's requested revenue 9 requirement.

# 10Q.WHAT OTHER ADJUSTMENTS DO YOU BELIEVE ARE WARRANTED TO11THE COMPANY'S REQUESTED LEVEL OF INVESTOR SUPPLIED12CAPITAL?

13 I recommend that an additional reduction in rate base be made to remove accumulated A. deferred federal income taxes. As noted in PUC Substantive Rule § 24.31(c)(3)(i), 14 accumulated deferred federal income taxes (ADFIT) must be deducted from rate base as 15 . 16 it also represents a source of cost free capital for the utility. Within the Company's FY 2014 Consolidated Financial Statements<sup>35</sup>, they indicate **Example** in deferred tax 17 18 liabilities at the corporate level. Given that the Company has not provided the level of 19 ADFIT applicable to water utility operations, I have allocated this amount to the water 20 utility reflective of the percentage of total water plant in service at the end of the test year

<sup>&</sup>lt;sup>34</sup> https://www.puc.texas.gov/industry/electric/reports/HRates/HistRates.pdf.

<sup>&</sup>lt;sup>35</sup> Quadvest Confidential Response to Staff RFI 1-15.

| 1  |                 | as compared to the Company's reported level of total property, plant and   |
|--|-----------------|--|
| 2  |                 | equipment in service <b>equipment</b> . This results in ADFIT attributable to the water  |
| 3  |                 | utility of approximately   |
| 4  |                 | allocation factor is reasonable, due to the fact that that the accelerated tax depreciation on   |
| 5  |                 | plant is one of the primary drivers of ADFIT.  |
| 6  | Q.              | WHAT ADJUSTMENT TO THE COMPANY'S REQUESTED REVENUE   |
| 7  |                 | REQUIREMENT RESULTS FROM YOUR CALCULATED LEVEL OF ADFIT?   |
| 8  | A.              | Column E of Schedule CDE-1 illustrates the impact of my adjustment for ADFIT on the  |
| 9  |                 | Company's requested revenue requirement. In summary, my adjustment result in a   |
| 10   |                 | reduction in the Company's requested revenue requirement.  |

•

incurred in furnishing normal utility service" should be included as an allowable expense.
 To the extent the utility does not incur this amount annually going forward, then the
 utility's rates, inclusive of such expenses, would allow recovery of revenue at a rate that
 is higher than expenses under normal conditions.

5 Further, the Company's proposed treatment of these expenses results in their 6 inclusion within the calculation of working capital. As such, the Company would not 7 only be recovering the expense, but also a return on 1/8<sup>th</sup> of these expenses. Given these 8 factors, it is my opinion that these expenses are better included within a surcharge as 9 opposed to the revenue requirement.

# 10 Q. WHAT IS THE IMPACT ON THE UTILITY'S REVENUE REQUIREMENT OF 11 YOUR RECOMMENDATION?

A. As illustrated in Column F of Schedule CDE-1, the removal of rate case expenses, and
 associated change in working capital, results in a total reduction in the Company's
 requested revenue requirement of \$40,382.

15

## VI. <u>RATE DESIGN</u>

# 16 Q. MR. EKRUT, CAN YOU PLEASE SUMMARIZE YOUR UNDERSTANDING OF 17 THE COMPANY'S REQUESTED RATE DESIGN?

A. Based on my review of the filing, the Company is proposing to utilize a consolidated rate
 structure for all of its systems. Within this consolidated rate structure, the Company is
 proposing a two-part rate structure. The first part of the rate structure consists of a fixed,
 monthly meter charge which increases based on the size of the meter using the

| 1 | Commission's standard meter equivalency factors. The second part of the rate structure        |
|---|---|
| 2 | consists of a volumetric charge which utilizes an inclining-block rate structure, that is, as |
| 3 | a customer utilizes more water the per unit charge for water increases through a series of    |
| 4 | defined consumption blocks.   |

- <sup>5</sup> Q. WHAT CONCLUSIONS HAVE YOU DRAWN FROM YOUR REVIEW OF THE
   <sup>6</sup> COMPANY'S REQUESTED RATE DESIGN?
- A. Overall, I believe that the Company's proposed rate structure is reasonable. However, I
  disagree with the Quadvest witness Mr. Loy's recommendation to reflect the entire
  increase in the fixed charge: "the proposed rate design adds the proposed increase to the
  meter base charges."<sup>36</sup>

# 11 Q. PLEASE EXPLAIN WHY YOU DISAGREE WITH THE COMPANY'S 12 REQUEST TO INCLUDE THE ENTIRE INCREASE WITHIN THE METER 13 BASE CHARGES?

14A.As testified to by Mr. Loy, some of the benefits of consolidated pricing include the15reduction of rate shock and increasing the affordability of service to customers of smaller16systems.<sup>37</sup> Despite these benefits, the immediate movement and alignment of customers17under a consolidated rate structure can have extreme impacts on the monthly bills of18customers whose current rates vary greatly from the proposed consolidated rates. For19example, in this case, the Company's Phase I rate request proposes to increase the20monthly bill to a 10,000 gallons customer on the Bayer Utilities system from \$41.90 to

<sup>&</sup>lt;sup>36</sup> Direct Testimony of Charles E. Loy, CPA, Page 25 (Bates Page 27), Lines 9 through 10.

<sup>&</sup>lt;sup>37</sup> Direct Testimony of Charles E. Loy, CPA, Page 23 (Bates Page 25), Lines 19 through 20.

1

\$72.95 a month. This is a monthly increase of \$31.05, or over 74%. On an annual basis, this would increase this example customer's household budgeted expense by over \$372.

23

4

5

6

7

Given the extreme impacts that will be experienced by some of Quadvest's customers associated with the proposed consolidated rate structure, every step should be taken to mitigate this impact by giving customers as much control as possible over the charges they incur on a monthly basis. By recovering the entire increase in the meter base charge, customers have minimal control on the level of increase they experience.

# 8 Q. HOW MUCH OF THE COMPANY'S REVENUE REQUIREMENT APPROVED 9 BY THE COMMISSION SHOULD BE INCLUDED WITHIN THE BASE METER 10 CHARGE?

I believe that, at most, 60.61% of the Company's revenue requirement should be 11 Α. 12 recovered in the base meter charge. Within the Company's application, they have assumed a standard 67% of expenses as fixed and recoverable within the base meter 13 14 charge. This is the alternative allocation method that has historically been allowed. 15 However, the standard method historically allowed is based on the percentage of costs designated as "fixed" for each line-item of expense within the application. As evidenced 16 17 on Schedule CDE-2, using this standard method results in 60.61% of expenses being considered as fixed costs. 18

# Q. HOW DOES YOUR RECOMMENDATION COMPARE TO THE COMPANY'S CURRENT LEVEL OF REVENUE RECOVERY WITHIN ITS BASE METER CHARGES.

As evidenced in Schedule CDE-3, under the test year billing determinants and the rates in effect for each system prior to the initial implementation of the increase, the Company was projected to recover \$3,965,115 of revenue in its base meter charge as compared to total revenue of \$6,248,073. In other words, 63.46% of revenue under the utility's current rate design is projected to be recovered from fixed charges.

# 6 Q. HOW DOES YOUR RECOMMENDATION COMPARE TO THE COMPANY'S 7 PHASE I RATE REQUEST?

A. As illustrated on Schedule CDE-4, under the Phase I rate request the Company is
 proposing to recover \$4,538,764 of revenue in its base meter charge as compared to total
 revenue of \$6,807,400. This results in approximately 66.67% of revenue recovery within
 the base meter charge.

# 12 Q. HAVE YOU PREPARED EXAMPLE RATES WHICH ILLUSTRATE YOUR 13 RECOMMENDATION?

A. Yes, Schedule CDE-4 presents rates which are calculated to recover the revenue
requirement recommended on Schedule CDE-1, with 60.61% of revenue recovery in the
base meter charge and the remaining revenue recovered in the volumetric charge. Please
note that in structuring the volumetric charges, I have assumed the same percentage
increase in rates between each block as requested by the Company in its application.

Q. GIVEN THE LESSOR AMOUNT OF REVENUE THAT YOU ARE PROPOSING
TO ALLOW THE COMPANY TO RECOVER IN THE BASE METER CHARGE,
WHAT IS THE IMPACT TO THE COMPANY FROM A FINANCIAL
PERSPECTIVE?

A. It is my opinion that there will be minimal impact to the financial operations of Quadvest.
 The process of rate design is revenue neutral. In other words, after the revenue
 requirement is identified, rates are designed based on test year billing determinants to
 recover the identified revenue requirement. My proposal simply shifts the proportion of
 revenue collected from the fixed charge to the volumetric charge.

6 The Company may argue that shifting some of the revenue recovery to the 7 volumetric portion of the rate increases the chance that precipitation and changes in 8 customer behavior will reduce the amount of revenue generated in the volumetric rate 9 component. However, volumetric changes due to a lack of precipitation or customer 10 growth could also equally result in increases in revenues due to customer usage that is 11 higher than the test year amount. Given that the Company has proposed no adjustment to 12 test year billing determinants, it is assumed that these volumes represent a normalized 13 level of consumption that can reasonably be experienced in the future.

Further, the consolidation of rates may in fact reduce the Company's cost, reductions which can be used to offset any potential variation experienced in volumetric revenue. As testified to by Mr. Eastman, the single tariff will prevent Quadvest's customer service department from having to "develop separate communications for each . . . tariff group," and may "reduce customer service call times."<sup>38</sup> The efficiencies achieved from the consolidated rate may allow the Company to reduce its overall customer service costs while maintaining current service levels.

<sup>38</sup> Direct Testimony of Jeffrey Eastman, Page 9 (Bates Page 11), Lines 11 through 17.

| 1 | Finally, the Company's exposure is further reduced by the use of a pass-through             |
|---|---|
| 2 | charge, per 1,000 gallons of use, for purchased water and Groundwater Conservation          |
| 3 | District fees. The use of such a pass-through charge ensures the Company will be able to    |
| 4 | recover these fees outside of a full rate case and further mitigates the financial exposure |
| 5 | of the Company to price increases. In summary, I believe the benefits to the Company of     |
| 6 | the consolidated rate structure are more than sufficient to offset any potential volumetric |
| 7 | variations.   |

8

# **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

9 A. Yes. However, due to ongoing discovery and with the Administrative Law Judge's
10 permission, I request the right to amend, delete and/or add to my testimony as additional
11 facts become known.

# Chris D. Ekrut Director, Environmental Practice cekrut@newgenstrategies.net

Mr. Ekrut currently serves as Director of NewGen Strategies & Solutions, LLC Environmental Practice. He has been in this role since September 2012. Prior to joining NewGen Strategies & Solutions, Mr. Ekrut joined J. Stowe & Co. (now NewGen) as a Senior Consultant in May 2008 and was subsequently promoted to Manager in December 2009. Prior to joining J. Stowe & Co., Mr. Ekrut was employed by R.W. Beck, Inc. as a Staff Consultant beginning in June 2005, after earning his Masters in Public Administration from the University of North Texas and graduating with honors. Prior to beginning his consulting career, Mr. Ekrut served as an intern for U.S. Congressman Larry Combest, Texas 19<sup>th</sup> District.

# **EDUCATION**

- Masters of Public Administration, University of North Texas
- Bachelor of Arts in Public Administration, West Texas A & M University

# **PROFESSIONAL AFFILIATIONS**

- American Water Works Association
- Texas Municipal Utilities Association

# **EXPERIENCE**

During his career, Mr. Ekrut has assisted in conducting a variety of engagements for water, wastewater, solid waste, electric, and natural gas utilities. A sampling of Mr. Ekrut's experience is included below:

- Assisted in conducting an Economic Impact and End User Impact Analysis for the Toledo Bend Water Supply Project, which proposes to supply at least 600,000 acre-feet of raw water to the DFW Metroplex.
- Assisted the City of Arlington in conducting a wholesale water sales assessment study.
- Assisted the Texas Water Development Board in conducting a Socioeconomic Analysis of Select Interbasin Transfers in Texas and developing a model to quantify the financial impact of water conservation measures.
- Assisted the North Texas Municipal Water District in analyzing rate alternatives for its Member Cities.
- Assisted in conducting Socioeconomic Analysis in support of the Region C Study Commission Report in response to SB 3, 90<sup>th</sup> Texas Legislative Session requirements.
- Assisted Dallas Water Utilities and Tarrant Regional Water District in conducting a study of the Raw Water Transmission System Integration of Lake Palestine.
- Served as the Project Controls lead for the Program Management of the Waco Metropolitan Area Regional Sewer System Treatment Plant Expansion Program.
- Conducted a top-down Water Audit and assisted in the development of a wholesale water contract for the City of Gainesville, Texas.
- Assisted the City of Terrell, Texas in conducting a top-down water audit and developing a Standardized Developer Agreement related to Water and Wastewater Infrastructure.
- Assisted the City of Denton, Texas in developing and Indirect Cost Allocation Model for general fund and internal service fund departments.

# Chris D. Ekrut

## **Director, Environmental Practice**

- Assisted the City of Gunter, Texas in performing due-diligence and establishing a developer proposed Tax Increment Reinvestment Zone.
- Assisted Nueces County Water Control & Improvement District No. 4 in reviewing and negotiating a water rate methodology with the City of Corpus Christi.
- Assisted the Pittsburgh Water and Sewer Authority in reviewing the appropriateness of subsidy payments made to Pennsylvania America Water Company
- Assisted the Navajo Tribal Utilities Authority in updating and amending its water and wastewater service tariff terms and conditions
- Assisting the City of Killeen in evaluating the feasibility of establishing and setting a user fee for a Transportation Utility

### **Utility Business Plans:**

City of Gainesville, Texas

City of Blue Mound, Texas

Town of Prosper, Texas

#### **Operations and Management Reviews:**

- Brownsville Public Utilities Board
- Lower Colorado River Authority's Water and Wastewater Service Unit

#### **System Valuations:**

- City of Blue Mound, Texas
  - Town of Lakeside, Texas
- City of Southmayd, Texas

- City of Tyler, Texas
- City of Oak Point, Texas
- Mustang Special Utility District

# Wholesale and/or Retail Water, Reclaimed Water, Wastewater, and Drainage Cost of Service and Rate Design Studies:

- Town of Addison, Texas
- City of Aledo, Texas \*
- City of Amarillo, Texas
- City of Bellaire, Texas
- City of Bonham, Texas
- City of Burkburnett, Texas \*
- City of Burnet, Texas \*
- Canyon Regional Water Authority
- City of Cedar Park, Texas
- City of Cisco, Texas
- City of Coleman, Texas

- Double Diamond Utilities Co. \*
- City of Farmersville, Texas \*
- City of Gainesville, Texas \*
- City of Garland, Texas
- City of Glenn Heights, Texas \*
- City of Graham, Texas
- City of Grapevine, Texas \*
- City of Killeen, Texas
- Town of Lakeside, Texas
- City of Lancaster, Texas \*
- City of League City, Texas

2

- City of Lewisville, Texas
- City of Mansfield, Texas
- City of McGregor, Texas
- City of Mexia, Texas
- City of Murphy, Texas
- Navajo Tribal Utility Authority
- Nueces County Water Control and Improvement District No. 3

- SOAH Docket No. 582-12-5332, Application of Upper Trinity Regional Water District for Water Use Permit No. 5821

# Chris D. Ekrut

### Director, Environmental Practice

- SOAH Docket No. 582-14-2854, Petition of Fort Belknap Water Supply Corporation and Graham East Water Supply Corporation to Appeal the Wholesale Water Rate increased imposed by the City of Graham
- SOAH Docket No. 473-15-037, Application of Double Diamond Utilities Co. for a Water and Sewer Rate / Tariff Change (37752-R and 37753-R)
- SOAH Docket No. 473-16-1836-WS, Ratepayers' Appeal of the Decision by Trophy Club Municipal Utility District No. 1 to Change Rates
- Expert Assistance to Office of Public Utility Counsel ("OPUC") for the following PUC Rulemaking Project Nos.
  - PUC Project No. 43871

PUC Project No. 44462

PUC Project No. 43876

PUC Project No. 44706

PUC Project No. 43967

### **Solid Waste Experience**

- Assisted in conducting a Municipal Solid Waste Operations Study for the City of Denton, Texas.
- Assisted in the conduct of an Alternative Feasibility Study for the City of Peoria, Arizona.
- Assisted Siemens Energy and Environmental Services in conducting a detailed Waste Shed Analysis of the Dallas-Ft. Worth Metroplex in support of a new, environmental-friendly waste processing technology.
- Assisted in conducting a Mixed Recycling Facility (MRF) Study for the North Central Texas Council of Governments.

## **Electric Utility Experience**

- Assisted Garland Power & Light in the conduct of an Asset Inventory and Assessment in 2006, filing their 2006 and 2006 Earnings Monitoring Report and 2014 Transmission Cost of Service Study with the Public Utility Commission of Texas.
- Assisted the City of Brenham, Texas in conducting an Electric Cost of Service and Rate Design Study and developing a Power Cost Recovery Factor (PCRF).
- Assisted Austin Energy in modifying and refining the utility's excel-based financial forecasting model.

#### **Gas Utility Experience**

- Assisted the City of Brenham, Texas in analyzing and amending their Gas Cost Adjustment Factor
- Provided litigation support in Texas Railroad Commission Docket No. 9670 Petition for De Novo Review of the Reduction of the Gas Utility Rates of ATMOS Energy Corp., Mid – Tex Division.

#### **Franchise Fee Experience**

- Assisted in conducting reviews of the franchise fee payments made by Charter Communications to the Cities
  of Rockwall and Denton, Texas.
- Assisted in conducting reviews of the franchise fee payments made by Oncor to a coalition of Cities within the State of Texas.
- Assisted in conducting franchise fee reviews of gas and electric providers in Fayette County, Kentucky.

4

### **Impact Fee Experience**

Mr. Ekrut has assisted in the development of Water, Wastewater, and/or Roadway Impact Fees for the following clients:

- City of Denton, Texas
- City of Ft. Worth, Texas
- City of Flower Mound, Texas
- City of Frisco, Texas

- City of Glenn Heights, Texas
- City of McKinney, Texas
- City of Mesquite, Texas
- City of Willow Park, Texas

### **Publications and Presentations**

- "Allocating the Costs of Population Growth in Wholesale Water Contracts," Texas Water Law Conference, January 2007
- "Business Planning and Its Benefits to Municipal Utilities," American Water Works Association, Texas Section, 2008
- "Plan Your Work and Work Your Plan: The Benefits of Municipal Utility Business Planning," Texas Town & City, October 2009.
- "Strategies for Pricing Direct Water Reuse," Texas Water Conservation Association, March 2013.
- "Utility Management and Revenue Considerations," New and Emerging City Manager Roundtable, North Central Texas Council of Governments, February 2014.
- "Texas Water Development Board Water Conservation Best Management Practices Model: Estimating Water Conservation Savings for New Annual Reporting Requirements," Texas Water Conservation Association, March 2014
- "When in Drought! Utility Ratemaking 101," Government Finance Officers Association of Texas, April 2014
- "Aledo, Texas How a Small City Overcame a Capital Improvement Giant," American Water Works Association, Utility Management Conference, January 2015
- "To the PUC... and Beyond!", Government Finance Officers Association of Texas, Pre-Conference, November 2015
